Right hand drive vehicles from countries other than Australia are NOT recommended. These vehicles DO NOT meet Australian Design requirements, ARE NOT fitted with an Australian Compliance Plate, and ARE NOT authorized to convert to Australian specifications. It is not recommended to import this type vehicle into Australia as it must be exported, sold to a SOFA customer or destroyed at the completion of your tour. 5. All cars are required to have a headlight flashing capability, which enables you to give warning by flashing the headlights.
6. A "Data Sheet", i.e., a statement regarding the technical specifications of the vehicle from the manufacturer's Austrian Representative, might be necessary. This statement, however, is only required if the model is not being sold or is otherwise unknown on the local market. The prices for subject statements range between US $200.00 to US $1,000.00.
7. You can expect to pay $200.00 to $800.00 depending on the type, model and age of your motor vehicle to bring it into conformity. This figure does not include any possible repairs which may become necessary in the course of the safety inspection. The above listed modifications can usually be done by local repair shops or by the local dealer or representative handling your type of vehicle. We strongly recommend you get an estimate for the modifications costs prior to authorizing the work.

b. RIFLES/SHOT GUNS

Extremely prohibited.

c. TOY RELATED GUNS

Toy guns and other types of guns are prohibited.

d. OTHER (i.e. AMMO, EXPLOSIVES, ETC)

8. PRIVATELY OWNED VEHICLES (POVs)
PROHIBITED VEHICLES: Willy jeeps are prohibited from importation in Bahrain, all other jeeps are allowed.

LICENSE PLATES: NO LICENSE PLATES are allowed on or in the POV to Bahrain, because foreign license plates are prohibited completely in Bahrain. Local Bahraini Customs Agents are confiscating all foreign license plates from inbound POVs at the Port of Khalifa, Bahrain. All license plates should be returned to service members prior to shipping a POV to the Kingdom of Bahrain. Packing license plates in the vehicle accessory box is prohibited.

FUEL: The Island of Bahrain does not have Ultra Low Sulfur Diesel, Diesel fuel in Bahrain is 500ppm.

VISA and CPR CARD: All POVs are required to be registered with the government of Bahrain prior to being picked up from the VPC. Before members employees can register their vehicles they must obtain their VISA and CPR Card. Country VISAs are applied for once the member employee arrives in country and requires a GOVERNMENT PASSPORT, NOT THE TOURIST. Once the VISA is received the member employee will then apply for their CPR Card. A CPR Card is a personal identification number issued by the Kingdom of Bahrain to all personnel assigned to NSA Bahrain. It will take approximately one month to receive both VISA and CPR. Both documents are processed by the Base Immigration Office, therefore it is imperative that members employees apply for their VISA as soon as they arrive on Station. Vehicles left at the VPC for more than 20 days are subject to storage fees borne by the member. After market fitting or additional fitting is prohibited.

a. POVs (includes data on prohibited vehicles, colors, etc.)

a. Authorized DOD personnel may import free of duty no more than one privately-owned vehicle for the personal use of the member. However, you may import a second or third vehicle, but member is liable to pay the 20 percent import tax and local port handling. The legwork to complete the customs processing is the members responsibility. The local Ministry of the Interior defines a motor vehicle as either automobile or motorcycle with engine power exceeding 1.5 HP and engine size exceeding 50 cc. Personnel must be 18 years old and possess a valid permit to operate automobiles and motorcycles. POV will be inspected by local traffic directorate for compliance and thus requires registration according to Bahrain traffic law.

(1) Tinted windows: Local motor law allows the importation of vehicles with FACTORY TINTED windows. Vehicles cannot be registered unless the windshield and front side windows allow at least 70% of light to pass through. The front windshield may have a sun strip as long as it is the original manufactured windshield. All windows behind the front driver and passenger side windows can be tinted as long as it is the FACTORY TINTED windows. The amount of tinting for windows behind the driver and passenger side windows was not addressed by the Kingdom of Bahrain with the exception of them needing to be FACTORY TINTED. Vehicles already imported will be allowed until November 2005 to change their windows should they not comply. Vehicles that are in transit at this time with non-conforming tinted windows may not be allowed to be registered. After market tinting is not allowed.

(2) Right handed steering wheel: Vehicles with right-handed steering wheel (right hand driven) is not permitted.

(3) Paint scratches and dents: Vehicles with badly faded paint, dents, widely visible scratches, rust, or any other damage will not pass the inspection. Normal dings and scratches are acceptable. Loose or hanging body parts are not acceptable. Major body damage or twisted and bent frame is not acceptable. Cars and motorbikes decorated with flat matt paint or matt vinyl wrapping will no longer be allowed on Bahrains roads due to safety concerns. Part of a GCC-wide ban on non-glossy paint jobs, agreed at an Interior Ministers summit held in Kuwait in November 2015, the move will see owners of vehicles decorated in such a fashion unable to renew their vehicle registrations at the General Directorate of Traffic. Owners should maintain the original appearance of the car and refrain from matt painting.
their vehicles, said a source from the General Directorate of Traffic. All car and motorcycle importers must refrain from importing matt-colored vehicles, the matt ban decision was made before Bahrain's tough new traffic law, which dramatically increased fines and jail terms for various offences. (4) Tires: All tires will be in good condition. Tires extending partially beyond the fender are prohibited. (5) Lights: All installed lights must be operational. Headlights cannot be modified. The taillight or a separate light must illuminate the rear license plate. Backup lights must function when the transmission is engaged in reverse gear. Vehicles must be equipped with directional signals. Roof rack light systems are prohibited. (6) Windshield Wipers: Must be operational. (7) Brakes: Vehicle must have two separate means of applying brakes. The failure of one braking system will fail registration. (8) Color: There are no restrictions as to color. However, no weird painting or art on vehicle is permitted. (9) Exhaust System: Faulty or excessively loud exhaust systems are prohibited. (10) Salvaged vehicles as stated on the certificate of title are not permitted. (11) After market hydraulic systems are prohibited. Department of Ministry WILL NOT pass a vehicle for safety inspection if replacement or modification on engines has been performed. (Example: if there was a V8 engine in a V6 car) (12) Other: Vehicles must meet operational and safety standards. Missing fenders, broken windows, missing side view mirrors, and improper wheel alignment (wheels that cannot be turned from full right to left without jamming or rubbing part of the vehicle) will not be accepted. Stickers, drawings, advertisements, or writing on the vehicle are not allowed. (13) Effective 1 May 2016, all vehicles shipped to Bahrain older than 5 years of age will have to be exported when the member departs the island. Vehicles shipped under this exemption will not be allowed to be re-registered if sold to another party. Furthermore members are advised before they purchase a vehicle in Bahrain to make sure the vehicle was shipped prior to the exemption date to ensure that it can be registered.

b. MOTOR CYCLES/MOPEDS

Mopeds and motorcycles require registration according to Bahrain traffic law.

c. GASOLINE/CATALYTIC CONVERTERS

Unleaded gasoline is available throughout Bahrain, removal of catalytic converters is no longer required.

d. INSURANCE AND SAFETY REQUIREMENTS

(1) Insurance and traffic registration expiration dates must coincide with one another, (i.e., last day of the month). Insurance and registration must be renewed annually; failure to comply will preclude operation of vehicle and may subject the owner to a penalty in accordance with Bahrain law. (2) Automobile insurance for the Bahrain area is reasonable. Cost depends on make, model, year of vehicle and the total value (what is it worth at present) you declare on the vehicle. Insurance is compulsory, and POV cannot be released, registered, and used without proof of insurance. Once insurance is issued on a vehicle, coverage includes anyone who drives the vehicle. Not necessary to have each individual driver insured. There are two types of insurance policies available: (a) Third party (without collision) will run about $125 160 per annum. (b) Comprehensive (full cover) will run $300 and above per annum.

9. SEXUALLY EXPLICIT/PORNOGRAPHIC MATERIAL
The importation of pornographic material is a strict violation of Bahrain law. Those items determined to be pornographic will be confiscated, destroyed and the importer will be prosecuted.

10. STUFF WILD LIFE/ANIMALS AND PLANT RESTRICTIONS

No restrictions identified.

11. TRANSMITTING EQUIPMENT

Members should contact their sponsors before deciding disposition of cordless phones.

12. SEPARATEES/RETIREESENTITLEMENTS/LIMITATIONS

Personnel contemplating retirement, separation or relocating dependents to Bahrain should be counseled that all customs entry requirements to include payment of duties and taxes remain the responsibility of the member and is a personal matter between the member and the Government of Bahrain. When processing application and gbl, shipment must be consigned to member’s residence in country or to the destination agent facility. 2. CUSTOMS CLEARANCE PROCEDURES, REQUIREMENTS, AND RESTRICTIONS
a. All DOD military personnel should contact US Defense Attache Office (USDAO), Dhaka, Bangladesh, upon notification of assignment to the US Embassy. The US Embassy arranges for all customs clearances from port of entry to Dhaka. All personal property shipments are cleared through Bangladesh customs duty free allowing a minimum 2-3 weeks for HHG; 3-4 weeks for POV. Non-diplomatically assigned personnel are not authorized importation of duty free shipment after 6 months of arrival. Personal property shipments cannot be cleared prior to the arrival of the employee at post and thus will incur significant demurrage charges until your arrival. b. Provide USDAO and American Embassy via message ASAP carrier’s name, flight number, airway bill number, and RDD. Ensure the American Embassy, Dhaka, receives info copy of all correspondence concerning shipments as Bangladesh requires the original commercial bill of lading/airway bill and/or PPGBL in order to initiate customs clearance. Customs clearance will not be initiated until member’s arrival. c. All personnel, diplomatic and non-diplomatic, must provide the Embassy with a detailed packing list/inventory of their personal property shipped so customs declarations can be provided to the appropriate Bangladesh agencies within 10 days of member’s arrival. Personnel must ensure all items of household goods, furniture, appliances, kitchenware, hobby equipment, clothing, furnishings, etc., are accurately identified indicating complete description, quantity and value per item. All items such as electrical equipment, video, household appliances, lenses, cameras, stereo equipment, radios, musical instruments, bicycles, etc., must be listed by model and serial number on import inventory. This detailed inventory is verified during customs inspections/examinations for all non-diplomatically accredited personnel at the point of entry and again when HHG are exported to confirm the items leave Bangladesh. All imported items are customs controlled and require recording on the official Bangladesh "passbook". d. Upon departure from Bangladesh, all declared items must be accounted for through export or indicated otherwise on passbook. Non-diplomatically assigned personnel are not authorized to sell items/material imported duty free.

(a) Accompanied tours: Full JTR weight allowance for all areas.

(b) Unaccompanied tours: Weight allowance for E-6 single and below/unaccompanied personnel is limited to HHG transportation of 2,500 lbs. (net) or 25% (net) of the weight allowance in par. 5202.D, whichever is greater. This weight includes UB Transportation and is regardless of tour length.

(c) Full JFTR weight allowance is authorized for unaccompanied E-7 and above.

(d) Requests for exception may be submitted to the PPPO Installation Transportation Office identified in Special Instructions, Note 6. Soldiers will attach a copy of their orders to their individual request. Soldier’s requests must show that they have confirmed the type of housing they will be assigned at their European PDS. Government quarters in Europe are small, and generally cannot accommodate HHG greater than the administrative weight allows (See Paragraph 5, Furniture Oversized, of General Instructions). Prior to requesting an individual increase to the administrative weight restriction, Soldiers should contact their gaining Garrison's housing office through their sponsor to request information related to the type of housing the community has to offer.

c. HARD LIFT AREA
d. UNACCOMPANIED BAGGAGE

3. CONSUMABLES

a. ALCOHOLIC BEVERAGES

Alcoholic beverages are considered combustible and flammable material and may not be shipped with international household goods or unaccompanied baggage. If wine cellar or liquors are shipped, it is recommended to ship commercially. The shipment will be subject to Belgian importation taxes. Arrangements are the sole responsibility of the member.

4. ELECTRICAL EQUIPMENT

RADIOS AND STEREO EQUIPMENT: Are not restricted. There is an annual radio tax for each radio owned, including the car radio.

a. HOME COMPUTERS

b. TVs/VCRs
Televisions made for use in the US will not receive European signals. Armed Forces Network (AFN) broadcasts around Brussels and SHAPE may be received by US television sets, but access is limited to certain areas. Multi system, or European consoles are required for local cable and satellite reception. There is an annual TV tax for every TV in the household, approximate annual cost depends on black/white or color. US consoles receiving AFN only, are not taxed.

c. OTHER (i.e. COMPATIBILITY, ETC)

All electrical sources are 220-240 volt, 50 Hz. Ensure electrical appliances conform, or are dual voltage/frequency. Transformers are readily available on the economy and thrift shops on station. Microwave ovens must be able to switch to 50Hz if connected to a voltage transformer. Plug adapters are readily available for converting lamps and other items to Belgian wall outlets, 220 volt bulbs are readily available.

5. FURNITURE, OVERSIZED

Government and Economy living quarters are generally smaller than those in CONUS. Economy housing in Germany may accommodate more HHG than government quarters, but are still smaller than homes and apartments in the United States. Many have narrow doorways and tight stairwells that cannot accommodate furniture that would fit easily into an American home. Service members shipping large items such as king and/or queen size box springs and mattresses, oversized sofas, or other large furniture items that cannot be disassembled, may encounter problems when residing in government or economy housing due to narrow stairwells. Washers, dryers, ranges, refrigerators, kitchen cabinets, and wardrobes are furnished for Government and Economy quarters. There is no Non-temporary storage in Europe authorized for HHG shipped in excess of what will fit, or is too large to be placed in, the Soldiers living quarters. Excess property shipped will not be stored at Government expense. Storage will be at the Soldiers expense.

6. PETS/QUARANTINE

Standards laid out in the following document address requirements for shipping dogs, cats, and ferrets from the United States. PLEASE NOTE: Ferrets are not accepted as pets for movement on AMC military or commercially contracted aircraft. If you require information on shipments for ferrets or other exotic pets please contact your local USDA field office. NOTE: For the remainder of this document the term pet or pets refers to dogs and cats only. ATTENTION: An examination fee of 55 Euro per pet will be implemented February 1, 2013, for all non-EU citizens who import a pet into the country. A. Quarantine Period - There is no quarantine period for pets entering Germany. B. Identification (Via standard electronic identification system with a read-only passive radio frequency identification device known commonly as a transponder Microchip): (1) Complies with ISO standard 11784 and 11785 (2) Where the microchip does not comply with ISO standard 11784 or 11785, the owner or the natural person responsible for the pet on behalf of the owner must provide the means necessary (Microchip Reader/Wand) for reading the non-ISO compliant microchip at the time of inspection (3) The microchip must be implanted before the primary rabies vaccination or valid rabies booster is given to the pet before traveling: a) Primary Rabies Vaccine - This is the first rabies vaccination a pet ever receives; for EU countries this also applies to the first rabies vaccine given after the microchip was implanted; that is, rabies vaccinations received prior to the pet being microchipped are NOT recognized by the EU. b) Valid Rabies Booster - This is a rabies booster that was given to the pet before the
previous (Either the primary rabies vaccine or another rabies booster) rabies vaccination expired

C. Rabies Immunization:  
(1) Please refer to "http://www.aphis.usda.gov/regulations/vs/iregs/animals/" (Enter the destination country you will be residing in under "Search APHIS")  
(2) Pets less than three months of age coming from the United States may not always require the rabies vaccination IF:  
(a) These pets have pre-authorization from the EU member state BEFORE entering the country  
(3) Any one year dose or three year dose rabies vaccine is valid as long as it is a U.S. approved vaccine, and was administered according to the manufacturer's specifications (for instance, a vaccine labeled for 1 year use cannot be utilized as a 3 year vaccine)  
(4) A valid rabies vaccine must occur after the animal has been microchipped to be valid for entry into an EU member state  
(5) At least 21 days must have elapsed between the completion of the primary rabies vaccination (as specified above) and before the pet enters the EU member state.  
(a) However, if the animal received a valid rabies booster - - 21 days does not have to elapse before travel.  
(b) If a pet has received a non-ISO compliant microchip and then received a valid rabies vaccination with 21 days having elapsed since that vaccination and entering the EU member state; they:  
(a) Do not require implantation of another ISO compatible microchip, but are required to carry with them a microchip reader/wand capable of reading the non-ISO compatible microchip implanted in their pet  
(b) Do not require administration of another rabies vaccination before traveling as long as the rabies vaccination received is still valid  
(c) Can have an ISO compatible microchip implanted in their pet so they do not have to carry the reader/wand with them  
1. If they get this ISO compatible microchip implanted, they do not have to receive another rabies vaccination following this second microchip implantation. They are only required to document both chips on the required forms with their implantation dates  
D. Documentation (Verify the correct required documentation with your local USDA office):  
(1) APHIS Form 7001 (Nov 2010) Acquired from any Army veterinarian, local veterinarian or USDA office  
(a) Valid for only 30 days after issuance  
(b) Requires certification by a USDA Accredited Veterinarian, Army Veterinarian, or GS 0701 Veterinarian before travel  
(c) This form is not required to enter the European Union (EU) 1. However, it's highly recommended that service members acquire this form before travel from their on-base Army veterinarian to preclude the following:  
(a) If a member flies on a commercial carrier they may be required to have this form  
(b) If a member is scheduled to fly Patriot Express and somehow has to divert to a commercial carrier, having this form in advance alleviates last minute costs ($200) or delays  
2. This form is not required to travel on Patriot Express  
(2) EU Non-Commercial Pet Form (Bilingual Health Certificate)  
(a) For "Pets Dog, Cats, and Ferrets" destined to Germany, see link Under Pets heading Pets Dog, Cats, and Ferrets) Please refer to "http://www.aphis.usda.gov/regulations/vs/iregs/animals/" (Enter the destination country you will be residing in under "Search APHIS")  
(b) Valid for 10 days to enter European Union and 4 months once inside the European Union  
1. Timeframe the form is valid can be shortened per the requirements of the Airline the service member is traveling on  
(c) Requires certification by a USDA Accredited Veterinarian, Army Veterinarian, or GS 0701 Veterinarian before travel  
E. Helpful Hints:  
(1) As soon as you know you are going to travel and no later than 22 days prior to travel, get your pet microchipped first and then vaccinated
for rabies if you have not already done so. Remember: A VALID RABIES VACCINE MUST OCCUR AFTER THE MICROCHIP IS IMPLANTED. (a) This will ensure the required 21 days has elapsed post vaccination prior to travel. (2) When completing your required documentation (before you mail the forms or travel to your local USDA office to get them certified, if not using your on base Army veterinarian), fax or over-night ship them to your local USDA office to ensure they are filled out correctly before traveling to their office. (a) This will ensure you do not waste travel time or postage only to have to redo the paperwork. (3) Many overseas bases have a full-time veterinarian on staff as well as commercial veterinarians available on the economy. (a) Most bases require pets to be registered with the base veterinarian after arrival. Check with base veterinarian for details. (4) The pet cage or carrier (see carrier shipping rules for correct cage dimensions based on pet size) used for shipping the pet must be labeled with the owner's name, pet's name, owners (or nominated persons) address, contact number and contact number at the final destination. (5) Since 21 Apr 2001, Germany has had a law in place prohibiting importation of certain dog breeds regarded as dangerous. For more information consult http://www1.zoll.de/english_version/a0_passenger_traffic/e0_vub/h0_dangerous_dogs/index.html. You may also contact the base veterinarian at your destination. F. Unauthorized Pets: The import of Pit bull Terriers, American Staffordshire Terriers, Staffordshire Bull Terriers and their crossbreeding is prohibited. G. Fees: (1) The USDA form certification fee (approximately $70+, plus any shipping and handling if by mail) (2) Transporting pets to and from the PCS destination is at the member's expense and cost is based on the size of the pet being transported. Connecting flights may have fees in addition to AMC fees from BWI. (3) EFFECTIVE 1 February 2013, The fee for the import examination is 55 EURO. (4) All pet requirements are at the member's expense. (5) Shipping pets back to the U.S. or out of Brussels, Belgium International Airport is expensive. This should be considered when bringing pets to Belgium or acquiring pets while stationed here.

a. POVs (includes data on prohibited vehicles, colors, etc.)

(1) All personnel are authorized one tax-free registered vehicle. Registration is annual and cost is based on the engine size. Estimated initial registration for a two(2) liter engine is 90 US dollars, subsequent annual registrations are approximately 15 US dollars. All additional vehicles must be registered if driven on the public roads, and the cost is commensurate with engine size. For example, the estimated cost for 4.0 liter engine vehicle is approximately 1,400 US dollars. Trailers and all wheeled vehicle equipment must also be registered, if used on the public roads. Fines for failure to register are high. (2) All vehicles older than four(4) years must go through an annual technical control, for emissions and road worthiness. Estimated cost is 30 US dollars per year. (3) Belgian law requires POV having tinted glass to be equally transparent from either side. Tinted windows must not exceed a 30 percent reduction in light. Manufacturer tinted or self-adhesive film is permitted. Manufacturer tinted windows must have manufacturer's seal/mark. Windows may not be tinted and also be covered with self-adhesive film. SPECIAL REQUIREMENTS: Name of owner, VIN number or engine number, color, make, and model must be described on the original bill of lading. Copy of Certificate of Title and Passport is required. The US Embassy GSO Customs & Shipping Section provides service for the US Mission in Bolivia. No importation of diesel vehicles or vehicles where model year not to exceed 2yr from current year, (ie: for 2015, not older than 2013) (strictly enforced). There are also severe value restrictions on imported vehicles based on diplomatic rank. Shipments must be addressed directly to the consignee at the US Embassy in La Paz via the port of Arica, Chile. *Do not send shipments via Iquique or any other port* Post recommends that small shipments (crates smaller than an individual lift-van) be consolidated in Miami at Seaboard Marine. Contact LA_PAZ_CUSTOMS_AND_SHIPPING@state.gov for more detailed information.

a. POVs (includes data on prohibited vehicles, colors, etc.)

(1) All PCS military are authorized duty-free Import of one POV. Shipment of military POVs should be to La Paz, Bolivia via, Arica (EE2), Chile. Vehicles should be consigned to COMUSMILGP - Bolivia, American Embassy, La Paz, ATTN: ATO. Vehicles must be crated and securely tied down inside containers, as they are shipped overland across the Andes to Bolivia; major damage has occurred when vehicles have broken loose from mountings inside containers. Vehicles must not be ostentatious. Removable POV accessories (i.e., radios, tape decks, extra mirrors, lighters, extra tools) should be shipped as HHG as they have a tendency to disappear in transit. Specific and up to date information should be obtained from the sponsoring country prior to shipment of POV. (2) If you plan to ship a POV to post, be advised that the Bolivian government has established limitations on the value of POVs imported by diplomatic personnel. The value limits shown below include $3,500 for shipping charges and the actual cost of insurance or two (2) percent of value of the POV if insurance is not purchased. This should be taken into account when determining the maximum purchase price of our vehicle. (a) VALUE LIMITS BY POSITION ARE AS FOLLOWS: 1. First Category: Chief of Mission - No value limit. 2. Second Category: Charge D’Affaires - US Dollars, $36,000. 3. Third Category: Counselors, First Secretaries, Vice-Counsuls, Army, Navy, and Assistant Attaches - US Dollars $31,200. 4. Fourth Category: Second and Third Secretaries, Vice Consuls, Army, Navy, and Assistant Attaches - US Dollars $28,800. 5. Fifth Category: Cultural and Commercial Attaches, Civil Assistant Attaches, International Mission Experts - US Dollars $27,600. 6. Sixth category: Administrative and Technical staff - $22,900 USD For vehicles that exceed these values, the employees will be personally responsible for importation taxes on the excess. The GOB does not permit the importation of diesel engine vehicles. (b) Post recommends that POVs sent to Bolivia have at least six(6) Cylinders, mountain gearing, and manual transmission because of hills and altitude. Four wheel drive vehicles are very popular and recommended by many employees, especially if you plan to travel outside of the city. Manual transmissions often have better resale value. The resale market for POVs is generally good. (3) In order to clear customs, the Embassy requires a commercial invoice and original bill of lading. Original bill of lading should be mailed by international courier (D.H.L., FEDEX, or UPS) to: USMILGP - Bolivia, American Embassy La Paz, ATTN: General Service Officer prior to the arrival of vehicle at the port. POV should be consigned to: American Embassy La Paz, No. 2780 Ave Arce, La Paz, Bolivia, (591) 243-30251 (telephone)/(591 243-3047 Fax number. (b) Post recommends that POVs sent to Bolivia have at least six(6) Cylinders, mountain gearing, and manual transmission because of hills and altitude. Four wheel drive vehicles are very popular and recommended by many employees, especially if you plan to travel outside of the city. Manual transmissions often have better resale value. The resale market for POVs is generally good. (3) In order to clear customs, the

Not considered POVs; ship as HHG. If imported, must pay heavy import tax.

c. GASOLINE/CATALYTIC CONVERTERS

Only leaded or diesel fuel are available in Bolivia, so you may wish to have your catalytic converter removed in the U.S. prior to shipment.

d. INSURANCE AND SAFETY REQUIREMENTS

The government of Bolivia requires third party liability insurance for all vehicles, which can be purchased locally. The Embassy also recommends that you have coverage for comprehensive and collision. Do not forget to insure POV en route to post. Make sure insurance company covers Bolivia.

4. ELECTRICAL EQUIPMENT

Primary power in Bosnia is 220V/50HZ. Voltage regulators and/or uninterruptible power supplies should be brought for sensitive electronic equipment, i.e., computers, stereos. Post issues two step-down transformers per housing unit for use with 110 volt appliances. A complete welcome kit is supplied for use until an employee's HHE shipment arrives. This kit includes kitchenware, a coffeemaker and toaster, china, glassware, flatware, iron, ironing board, bedding and towels.

5. FURNITURE, OVERSIZED

Permanent housing in Sarajevo consists of short-term leased government-furnished quarters. The Embassy’s Interagency Housing Board (IAHB) assigns housing in accordance with the space standards in 6 FAM 720. Housing assignments are usually finalized two months prior to the employee's arrival, provided that post has accurate arrival information. The IAHB makes assignments based on the units available at the time of the employee's arrival, considering employee preferences and special circumstances when possible. The embassy housing pool includes apartments, townhouses and some single family homes. The quality of available housing in Sarajevo has improved in recent years, but units with a lot of storage space continue to be hard to find. Some employees detailed or seconded to international organizations are on a living quarters allowance (LQA) and do not receive embassy-leased housing. Employees must keep lack of storage in mind when planning shipments; post cannot provide warehouse space for employees' personal effects. Garages here tend to be smaller than in the United States and larger vehicles such as SUVs are sometimes a tight fit. Post provides major appliances, including, two-room air conditioners, refrigerator/freezer, washer and dryer and a microwave oven. Optional items such as portable fans and space heaters are available on request. The Post housing handbook gives a full listing of household furnishings and appliances provided by post. New arrivals are provided with a welcome kit, which includes flatware, silverware, basic kitchen appliances, vacuum cleaner, pots and pans, and bedding and bath linens until household effects arrive.

6. PETS/QUARANTINE

There is no prohibition on bringing pets into Bosnia. A recent vaccination record is required to import animals. Most hotels do not accept pets and most embassy residences do not have yards for larger animals. Procedures for shipping animals vary from airline to airline - check carefully when planning to bring in a pet. Employees are responsible for any pet damage to embassy housing or furnishings. Good veterinary care is available in Sarajevo.

Firearms and ammunition are prohibited at post.

a. POVs (includes data on prohibited vehicles, colors, etc.)

Employees assigned to Sarajevo may ship a POV no older than seven years to Post. Accredited diplomats may register their vehicles free of charge, there is a fee of about $100 per year for registering a vehicle for those with administrative and technical status. Employees should hold a valid US driver’s license to operate a vehicle in Bosnia. Cars older than seven years at the time of import must be exported upon the end of the employee’s tour in Bosnia - they cannot be sold in Bosnia. For this reason post strongly recommends that personnel avoid importing cars older than seven years. Dealer service of US Spec vehicles is unavailable here, but local mechanics can fix many problems. Audis, Renaults, and Volkswagens are sold and serviced in the Sarajevo area. Four wheel drive vehicles are highly recommended as roads in Bosnia are rough and icy in winter.

b. MOTOR CYCLES/MOPEDS

Motorcycles can be shipped to post with HHE, but be aware operating a motorcycle in Bosnia cannot be considered safe given local traffic conditions and rough roads.

c. GASOLINE/CATALYTIC CONVERTERS

Lead-free gasoline is readily available.

d. INSURANCE AND SAFETY REQUIREMENTS

Bosnian law requires purchase of third party liability insurance from a local company. This insurance is available at a discount through an embassy contract.

and UB may arrive at post prior to employee's arrival since they can be held at the airport cargo terminal. However, documents for their customs clearance can only be processed after the employee arrives at post, is accredited by Government of Brazil and receives his/her Brazilian identification card, which may take from 3 to 5 weeks. The ID card is issued by the Foreign Ministry and not by the personal office at post. After the employee receives his/her identification card the HHG and UB should be cleared customs in approx. 3 weeks. c. In Brazil, there is a period of installation for the shipment of HHG and UB, which corresponds to the first 6 months after the employee's arrival at post. The Government of Brazil allows that, during the period of installation, the member ships to post as many HHG and UB he/she desires under the travel orders. It is important that the weight allowance is not exceeded. Dogs and cats are permitted entry. Advance notification (at least 10 working days in advance of arrival) to the US military agency assigned is required in order to arrange for clearance and free entry. Notification should include the type of animal, name of carrier and expected arrival date/flight. Dogs and cats require a public health certificate of vaccination against rabies. The vaccination must have been no less than 30 days but no more than a year before arrival. The certificate of vaccination must be validated by the US Department of Agriculture and submitted to a Brazilian Embassy or Consulate within which the USDA district office is located for authentication to receive a visa for the pet. Attach the certificate of vaccination with visa notations to the airway bill if you are not accompanying the pet. If the pet arrives with you, keep the vaccination certificate with you to facilitate clearance. Heartworm (filaria) is not prevalent in Brasilia, but is endemic in Rio de Janeiro and Sao Paulo.

7. PRIVATELY OWNED FIREARMS (POF)

a. If application for importation is made before arrival, the following information should be furnished to USMLO Brazilia (with info copy to organization assigned), purpose (hunting, target practice, self defense, etc.), caliber, make, number of barrels, type of barrels, telescopic sights (range), and serial number. Upon receipt of this information and approval by the Ambassador, permission is requested from the Ministry of War through the Ministry of Foreign Affairs for entry of the firearms. This approval takes at least 2 months, and no arms are cleared through customs without this permission.  

b. Importation of firearms requires prior authorization by the Ambassador in Brazilia and must be for personal use only. Only the following weapons have been approved by the Embassy and the Brazilian Government for importation:

a. HAND GUNS

2 Pistols, .38 caliber or smaller.

b. RIFLES/SHOT GUNS

2 rifles, .44 caliber or smaller.

c. TOY RELATED GUNS
No restrictions identified.

d. OTHER (i.e. AMMO, EXPLOSIVES, ETC)

8. PRIVATELY OWNED VEHICLES (POVs)

A MOTORCYCLE CANNOT BE SHIPPED IN THE CONTAINER WITH HHE. IT MUST BE SHIPPED SEPARATELY AND UNDER INDIVIDUAL BL. A MOTORCYCLE AND POV CAN NOT BE SHIPPED. No diesel POV's, no reflective or colored solar tinting (factory tint ok), motorcycle or boat considered a POV against entitlements (1 POV only) OTHER: Terminals/Vehicle Processing Centers ship privately-owned vehicles only upon receipt of message authorization from American Embassy Brasilia. Terminals send copy of Maritime Company original bill of lading via FAX to American Embassy Brasilia, FAX number 55-61-226-8470, so that customs clearance process can be initiated. Terminals send Maritime Company original OBL through DHL or FedEx to the following address: American Embassy (ATTN: GSO), SES AV. DAS Narcoes, Lote 3, Brasilia-DF, Brazil 70403-900.

a. POVs (includes data on prohibited vehicles, colors, etc.)

The American Embassy neither encourages nor discourages purchase of a Brazilian manufactured automobile in lieu of shipment of a privately-owned motor vehicle to duty station in Brazil but suggests personnel consider the following factors: 1. All US employees/Armed personnel assigned to Brazil may either import a car duty-free or purchase a Brazilian-manufactured car, exempt from manufacturer's tax. The car purchase value or local market price (Blue Book) cannot exceed $28,000 US dollars (for entitled with an administrative title) or $45,000 US dollars for those entitled with a consular or diplomatic title. 2. Authorization for importation/shipment of vehicles must be granted by the Embassy. The employee or agency must cable or preferably e-mail or fax (55-61-226-8470), to the Embassy stating the owner's name and rank, estimated time of arrival, and vehicle specification: year, make, model, VIN or engine number, color, purchase price, type of fuel, statement of no tinted windows (unless factory manufactured), etc. 3. Vehicle should arrive at the port of Rio de Janeiro close to the employee's arrival at post. Customs clearance can only commence after employee received his/her accreditation (carteira) from the Ministry of Foreign Affairs and CPF, issued by Receita Federal (Customs). 4. The government of Brazil does not allow the importation of two vehicles. If an employee decides to ship a second, other than the one authorized duty-free by the GOB, this second vehicle must be brand new and the employee will have to pay full duties on it. The employee MUST contact the Embassy BEFORE the vehicle. 5. Vehicles belonging to two or more employees MUST NOT be shipped under the same Bill of Lading (BL). Each vehicle must be shipped under an individual BL, even if vehicles belong to officers at the same post. Repeat, vehicle MUST BE shipped separately under separate BLs. If vehicles are shipped in the same container, customs process takes additional weeks which substantially increases the storage charges. 6. Vehicles MUST BE shipped to the port of Rio de Janeiro. Our broker's office can move customs documents more rapidly through the port of Rio than in Santos. Customs processes at the port of Santos are lengthy. Besides, Santos is a more expensive port. 7. Once authorization for shipment is granted, the shipper overseas MUST cable shipping details to post once vehicle is issued with the BL. To expedite the customs process, a copy of the BL MUST BE faxed to the post receiving the vehicle. The original Bill of Lading (OBL) must be forwarded by FedEx to post immediately after its issuance by the shipping line. OBL must have name of owner, complete
description of vehicle to include year of manufacture, color, make model, VIN and/oe engine number, purchase price, type of fuel, etc. The accuracy of this information is vital to ensure POV shipment is not delayed. Original copy of OBL must be mailed at earliest date to the American Embassy, Av. Das Nacoes, Quadra 801, Lote 3, 70400-00, Brasilia D.F., Brazil. The address for the Consulate in Rio de Janeiro is Av. Presidente Wilson 147B, Castelo, 20030-020, Rio de Janeiro, Brazil.8. The consignee block on the Bill of Lading MUST show the following sequence of information:MICHAEL MARSHALLFULL NAME OF EMPLOYEE (ABBREVIATION OF NAMES WILL SLOW DOWN CUSTOMS PROCESS)AMERICAN EMBASSYBRASILIA, BRAZIL VIA PORT OF RIO DE JANEIROTEL: 55-321-7272 X2156MICHAEL MARSHALLFULL NAME OF EMPLOYEE (ABBREVIATION OF NAMES WILL SLOW DOWN CUSTOMS PROCESS)AMERICAN CONSULATE GENERAL RIO DE JANEIRO, RJ - BRAZIL VIA PORT OF RIO DE JANEIROTTEL: 55-21-292-7117 X2618 9. Upon arrival at post, the employee must provide a copy of the POC's bill of sale and title to Embassy/consulate GSO Shipping and Customs Section.NOTE: Some damages occur to car tires received in containers at posts. Even though the vehicle may be strapped down inside of the container, the vessel's movement while at sea causes these vehicles to move, rubbing the tires against the wood. For all military Dispaches sending containerized vehicles to the states, suggest that when blocking and bracing these vehicles inside of container, protection be placed between the tires and the wood used for blocking. Place three pieces of cardboard, rags, or thick pieces of foam rubber between the rubber tires and the blocks of wood to prevent tires from rubbing against the wood blocks.10. Brazilian law prohibits the importation of diesel-powered passenger's vehicles by foreign personnel. Use of reflective or colored solar tinting, other than factory installed tinted glass, is also prohibited.11. A vehicle imported duty-free may be sold locally after it has been in Brazil at least 6 months (from date of customs clearance), provided the owner is transferred permanently from Brazil and required local import duties and taxes are paid. these duties and taxes gradually reduce until the vehicle has been in the country 3 years; then it can be sold locally duty-free. Duties and related taxes can total 160 percent of the minimun value (currently US $17,000 for automobiles over 2,400 pounds established by the customs authorities. Therefore, import duty tax will probably exceed the value of the imported vehicle until it has been in Brazil for the required 3 years. Even after 3 years, the market for imported vehicles may be limited as local citizens must pay a high yearly road tax on imported vehicles (currently us $2,000). A vehicle imported duty-free must either be sold or exported from the country within 30 days after owner’s departure.12. Ford, GM, Chrysler, Fiat, Alfa Romeo, Audi, Renault, Peugeot, Honda, and VW manufacture vehicles in Brazil. If a car is not imported, a new vehicle can be purchased with a tax exemption at a price about 40 percent lower than the normal Brazilian market. Most Brazilian car manufacturers offer both gasoline and alcohol powered models. Delivery may require 45-60 days, since the car must be ordered direct from the factory after receiving approval from the Brazilizn Foreign Office. The car may be sold locally without tax payments provided it has been owned for at least 1 full year from the date the car left the factory. Prior to that, the car may only be sold to another individual with tax-free privileges who did not import a car. Brazilian automobiles do not generally meet US safety/environmental standards so it can not usually be imported into th US.

b. MOTOR CYCLES/MOPEDS

For Brazilian importation purposes, a motorcycle or a motorboat is considered a "vehicle". As such, they cannot be included in the HHG or UB shipments. The employee interested in this type of importation must follow the same procedures outlined in paragraph 8(a)(2) above.

c. GASOLINE/CATALYTIC CONVERTERS
The prices of gasoline and alcohol fuel are government influenced. Gasoline is expensive. Currently, more than $US3.00/gal. Alcohol slightly less. The Government of Burkina Faso allows duty-free entry of HHE for all diplomatic personnel for the full length of their assignments. Nondiplomatic personnel receive duty-free entry of effects for up to 6 months after arrival. Duty-free privileges for contractors vary, depending upon agreement reached between the Burkinabe Government and the particular project. Each accredited member of Mission
is allowed one POV duty-free. If a second vehicle (including motorcycles and mopeds) is imported at the owners expense or purchased locally, the vehicle must be registered locally and will not be assigned diplomatic plates. GSO arranges customs clearance for HHE, consumables, and vehicle shipments. No restrictions exist on bringing foreign currency into Burkina Faso. There are no restrictions on shipping alcoholic beverages in your HHE.

3. CONSUMABLES

6. PETS/QUARANTINE

No quarantine is required to enter Burkina Faso. However, pets must be accompanied by an up-to-date rabies vaccination certificate that is at least one week, but not more than one year, old and a veterinary certificate attesting to the good health of your pet issued not more than 5 days before arrival. Dogs and cats are also required to have yearly rabies shots. While Burkina’s rules for pet importation are generally less stringent than many other countries, your pet will almost certainly have to transit Europe to/from Burkina Faso. As a result, Post recommends that you ensure that your pet meets all of the stringent standards for importation into the European Union. If you choose not to follow the European requirements (spelled out in some detail below), you will almost certainly encounter headaches and heartaches trying to get your beloved Fido to/from Burkina. The European Union is implementing a continent-wide set of pet importation regulations that also affect animals that are transiting Paris via CDG airport. If you are transiting Paris, you must get a specific waiver of these regulations. To obtain a waiver, you must fax to the onsite veterinary official at CDG in advance a veterinary certificate attesting to the good health of your pet along with your flight numbers/itinerary. You should obtain your certificate of good health not more than 5 days and not less than 3 days prior to your departure. If your pet’s rabies vaccination is more than one year old, you will also need to update this vaccination no less than 30 days prior to your departure. Fax your certificate and itinerary to: Services vétinaires Roissy CDG, rue du Plican, zone de fret 1, BP10111, 95701 Roissy CDG cedex. Tel: (33)1.48.62.23.22 Fax: (33)1.48.64.69.36 The veterinary official at CDG will fax you confirmation of your waiver. Hand-carry this confirmation (or the fax confirmation sheet indicating that your original fax was successfully transmitted to the CDG veterinary service if you never received a response), along with the original certificate of good health and proof of an up-to-date rabies vaccination, with you when you board the flight. While it is possible that French officials will not insist on seeing this paperwork for hand-carried animals, we strongly advise that you complete all the necessary paperwork in advance of your arrival in Paris. Should your pet be traveling as accompanied baggage, you will need to personally collect your pet upon arrival in Paris and then recheck your pet prior to your departure. We strongly advise anyone traveling with pets not to schedule any extended layover in Paris, as you may be forced to demonstrate compliance with the full set of pet importation requirements. While the shipment of pets is not reimbursable by government agencies, it may be tax-deductible as a moving expense. When shipping pets, start to plan early as many airlines now have embargoes on shipping animals during hot summer months. Please advise GSO ahead of time if you intend to ship a pet. Veterinary services are available in Ouagadougou, but they are not up to western standards. You are encouraged to bring with you or ship any medications or treatments, as well as specialized food, your pet may need.
7. PRIVATELY OWNED FIREARMS (POF)

You must request permission from the Ambassador to bring personal firearms to post. The Burkina government restricts ownership of 9mm firearms, and firearm permits are expensive. If you intend to ship personal firearms please send all pertinent information (weapons technical characteristics, copies of purchase documents and copy of your diplomatic passport data page, etc) to GSO, well in advance of your arrival. Under no circumstances should weapons be placed in your accompanied baggage.

d. UNACCOMPANIED BAGGAGE

2. CUSTOMS CLEARANCE PROCEDURES, REQUIREMENTS, AND RESTRICTIONS
a. ROUTING TO CAMBODIA: The fastest route for sea freight is via Singapore and airfreight is via Doha or Hong Kong. There is no size limitation at post for air shipments. However, due to previous experience, post suggests that the shipper should check with the Airlines for size restriction because at some transit points, some airlines use small aircraft to fly to Phnom Penh so some larger shipments cannot be loaded from those transit points to Phnom Penh at all. Post recommends using Cathay Pacific and Qatar Airlines for large or heavy shipments. Using Cathay Pacific Airline, the shipment will transit via Hong Kong and be loaded on the Dragonair flight to Phnom Penh. Qatar shipments will travel directly from Doha. DO NOT send HHG, POV, or CONS (Consummable) shipments through Vietnam. The port of discharge and port of delivery is Sihanoukville. The Embassy will arrange onward movement from Sihanoukville to Phnom Penh. (CH 15-MAR-2016 SDDC-PAC RB)

b. FOR CUSTOMS CLEARANCES: The Ministry concerned requires a complete and legible inventory list, declared value of household goods, unaccompanied baggage, privately owned vehicle and consumables and the telex-released bill of lading for surface shipments. The OTO carrier must ensure the airway bills and ocean bills of lading shows: American Embassy, Phnom Penh, Cambodia, (name of owner) so the owner can be easily identified. When completed, send one copy of each document to post as soon as possible. Failure to provide documents will result in customs clearance delays. Packing list and a declaration of the value for your shipments are important.

c. DOCUMENTATION: Please send the telex-released bill of lading and packing list and all documentation concerning transportation as soon as possible by email to: GSO_Phnom_Penh@state.gov. Lack of these documents will result in clearance delays. Due to lengthy customs clearance process in Cambodia, Post recommends personnel to ship UB six to eight weeks prior to arrival, and HHG and POV from two to three months prior to their scheduled arrival at Post. (see storage in para 13).

d. MARKINGS: Household goods, unaccompanied baggage and privately owned vehicles to Phnom Penh are to be marked as follows: AMERICAN EMBASSY Owners Name #1, Street 96 Sangkat Wat Phnom Khan Daun Penh Phnom Penh, Cambodia Phone-855-23-728000 (CH 15-MAR-2016 SDDC-PAC RB)

Household Goods Documentation: All manifests, bills of lading, and other pertinent invoices covering household goods and POVs destined into Chile must be in the individual full name, activity consigned to, i.e., USMILGP, DAO, IAGS, etc. No initials may be used in preparation of the PPGBL. Due to new Chilean customs legislation, shipments cannot remain in customs awaiting clearance for more than 60 days. After this period items are auctioned off. Therefore, personal property may be shipped from previous post prior to employee apos arrival in Chile, but should be timed so that the property arrives shortly after the employee arrival. However, it is imperative that the Employee forward to the Embassy a copy of the passport and a copy of the packing list for the goods, so that it can commence the customs clearance process while the goods are in bonded storage. Otherwise the clearance process can only begin after the employee arrives.

6. PETS/QUARANTINE

a. Pets may be imported into Chile only after they receive vaccination against rabies between 30 days and 12 months before entry into Chile. A veterinarian health certificate must be issued no more than seven days prior to the pet entry into Chile. This certificate should state that the animal is clinically healthy, has been vaccinated for rabies and has no contagious diseases. For personnel coming from a country other than the U.S., an exportation certificate must be obtained from that country animal health department and subsequently legalized by the Chilean Embassy or Consulate in that country (or region). b. For personnel coming from the United States, the veterinarian health certificate should be approved by U.S. Department of Agriculture APHIS (Animal Plant Health Inspection Service), which will provide an exportation certificate. In this case, legalization by a Chilean consulate is not required. The nearest APHIS office to Washington, D.C. is in Annapolis, Md. and the certificate costs four dollars. Personnel importing a pet other than cats or dogs should contact GSO for information well before shipping.

7. PRIVATELY OWNED FIREARMS (POF)

Prior approval of the overseas command is required for shipment of privately owned weapons. The Embassy Regional Security Officer must approve importation of weapons (limited to those for sporting use.) To obtain approval, a message cable must be sent to the following GENSER address: AMEMBASSY SANTIAGO RSO. To ensure request is received, e-mail message cable to Santiago-RSO@state.gov and Santiago-MIL-CC@state.gov. The Chilean Ministry of Defense also must approve importation of weapons; the Embassy can help to facilitate this. Approved privately-owned weapons may be included in the employee's UAB when entering Chile, but not when departing Chile.

Model year up to 5 years are acceptable

a. POVs (includes data on prohibited vehicles, colors, etc.)

1.) US Embassy, Santiago will not accept HHG, UAB or POV shipments arriving by US Military Aircraft (CODE T shipment). 2) PERSONALLY-OWNED VEHICLES (AUTOMOBILES): Please see Embassy Management Notice 2010-061, Subject: Procedures for Importing, Purchasing or Selling a New or Used Vehicle in Chile, for additional information.; It is absolutely essential that employees assigned to Santiago consult with Post management or GSO Shipping before shipping a personally-owned automobile (POV) to Chile. Eligible employees (Diplomatic and A T personnel) have two options under which automobiles may be imported:--Temporary Import Permit: The temporary import permit allows the importation of all model year vehicles. The limitation (see below) governing model years does not apply to vehicles imported under a temporary import permit. The temporary import permit must be renewed annually and prohibits the employee from selling the automobile in Chile. The cost of the renewal permit is approximately $200 USD. Please note that the initial entry permit cost is covered by your travel orders but subsequent permits are the owner’s responsibility. The employee must export the vehicle upon departure from Post. There are no exceptions. The temporary import permit must be renewed every year. Post will assist and process Temporary Import Permit renewals, at the vehicle owner’s expense. The process to obtain a TIP and diplomatic license plates takes about 45 days because pre-approvals from the MFA and Customs are not required. Additionally, a safety and emissions inspection is not necessary because the vehicle, as considered by the GOC, is temporarily imported and must be shipped upon the departure of the employee. --In-Bond Status Import Permit: This option allows the sale of the vehicle prior to final departure from Chile. To import an automobile (POV) under in-bond status, the vehicle must be a current year model or a next year model automobile upon the vehicles arrival in country. (Thus, if an employees automobile arrives in country between January and December 2010, it must be a 2010 or 2011 year model.) According to recent Chilean Government POV Import Policy, A T staff cannot import a new car valued at over $30,000 USD. IMPORTANT: New model vehicles will have to undergo a Homology test (safety and emissions check) at a local testing site. The cost of the test (approx. $300 $700 USD) depends on the make and model of the POV and is the owner’s responsibility. Also, a vehicle imported under this method may take up to 110 days to obtain the final import permit and diplomatic license plates because the employee must obtain a Chilean ID card (RUT) and GSO must receive several clearances from the MFA, Customs, and the Ministry of Transportation. PERSONALLY-OWNED VEHICLES (MOTORCYCLES, SCOOTERS, MOPEDS AND OTHER VEHICLES): The age model year restriction strictly applies to motorcycles, scooters, mopeds and other two or three-wheel vehicles. (Even if the vehicle is available in the Chilean market, an additional and very costly Homological testing, at POV owner’s expense, may be required prior to clearance of late model automobiles, motorcycles and other similar vehicles.) The Government of Chile will not grant waivers to any vehicles that do not meet this strict age model year requirement. Non-complying vehicles will not be cleared and will be shipped back to the point of origin, at the employee expense, if the additional expense is not contemplated in the travel orders. Given the strictness of the rules which govern the importation of POVs to Chile, it is absolutely essential that employees contact GSO Shipping as soon as possible following their assignment to Santiago. PERSONALLY-OWNED VEHICLES (POVs), IMPORTANT: Prior to shipping any vehicle, employees must submit to Post the following complete information, of the POV that is intended to be shipped to post: 1) Copy of the Title 2) PCS Orders 3) Copy of the Bill of Sale 4) Make and Model 5) Model year 6) Color 7) Vehicle Identification Number (VIN) 8) Engine number (normally located
on the Engine Block) 9) Number of doors (a rear hatchback on a van or SUV is considered a door) 10) Gross weight in kilos 11) Number of cylinders 12) Number of valves 13) Number of seats 14) Type of gas (leaded or unleaded) The vehicle title documents must show the employee name, as owner (not spouse). If the vehicle is registered to both employee and spouse, please advise GSO Shipping. Under no circumstances should any vehicle be shipped prior to receiving formal clearance from GSO Shipping. As pointed out above, if shipment of a personally-owned automobile is contemplated, please advise Post which import option you wish to exercise. (a) Be prepared to wait an extended period for your vehicle to clear Chilean import procedures. In short, assuming that everything runs smoothly, the vehicle meets all the requirements, all documents are correct and were promptly submitted to GSO Shipping, in addition to the time it takes to complete the employee accreditation, followed by time taken for the vehicle delivery to the shipping dispatch agent at origin, booking space on a ship and MFA issuance of pre-approval and final import authorization, the employee can estimate to be driving his/her POV between 16-24 weeks after the arrival of the employee in Santiago and submission of all correct POV documentation to GSO Shipping. Please note that even this lengthy wait may be a best case scenario. Vacation periods and holidays, lack or incomplete submission of requested information documents, or even the slightest deviation from GOC documentation or procedure will slow down the Chilean clearance and approval process considerably. (b) To import an automobile into Chile, it must be equipped with a catalytic converter, stop brake light on the upper back part of the vehicle, in addition to meeting international safety and emissions standards. Unleaded gasoline and Diesel are readily available throughout Chile. The GOC restricts the duty free importation of privately owned automobiles to Diplomatic and AT personnel. (c) If you elect to exercise the in-bond status import permit option (para. 15 above) or the local purchase option (para. 16d below), note that the GOC imposes duties and taxes upon sale of imported duty-free POVs at the end of an employee tour. As a result, you should anticipate that the resale value of your imported duty-free vehicle at the end of the tour will be less than what it will be in the U.S. Imported vehicles that are not common to the Chilean market may be difficult to sell locally. (d) Given the rules governing the importation of POVs and the lengthy process required prior to receiving and driving the vehicle, a fair number of employees opt to purchase a used or new car in Chile. The Post weekly newsletter, Santiago Scene, often contains advertisements for used cars for sale, especially during the mid-year transfer season. In addition, employees may also consider purchasing a new duty-free vehicle from a local dealer. Prices of new cars in the local market are somewhat higher than those bought in the U.S., but they retain a better resale value, especially when all applicable taxes have been included in the original purchase price. If the car has been purchased duty-free, you may sell the vehicle in the local market at the end of your tour provided that the pro-rated amount as determined by the GOC of the previously waived value added tax is paid by either seller or purchaser. If the sale is made to a person with diplomatic privileges, this tax will not be waived. In order to purchase a vehicle in the local market, new or used, the employee must have completed the accreditation process and have the Chilean ID (RUT) in his/her possession. Keep in mind that locally purchased vehicles cannot be imported into the US, because they do not meet U.S. safety and emissions standards. As a result, we strongly recommend selling your locally purchased POV, prior to your final departure from post. Purchasing a vehicle in the local market also has its risks, especially when purchasing a POV from an unknown or unreliable source. Before the buyer completes the purchase of the vehicle, the employee should obtain the vehicle background certificate, which can be purchased from a nearby municipality office. The certificate will show if the vehicle has a lien or any outstanding traffic or parking violations. Unfortunately, municipalities are not bound to promptly register such infractions, hence you may be obtaining an inaccurate certificate and the new owner would be responsible for any outstanding
tickets incurred up to four years, prior to the date when you purchase the vehicle. As a result, post recommends purchasing new vehicles or used vehicles from a reliable source. (e) If you decide to ship your POV (automobile) to Chile, Post recommends you ship only vehicles already available on the local market so that, service and parts will not a problem. Post strongly discourages employees from shipping unique automobiles including biofuel-only and hybrid vehicles, except for the Honda Civic Hybrid, which is, currently, the only vehicle of its kind available in Chile.

b. MOTOR CYCLES/MOPEDS

The Government of Chile considers motorcycles to be motor vehicles. (Current-model-year stipulation of para 8(1) applies for motorcycles as well as cars.) Thus, if the employee is in status and importing a car, or in diplomatic status and importing two cars, he or she may not also import a motorcycle. Contact Embassy GSO Shipping @ 011-56-2-330-3338.

c. GASOLINE/CATALYTIC CONVERTERS

No restrictions identified.

d. INSURANCE AND SAFETY REQUIREMENTS

AUTO INSURANCE: By Chilean law, all vehicles must have basic, mandatory liability insurance (cost is approx. USD 15 annually). Since the coverage provided by this policy is negligible for damage to other vehicles, public property or medical costs for other parties injured in an accident, all USG personnel must carry additional third party liability insurance. Additional local liability insurance against damage injury to others costs about USD 200 a year from a local insurance company. Two widely used U.S. firms that can also provide this coverage are Clements and Co. (Washington D.C.) and Harry J. Jannette Jr. (Dallas, TX). Many employees also buy collision theft comprehensive coverage from those companies. Please note that USAA does not write automobile insurance coverage in Chile. Post would be glad to provide information on the process of obtaining supplemental local automobile insurance coverage.

Personnel contemplating retirement, separation or relocating dependents to Chile should be counseled that all customs entry requirements to include payment of duties and taxes remain the responsibility of the member and is a personal matter between the member and the Government of Chile.

13. OTHER

a. WEATHER: In Santiago (the capital), the June-September winter season is cold and rainy; the temperature rarely drops to freezing but dampness and fog give the cold air a penetrating quality. Be aware the climates of other areas in Chile differ greatly from the capital. The Great Northern Desert, constituting one-fourth of the country, is one of the driest and most barren areas on earth. The Archipelago South of Puerto Montt, with its forested fjords and glaciers, bears resemblance to Southern Alaska. b. POLLUTION: All areas of Santiago are affected by a high index of pollution which appears as a heavy smog in the winter and dust in the summer. Pollution levels rise to unacceptable levels (PM-10 levels of 240 MCG. M3) on an average of five to six times per year. The major health effects include difficulties with breathing, respirator problems and aggravation of existing respiratory, cardiovascular, allergic and asthmatic diseases. This is particularly true for the elderly and children, and those with confirmed asthmatic and allergic symptoms. The most severe pollution occurs during the months of May to October. c. HOUSING: (1) Embassy houses and apartments have 24-hour roving security patrol and, in most cases, secure off-street parking. They are in an area convenient for shipping, restaurants, etc., and within walking distance of the Embassy. (2) Most USG-leased or owned houses in Santiago are located in eastern suburbs that are reasonable close to the two international schools most often selected by Mission personnel for their
children. Houses may have swimming pools and most have lawns gardens; it is the occupant responsibility to maintain both. Professional pool maintenance costs approximately USD 60 or more per month (depending on the exchange rate. If you are assigned to a house with a pool and intend to maintain it yourself, bring vacuum house and equipment, brushes, etc. These items are more expensive in Chile. Pool chemicals are hazardous materials and may not be shipped in HHE. Gardening services are available, but they too can be expensive (USD 100 per month.) If you choose to do your own gardening, consider shipping a lawnmower and garden tools to Post to avoid the high cost of purchasing these items in Santiago; Post does not provide them.

The member will be sent a detailed “POV Handbook” which provides comprehensive instructions and guidance on every aspect of owning, registering, shipping and insuring your POV in Colombia. Additionally, US Transportation Command (USTRANSCOM) has put together a comprehensive “Shipping your POV” guide as attachment K3 in the Defense Transportation Regulation (DTR) Part IV Personal Property found here: http://www.ustranscom.mil/dtr/part-iv/dtr_part_iv_app_k_3.pdf. The Member will need to turn in all required documents to the VPC transportation personnel to avoid shipping delays. It is recommended that each Member review all required documents in the SCO Colombia POV Handbook and contact them directly using the POC information below as you navigate the process. hired local contractor will provide transportation of containerized POV from the Port of Matadi to the city of Kinshasa. Ship to Port of Matadi, Democratic Republic of the Congo. Forward original bill of lading and any documentation to (member) c/o USDAO Kinshasa, APO AE 09828-0006.

6. PETS/QUARANTINE

No difficulties exist in importing a dog or cat into Congo as long as the inoculation and a certificate of good health stating the animal is free from ticks and has not been exposed to contagious diseases. The rabies certificate must state that the pet has been vaccinated against rabies with an inactivated vaccine for more than one month and less than 12 months before departure. This certificate must be issued not more than 10 days before departure. You should bring duplicate copies of these documents in case a copy is misplaced. Please check carefully with the airline several weeks before your pet’s departure for Kinshasa. New rules apply to pets arriving at or transiting European Community airports that require advance preparation, including an implanted microchip identifier, and possibly blood tests. Please be aware that Avian Flu restrictions in most European countries have made it impossible to import or re-export birds from the DRC, even with all the necessary documentation. Please advise post if you are bringing an animal.

a. POVs (includes data on prohibited vehicles, colors, etc.)

GDRC regulations DO NOT allow the importation of vehicles over ten years old from the date of manufacture to the date of customs clearance in the DRC. We strongly caution personnel, therefore, about shipping a POV that is close to the 10 year mark since a delay in shipping could result in the vehicle reaching the 10 year age limit before it clears customs which means that the GDRC could require you to ship the vehicle out of the DRC at your own expense. So please plan accordingly as shipping and clearing times are long and delays are not uncommon. The lack of adequate and safe public transportation means that every effort is made by the embassy to clear POVs and turn them over to the owners as quickly as possible, but the process can take 5 weeks or more.

Since it takes approximately five weeks to receive your vehicle after it arrives, you may want to make sure that your automobile insurance will cover your vehicle from the time it arrives until you can arrange for the required local insurance. In order to begin exoneration and customs clearance processes when you arrive at post, please bring with you copies of titles or other documents attesting to the make and model, year, chassis number, weight, and value of vehicle being shipped to post.

Importation of all pets is strictly controlled by the Ministry of Public Health. Persons planning to bring a pet should notify the Embassy well in advance so necessary preparations can be completed. Entry permits must be obtained before their arrival in Costa Rica. The following information must be submitted to the Embassy (GSO) prior to arrival of the pet: Species, color, age, name, sex, date of arrival, and means of transportation. To preclude quarantine by the Costa Rican Government, the following documents, certified by a Costa Rican Consul prior to the pet's departure, must be forwarded to the US Embassy (GSO) and a copy of each must accompany the pet:  
(a) Original copy Certificate of good health.  
(b) Original copy Certificate of recent anti-rabies vaccination and no rabies has existed in the area for the past 5 years. Distemper, hepatitis, and leptospirosis vaccination certificates are also required.  
(c) Original copy Certificate stating the pet is free of Taenia Equinococcus.

7. PRIVATELY OWNED FIREARMS (POF)

Personnel transferring to Costa Rica must request authority to import any firearms ASAP after notification of assignment instructions. Address request to the US Embassy, San Jose, Costa Rica, APO AA 34020, ATTN: Admin Officer. All requests will include at a minimum: make, model, serial number, caliber or gauge, and number of shipper's passport. The Costa Rican Government limits importation of one firearm per individual over 18 years per family unit. However, in certain instances, exemption may be obtained for a limited number of additional firearms. All firearms must be registered with the Government of Costa Rica. Firearms must be listed on packing lists or other shipping document. The Embassy limits firearms to be imported by its staff to not more than the following:

US Embassy allows only one duty free automobile in country. POVs can be sold duty free after 2 years with approval of US Embassy. Specific and up to date information should be obtained from the sponsoring country prior to shipment of POV. We recommend POV's be shipped to Pt. Limon where US Embassy San Jose will arrange for pick-up at the port. They have a contractor to effect these duties that is less expensive than inland truckage. (2) If clarification is needed on procedures for shipping a POV to Costa Rica, you may contact the US Embassy Customs Officer at 506-220-3939, EXT 2397. 8. PRIVATELY OWNED VEHICLES (POVs)

a. POVs (includes data on prohibited vehicles, colors, etc.)

The Czech Republic places some limitations on the importation of automobiles. A car can be imported into the country without being registered in the Czech Republic by making sure that the vehicle continues to be registered and properly insured (green card is needed) in a foreign country and maintains that country's license plates. If a vehicle needs to be registered in the Czech Republic, as is customary for DoD personnel, a car cannot be more than 8 years old when it is imported. It is the owners responsibility to prove that the vehicle meets the EURO II emission standard. This can be problematic for a US-MADE CAR. A US-MANUFACTURED VEHICLE MAY NEED TO BE TESTED. If the technical inspection service does not find an identical engine in their computer database, a test must be conducted to see if it meets the standard. This test can cost as much as CZK 9,000. There may be a minimal charge for vehicles whose engine data is already stored in the lab's computer. If a vehicle does not meet the EURO II standard, then NO waiver may be granted and vehicles may not be registered. CONTACT SPONSOR FOR FURTHER INFORMATION ABOUT REGISTRATION AND DRIVING YOU POV.

b. MOTOR CYCLES/MOPEDS

Motorcycles/mopeds can be shipped in personal property. They are not considered POVs and can be imported duty free.

c. GASOLINE/CATALYTIC CONVERTERS

Vehicles must meet at least the EURO II emission standard. Please not that no waiver for emissions can be granted at all!

d. INSURANCE AND SAFETY REQUIREMENTS

Vehicles not registered in the Czech must carry liability insurance. If the owner does not have a green card (proof of liability insurance) when registering the car and operating it within the Czech Republic, the owner must purchase a valid liability insurance policy from a licensed insurance vendor. The liability insurance that is customary only covers damage incurred in the Czech Republic. Premium rate for liability insurance currently costs CK 4,700 month. Vehicles registered in the Czech Republic and driving with Czech license plates must purchase liability insurance through local company. CONTACT SPONSOR FOR FURTHER INFORMATION ABOUT LIABILITY INSURANCE.

Persons planning to bring pets with them to Denmark should notify Judy Eriksson in the GSO Customs & Shipping Office (e-mail: ErikssonJA(at)state.gov) as soon as possible, including information on what type of animal is being brought. Failure to follow the proper procedures for bringing animals into Denmark can result in having the animal returned to its country of origin, or quarantined in a Danish facility, at the employee’s expense. 1. All dogs and cats must have an ISO microchip or tattoo. (Tattoos will be phased out by July 2011). 2. When accompanied by a person, dogs and cats may be brought into Denmark from rabies-free countries, i.e. Iceland, Norway, Sweden, Ireland, United Kingdom, Japan, New Zealand, and Australia. From other "favorable" third countries (i.e. outside the EU), including the United States, dogs and cats older than four months may be brought into Denmark provided they have been vaccinated against rabies not later than 30 days and not earlier than 12 months prior to the import. A health certificate is required for this purpose, demonstrating that the vaccine was administered and showing the date of that occurrence. 3. Dogs and cats between three and four months old must be vaccinated against rabies in the same manner. If less than 30 days have elapsed between the vaccination and the importation, a health certificate issued by a veterinarian is required. The health certificate must be issued not earlier than 10 days before the importation. Dogs and cats less than three months old may be imported without rabies vaccination, but must have a health certificate. When not accompanied by a person, a health examination by a border veterinary officer is needed immediately after arrival. 4. From other third countries (i.e., those not listed in Annex II to EU Regulation 998/2003/EEC) dogs and cats must comply with the requirements mentioned above and, in addition, a test for the rabies antibody level must be made. The requirements are:- Microchip or tattoo - Veterinary certificate or Pet Passport that certifies the requirements - Valid rabies vaccination in accordance with the recommendations of the manufacture of the vaccine - A blood sample testing the rabies antibody level must be drawn at least 30 days after vaccination - The blood sample must be examined by an EU authorized laboratories - The result of the rabies antibody level test must be at least 0.5 IE/ml - The animal cannot enter Denmark (the EU) until three months after the date when the blood sample was taken and only if the result is in accordance with the requirements. 5. Dogs have to be registered in Denmark, so please contact a local veterinarian soon after arrival of your dog. All dogs must have local liability insurance. Judy Eriksson can assist you with an insurance company contact. 6. Entry of other pets is generally subject to permission granted by the Veterinary Directorate. This concerns parrot-like birds, pigeons, rabbits, hares, minks, horses, etc. Application for permission to import these animals must state the address in Denmark for approval for private quarantine. There are no restrictions on the import of tropical birds (except parrot-like birds), hamsters and guinea pigs, but provisions governing endangered species may cover several exotic animals. Persons who are planning to bring pets and are unsure of what procedures need to be followed in advance of their arrival in Denmark should contact Judy
7. PRIVATELY OWNED FIREARMS (POF)

It is the responsibility of each employee to consult with the post report and/or the post management officer to determine the restrictions and limitations, if any, that are placed upon the shipment of personally owned firearms or ammunition into the country of assignment. The post report will include the prescribed procedures that must be complied with under host-country regulations when firearms and ammunition may be imported (see 2 FAM 170). When post reports are not available, the employee, before initiating shipment of firearms or ammunition, must secure in writing authorization and approval from the chief of the diplomatic mission, or designated representative.

8. PRIVATELY OWNED VEHICLES (POVs)
Denmark requires that all vehicles brought into the country meet the following specifications:

a) Parking lights can only be white in color (not yellow), and they cannot also serve as turn indicators.
b) Yellow turn indicators (blinders) are mandatory on the front left and right fenders and have to be visible at an angle of 45 degrees when standing in line with the back of the vehicle.
c) The VIN number has to be stamped into a solid part of the body (firewall, turret, or on the frame).
d) The rear-end turn indicators have to be yellow (not red or white as is sometimes found in US-spec cars).
e) The exhaust pipe must exit from the rear of the vehicle pointing straight backwards or to the left, never out via the right-hand side of the car.
f) Windshield and front-seat windows cannot be tinted with any kind of foil or paint. The rest of the windows can only be tinted to a maximum of 70 percent.

g) When presenting the vehicle for customs clearance, inspection and registration, the original title must be presented. However, please bring along your most recent registration certificate as it might offer additional information which could speed up the registration process. Some U.S. vehicle types are unknown to the Danish Department of Motor Vehicles (DMV). It is therefore important to bring to post documentation showing vehicle specifications such as weight, engine size, horsepower, miles per gallon, load capacity, etc., as non-availability of this information can significantly delay the registration process. If you have questions about this issue or any other concerning motor vehicles, please contact the GSO before you ship your vehicle.

**a. POVs (includes data on prohibited vehicles, colors, etc.)**

Commercial bills of lading should show Copenhagen, Denmark, as final POD even if transshipment at European continental or Danish port is involved; include sponsor's name, SSN, and ultimate duty station to ensure proper placement of shipment. POVs can be shipped unboxed. Difficulties and high costs are often encountered in modifying POVs to meet stringent Danish safety requirements. Customs entry of HHG and POVs of nondiplomatic staff members must be made within validity of funds cited on member's orders. Enlisted personnel or nondiplomatic personnel should be briefed on the following POV restrictions: applicable import and custom tax will have to be paid by enlisted or nondiplomatic personnel on all new vehicles purchased in Denmark. There are two instances under which these persons may import automobiles without payment of customs and tax (both instances apply to their original assignment to Denmark): (1) The owner was in legal and physical possession of the automobile prior to his initial entry into Denmark. (2) On subsequent assignments to Denmark, the owner must have resided outside of Denmark for not less than 1 year and the vehicle must have been registered abroad in the owner's name for not less than 6 months prior to member's return date into Denmark and must have been used by member in the country of residence during those 6 months. Officers with diplomatic privileges including diplomatic titles and diplomatic passports may import and register automobiles in Denmark at any time without payment of tax and duty. Shipment of automobiles should be made to the Transportation Officer, US Embassy Copenhagen, Denmark. Marked for the owner and the section of the Embassy to which the owner is assigned (i.e., Army Attache or MAAC). (3) For POVs shipped to Aarhus, Denmark, the following statement must be included in the remarks section of the PCS orders: "Please charge all local POV expenses (storage/container/transport fees) to the PCs fund cite code." If this statement is not included, then POVs must be shipped to Bremerhaven, Germany.

b. The following applies to Retirees and NON-Embassy Assigned Personnel: (1) All shipments (POV and HHG) should be consigned (shipped) to the member at a local Dominican address. The US Embassy does not have a transportation office that services retirees. The USMAAG Logistics NCO can provide a courtesy letter addressed to the Dominican Customs Director indicating that the retiree is a Dominican citizen returning to reside in the Dominican Republic and any assistance that can be provided is greatly appreciated. A power of attorney is required if a person other than the member is to receive the POV. Retirees must also ensure they know Dominican law with respect to Dominican citizens returning from the United States to permanently reside in the Dominican Republic. This information can be obtained through the Dominican Embassy in Washington, DC or Dominican Consulates in the US. (2) The original Bill of Lading must be mailed to: USMAAG/DOMINICAN REPUBLIC, UNIT 5539, APO 34041. Original BL must show name of owner, VIN and/or engine number, make, model, year, and color. (3) POV/HHG Dominican taxes are high. If you have owned the POV for less than a year, the assessed taxes are even higher. c. The following applies to both US Embassy Assigned Personnel, Non-Embassy Assigned Personnel, and Retirees: MOTOR VEHICLES In order to import a vehicle to the Dominican Republic there are some details to take into consideration: *The GODR waives the five (5) years old restriction to the vehicle (one only) to diplomats coming to the Dominican Republic; therefore post can only clear/register One (1) vehicle for each Mission’s Member in the Dominican Republic. *The vehicle should be in good condition physical and
internally. *There is only unleaded gas in the D.R. *There are limits on the value of your vehicle (See your welcome to Santo Domingo cable for details) Your vehicle can arrive before you do (within 30 days). So it can be sent ahead of time and it will be cleared from customs once you get to post. Motorcycles, scooters and jet-skis including trailers are considered vehicles here and since 2nd POV is not exempt, you can import them as part of your HHE allowance understanding that all restrictions apply (including but not limited to the 5 year old restriction), but they do not apply for tax/duty exonerations and taxes are @ 50% of the depreciated value. Before shipping those to post, employee should provide written statement that taxes/duties and registration fees are going to be covered by them; otherwise motorcycles, scooters and jet-skis as well as trailers will not be allowed into the country and you’ll have to reship them on your own. The Customs and Shipping Section needs the following documentation in order to release your vehicle from customs -Copy of the Title or Copy of Certificate of Origin -Copy of the Bill of Sale or any invoice stating how much was your POV purchased for. -Copy of the front page of your passport. Those can be scanned and sent to us by e-mail to santodomingoshipping@state.gov. The Dominican Republic requires by law that your vehicle be locally insured by third party liability, it can be purchase locally or through an American company. You need to provide proof of insurance to GSO/Cs before your vehicle is delivered to you.

US military members returning to retire in the Dominican Republic are treated as returning Dominican citizens and are subject to all local laws and taxes.  They will be required to personally work with the assigned HHG Dominican moving company.  c. d. AFTER SUBMISSION OF REQUIRED DOCUMENTS TO DOS, PLACE THE DPS SHIPMENT RECORD IN A "CANCELLED" STATUS.

b. CONTAINER/CRATING REQUIREMENTS

Due to multiple airlines and aircraft involved in the shipment of personal effects, the boxes must be no larger than the dimensions acceptable by the smallest cargo plane. Boxes should be no more than 205 cm long, 145 cm wide, and 155 cm high. In the past, boxes have been broken down to meet these requirements, with resultant delay of delivery and loss of items.

c. HARD LIFT AREA

Ethiopia is designated as a hard lift area for all service members. All HHG/UB shipments are sent via commercial air. There is no scheduled AMC access to Ethiopia. All shipments should be routed through London, UK or Frankfurt, Germany, as these are the only European airports with service to Addis Ababa.

d. UNACCOMPANIED BAGGAGE
2. CUSTOMS CLEARANCE PROCEDURES, REQUIREMENTS, AND RESTRICTIONS

a. Personnel on the Diplomatic list (Attaches) are eligible for the exemption of customs and excise tax for their entire tour. Staff members (Administrative and Technical Staff members, non-Attaches) are only entitled to duty-free entry for the first six months of their tour. Shipment of personal property and POV must be scheduled to arrive in Ethiopia within the first six months.  
b. Customs clearance is handled by the General Service Office (GSO) at the Embassy. In order to track shipments, initiate customs clearance, and ensure the promptest delivery of the containers to the Embassy, the member must provide the GSO with the airway bill number of the shipment prior to arrival (either by telegraphic means or by FAX). Additional information needed by the GSO is; number of pieces, weight, packing list, and flight number (if known by member).

d. FOOD STUFFS AND MEATS

e. MEDICAL (NARCOTICS)/PHARMACEUTICAL PRODUCTS

This includes beds, dressers, couches, reclining chairs, coffee tables, entertainment centers, dining room tables, all major appliances, and microwave ovens. Upon arrival, a welcome kit is provided to be turned back in to GSO upon arrival of HHG/UB shipments. The kit includes linen, towels, dishes, and pots/pans. Voltage in Ethiopia is 240 volt 50 megahertz and is subject to extreme fluctuations and frequent power outages. Transformers are provided.

6. PETS/QUARANTINE

Currently, Ethiopian customs regulations governing the importation of pets are not stringent. However, regulations in Ethiopia change with little or no advance notice. Therefore, individuals wishing to ship a pet should contact the General Services Office immediately upon notification of assignment. Pertinent information needed includes: country where pet will be shipped from, type of pet, sex, age, and record of inoculations.

Importation of privately-owned firearms is prohibited (applies to Diplomatic Staff and to Administrative and Technical Staff).

a. HAND GUNS

d. OTHER (i.e. AMMO, EXPLOSIVES, ETC)

8. PRIVATELY OWNED VEHICLES (POVs)

No restrictions identified.

a. POVs (includes data on prohibited vehicles, colors, etc.)

(1) The Ethiopian Government's policy is one duty-free imported vehicle per member (applies to Diplomatic Staff and to Administrative and Technical Staff). POV's of Administrative and Technical Staff personnel are entitled to duty-free entry within the first six (6) months of the member's arrival. POV's may only be sold within the last six (6) months of the member's tour (applies to Diplomatic Staff and to Administrative and Technical Staff). (2) All vehicles must be contracted with the Port of Djibouti. Djibouti is the transshipment point. The Port of Asseb, Eritrea has proven unreliable as a transshipment point (long delays in processing, overland transshipment-with damage to vehicles, and demurrage fees for the delay in shipment). Shipping time varies between 6-8 months. (3) The American Embassy in Addis Ababa, Ethiopia, recommends members on a 1-year rotation to Ethiopia be restricted from shipping a POV to this country. Due to the fact the average shipping time from CONUS is 6-8 months, and the cost is $16,000 per vehicle. Shortly after arrival, the vehicle must be processed for return to CONUS. Members assigned to Ethiopia for a 1-year rotation will be authorized storage of their POV under the provisions of Paragraph US805, Joint Federal Travel Regulation (JFTR), Volume I for the duration of their assignment. (4) All vehicles must be containerized for transport via ship. POV should be consigned to American Embassy, Addis Ababa, Ethiopia (marked with members name and SSN). The original bill of lading must be forwarded to the General Services Officer, American Embassy, PO Box 1014 Entoto St., Addis Ababa, Ethiopia by express courier service. It is essential the original bill of lading be received by the GSO prior to the vehicle's arrival in the port of Djibouti. This enables their GSO to expedite the follow-on shipment of the vehicle to Addis Ababa, via rail, and submit the required application to the Ethiopian Ministry of Foreign Affairs for duty-free entry, and to prepare the necessary customs clearance documents. (5) Telegraphic advice must be forwarded to post providing engine number, chassis number (VIN), engine capacity, value of vehicle, color or vehicle, weight of vehicle, and maximum number of passengers.

b. MOTOR CYCLES/MOPEDS

No restrictions identified.

c. GASOLINE/CATALYTIC CONVERTERS

2. CUSTOMS CLEARANCE PROCEDURES, REQUIREMENTS, AND RESTRICTIONS

a. Personnel MUST be in country and present a valid diplomatic or official passport to receive their household goods and unaccompanied baggage shipment. Because you must personally be in country to sign necessary documentation and receive diplomatic accreditation, your shipments (UB, HHG and Consummables) cannot arrive to Post nor be cleared through Fiji customs prior to your arrival. Please plan to be in country for 2-3 months without your personal effects, including UB. If you will not arrive for several months, your shipment should be consigned to the U.S. Despatch Agent in Seattle, WA with instructions to hold your shipment in temporary storage until after your arrival in Suva. If you have any questions, please send your inquiry to the GSO Suva Mailbox at GSO_Suva@state.gov. The Government of the Republic of Fiji (GORF) will not release household goods or unaccompanied baggage shipment until member is present to sign all required documents. HHG and UB shipments should be scheduled to arrive as close as possible to members arrival date in Fiji. Firearms, pornographic materials, drugs, knives, untreated/unpolished/unvarnished cane furniture, certain dried fruits, certain nuts, meats, eggs, and dairy products and by-products, are all subject to import restrictions. Pet foods/treats may also be confiscated. The GORF Agriculture Department requires animal skins, rugs, and feathers be dry cleaned and fumigated before shipping to Fiji. A receipt/certificate showing fumigation this has been done will facilitate entry of these items. A Quarantine Officer will be present during the delivery/unpacking of your shipment(s). Ensure outdoor gear and sporting equipment is shipped clean of dirt and debris. The Quarantine Officer will watch for restricted items and any indication of insects in your shipment; if they are found, items may be sent for fumigation (at your expense) or in some cases confiscated. For up-to-date information on import restrictions, please check the following Biosecurity Authority of Fiji websites:-----For plant products: http://www.baf.com.fj/cooperations/plant-and-plant-products-----For animal products: http://www.baf.com.fj/cooperations/animals-and-animal-products

b. Failure to comply with these packing instructions can result in considerable shipping delays because the shipment will have to be re-crated in order to be surface freighted to Suva. Fiji law requires that all inbound shipments for fourth schedule diplomatic personnel pass through customs within six months of the customers arrival in country; this includes any supplemental HHG/Consummable shipments an customer may be authorized by State or their employing agency. Third schedule diplomatic personnel are exempt from this six month limit. Please check with Post’s HR department to determine whether you will be listed as a third or fourth schedule officer. Due to geography, local customs restrictions and shipping delays, customers will experience a lengthy wait for delivery of their personal effects (UB,HHG, CONS, and POV). The usual time for effects coming from the U.S. is 2-3 months. However, shipments coming from Europe or from Africa can take 4 months or longer. Occasionally, even airfreight (UB) may be quite delayed. Post GSO supplies a Welcome Kit to new arrivals pending receipt of their personal effects. The kit includes commonly needed items such as bedding, towels, pots, pans, dishes, flatware, kitchen utensils, a TV, and vacuum cleaner. You are required to return all of the welcome kit items to GSO Supply two weeks after receiving your HHG. You will not be allowed to keep nor borrow any welcome kit items after the receipt of your HHG. For singles and couples, we provide dishes and flatware for four people; for larger families, we provide dishes and flatware for six, eight, or more, depending on family size. You may wish to supplement the kit with such items as games, books, etc. -- all of which can be hand-carried or mailed through the Diplomatic Pouch in advance of your arrival. The following shipping information is keyed to 14 FAM 614.2-Obtaining Information:

3. CONSUMABLES

b. CIGARETTES/TOBACCO PRODUCTS

Cigarettes Tobacco Products will only be allowed after a Third Schedule work permit is issued by the Fiji Ministry of Foreign Affairs after the customer arrives at Post. Issuance of the approved work permit may take up to two weeks. (CH 29-Feb-2016 SDDC-PAC RB)

c. COSMETICS

No restrictions.

d. FOOD STUFFS AND MEATS

Importation of meat and dairy products are prohibited. For further details, visit www.biosecurityfiji.com (CH 29-Feb-2016 SDDC-PAC RB) Also see Paragraph 2 above: CUSTOMS CLEARANCE PROCEDURES, REQUIREMENTS, AND RESTRICTIONS.

e. MEDICAL (NARCOTICS)/PHARMACEUTICAL PRODUCTS

No restrictions on prescription drugs.

4. ELECTRICAL EQUIPMENT

-----U.S. Government-leased residences in Suva are equipped with 220-240v/50HZ electricity. The electrical plug for Fiji is the same as Australia, with a single grounding pin and two flat pins forming an upside down V-shape. A picture of the plug can be viewed at: http://en.wikipedia.org/wiki/AS_3112. If you plan on shipping audio, video and computer equipment, power protection devices are recommended, such as 220-240v power strips and Uninterrupted Power Supply (UPS). Each house is issued three transformers. Be advised that appliances with clocks and timers designed to run on 60HZ electricity will not function properly and similarly motors designed to run on 60HZ may not function well. (CH 05-DEC-2017 TCJ4-HB-PAC RB)

a. HOME COMPUTERS
No restrictions however, recommend use of power protection devices such as 220 volts power strips and universal power sources (UPS). Good quality power strips are not available locally. (CH 05-DEC-2017 TCJ4-HB-PAC RB)

b. TVs/VCRs

No restrictions however, recommend use of power protection devices such as 220 volts power strips and universal power sources (UPS). Good quality power strips are not available locally. (CH 05-DEC-2017 TCJ4-HB-PAC RB)

c. OTHER (i.e. COMPATIBILITY, ETC)

Electric current is 240 volts, 50 cycles. Fiji experiences frequent power fluctuations. Post provides 3 transformers to each household. Good quality transformers are not available locally. (CH 05-DEC-2017 TCJ4-HB-PAC RB)

5. FURNITURE, OVERSIZED

No restriction on shipping furniture. However, Suva provides furnished quarters, therefore shipment of furniture is not necessary. All agencies except SAO are provided furnished houses. All homes are air-conditioned and furnished with standard furniture determined under the post Furniture and Appliance Pool (FAP), including a queen sized bed for the master bedroom, twin beds for the other occupied bedrooms, tables, chairs, desks, night stands, lamps, rugs, and bookshelves. A microwave oven, refrigerator, freezer, transformers, washer and dryer, brush cutter, and dehumidifier are also included. Post does not provide residential gardening equipment. Due to limited warehouse storage space to take back otherwise assigned FAP furnishings, and the potential risk of importing wood-based furniture, incoming customers should consider not bringing significant pieces of personal furniture; said furniture should be stored in Non-Temporary Storage (NTS) at origin.

Some Embassy housing does not come equipped with a dishwasher. If you are not a State Department Employee, be sure to check with your agency to determine if your permanent quarters in Suva will be unfurnished or the level to which it will be furnished. (CH 05-DEC-2017 TCJ4-HB-PAC RB)

6. PETS/QUARANTINE

-----The application/approval process for bringing a pet into Fiji remains lengthy, cumbersome and expensive. It should also be noted moving may be a stressful and emotional experience for pets and owners alike. In some cases it may be impossible. If you wish to import a small animal/s, i.e. dogs and cats, into Fiji, the first step is to review the guidelines and obtain and complete an APPLICATION TO IMPORT LIVE ANIMALS INTO FIJI; this information and paperwork is available at
the Biosecurity Authority of Fiji website: http://www.baf.com.fj/cooperations/animals-and-animal-products. Please contact the CLO at CLOSuva@state.gov for further details as soon as possible and no less than six (6) months prior to your arrival in country. Importation of birds into Fiji is not permitted.-----If the application is approved, a process that may take 21 working days, an Import Permit will be issued together with the conditions of importation and other relevant information detailing required tests, vaccinations, treatments and documentation.-----Quarantine of pets: Only dogs and cats brought in from New Zealand and Australia can enter Fiji with minimum 7-day quarantine. Pets may enter via Hawaii if they meet all Hawaii entry/quarantine requirements. This may or may not include quarantine in Hawaii. Pets entering from Hawaii will be subject to minimum 30 day quarantine in Fiji. Fiji is beginning to allow pets to enter the country directly from the continental United States, but this is a nearly untested route and these requests are reviewed by the Fiji authorities on a case-by-case basis. Again, pets arriving from the CONUS will be subject to minimum 30 day quarantine. In addition, there will be mandatory rabies inspections at your home every ten days for the six months following the 30 day quarantine and inspections every 30 days for the following six months. Home quarantine is not permitted to be substituted for the initial, required 30 day quarantine. Veterinary, testing, vaccination, shipping, import/handling and quarantine fees are the responsibility of the pet owner. -----Travel Bans: Many American carriers and some international airlines have temperature-related travel bans for pets during warm/extremely cold weather periods. Many airlines, both US and international carriers, also prohibit the shipment of certain breeds of dogs; some examples are: American Pit Bull Terrier; American Staffordshire Terrier; Bull Terrier; Doberman Pinscher; and Rottweiler. Additionally some carriers restrict or limit shipments of snub-nosed breeds; some examples are: Boston Terrier, Boxer, English/French Bulldog, King Charles Spaniel, Lhasa Apso, Pug, Shar-Pei, Shih Tzu. Contact airlines directly to confirm specific policies. Be sure to verify with the airline the cost, container specifications, veterinary requirements, and check-in procedures. These requirements can vary between airlines. Also be aware that if there is a change in airlines during travel, the pet owner may need to transfer the pet from one airline to another. The transfer can be a lengthy process.

-----The need to ship a pet via a foreign flag carrier does NOT/NOT exempt customers from the Fly America Act and the requirement to use US Flag Carrier for travel between the United States and Fiji.

7. PRIVATELY OWNED FIREARMS (POF)

IMPORTATION OF ANY/ALL FIREARMS IS PROHIBITED.(CH 05-DEC-2017 TCJ4-HB-PAC RB)

b. RIFLES/SHOT GUNS

See paragraph 7 above.

c. TOY RELATED GUNS

d. OTHER (i.e. AMMO, EXPLOSIVES, ETC)

Importation PROHIBITED.

8. PRIVATELY OWNED VEHICLES (POVs)

POVs should be containerized. GORF allows both 20 ft and 40 ft containers. (CH 05-DEC-2017 TCJ4-HB-PAC RB)

a. POVs (includes data on prohibited vehicles, colors, etc.)

-----Since driving in is on the left side of the road in Fiji, many people find it easier to drive a right-hand drive vehicle while living here. Diplomats may import a left-hand drive vehicle to Fiji. Any vehicle diesel or unleaded, whether right-hand or left-hand drive, more than 5 years old upon importation, will only be allowed in the country if the customer agrees to export the vehicle out of the country at the end of their tour. Vehicles over 5 years old upon importation cannot be sold in Fiji, neither to a diplomat nor a local. The only exception, Fiji Government has extended the age limited for Electric and Hybrid vehicles to less than 8 years (for more information on selling your POV in Fiji, please see below). -----Vehicle Selection: The choice of vehicle for ones POV is a personal decision. Four-wheel drive vehicles are very popular. Both unleaded and diesel fuels are readily available. The resale market for automobiles is generally good. Full-size SUVs offer a good view of the road, higher ground clearance, the ability to wade thru heavy water in the streets during flooding, etc., but they are not absolutely necessary for use in Fiji. Sedans, minivans or mini-SUVs can be adequate for travel.-----Shipping a POV to Post: Be advised the vehicle must be thoroughly and professionally cleaned, including the undercarriage, prior to shipping. In order to register your POV in Fiji, it must be equipped with amber colored turn signal lights and red colored brake lights. Some US vehicles have the brake and turn signal lights as one unit. This lighting system will not pass inspection in Fiji. Information on this requirement and other requirements/restrictions on vehicle equipment/modification that will affect ones ability to register an imported POV are available on the Land Transport Authority of Fiji website www.lta.com.fj. If purchasing a vehicle from Japan, personnel must obtain an appraisal and approval from the Japan Export Vehicle Inspection Center (JEVIC) before shipping the vehicle to Post. The JEVIC appraisal includes proper documentation of vehicle ownership, structural and environmental integrity, and biosecurity contamination tests (radiation). More information can be found at www.jeovic.com. -----US car parts are not readily available in Suva, so Post urges you to make any adaptations to your vehicle prior to its arrival in Fiji. To register your vehicle, Post will need your drivers license, original title, commercial invoice, and proof of de-registration of the vehicle from the vehicles last location. Customers who do not receive full diplomatic privileges (e.g. those customers considered to be administrative and technical staff) will be required to pay between US$200 to US$450 to register the vehicle. The actual amount will depend on the engine size.-----Shipping instructions Please refer to the instructions above regarding sea freight.-----Locally purchased POV customers should be aware if they decide to purchase a vehicle while in Fiji, they have at least two options: (1) they can buy a vehicle on the local market, or (2) they can buy a vehicle from abroad (usually Japan or Singapore) and then import that vehicle into Fiji. The local market for vehicles can be volatile, fluctuating between periods of low demand/high supply and high demand/low supply. Generally, used vehicles on the local market are more expensive than vehicles of similar make, model, age, and condition in the U.S. 
That said, purchasing on the local market can be a more convenient option in many ways, and many officers at post have successfully done so. Vehicles that are purchased from abroad (e.g. from Japan) can be imported duty free as long as they are received in Fiji within 6 months of the customers arrival at Post. All age restrictions mentioned above apply to vehicles imported this way, as do the importation requirements also specified above. -----POV Security: Anti-theft alarms, locking wheel hubs and other anti-theft devices are recommended for POVs. Most street thefts are directed against the contents and accessories of unattended vehicles. -----Selling a vehicle at the end of tour: The sale of all vehicles requires the pre-approval of the Ministry of Foreign Affairs (MFA), Fiji Customs and the Management Officer. Left-hand drive vehicles, less than 5 years old at the time of importation into Fiji, may only be sold to another diplomat and will incur no VAT or duty charges. Left- or right-hand drive vehicles over 5 years old upon importation cannot be sold in Fiji and must be exported out of Fiji at the end of the customers tour. The only exception, Fiji Government has extended the age limited for Electric and Hybrid vehicles to less than 8 years. Vehicles sold on the local market will incur a prorated amount of VAT (currently 9%) and duty, which is calculated depending on the engine size (cc rating), based on 60 months minus the months vehicle used in Fiji. If the vehicle is over 5 years/60 months old at the time of sale, these charges will not apply. The age for duty calculation is taken from the time a vehicle is first registered in Fiji. Upon transfer of ownership 3 percent stamp duty from the sale price of the vehicle is also collected, arrangements between buyer and seller can be made as who will pay for the stamp duty.-----Please note that this Embassy does NOT authorize self-drive of USG vehicles while awaiting arrival of a POV or rent official USG vehicles to newcomers or other mission members. Rental vehicles are locally available but rates tend to be high.(CH 05-DEC-2017 TCJ4-HB-PAC RB)

**b. MOTOR CYCLES/MOPEDS**

Shipment of motorcycles and mopeds are allowed. RSO and GSO caution on the use of motorcycles and mopeds in country due to the poor road conditions in Fiji. They are not conducive for these types of vehicles. Drivers in Fiji are not used to sharing the road with mopeds or motorcycles.(CH 05-DEC-2017 TCJ4-HB-PAC RB)

**c. GASOLINE/CATALYTIC CONVERTERS**

Both leaded and unleaded gasoline is available.

**d. INSURANCE AND SAFETY REQUIREMENTS**

Third party insurance is required and can be obtained locally. The Government of Fiji requires third-party liability insurance for all vehicles. Currently costs range between US$100-US$200 per year and must be purchased locally. The Embassy also recommends that you maintain both collision and comprehensive coverage; both available locally for most vehicles although some imported POVs may be difficult to insure with a local provider. Do not forget to insure your POV for the transit to Post and, if you plan to maintain US based collision and comprehensive coverage, please ensure that your insurance company will provide coverage for your vehicle while in Fiji.(CH 05-DEC-2017 USTCJ4-HB-PAC RB)

One of these requirements is for the completion of a form called a 'Certificat Sanitaire-Annexe 7,' to be completed in French by a veterinarian at the shipping point of origin. Form can be obtained by contacting the Embassy. Since few vets in the USA or in other non-French speaking countries can be expected to read French, GSO/Paris has done an informal translation of the document for you to provide to your vet to enable him/her to understand the questions. Be sure to have the answers completed on the original French form. Dogs and cats entering France are subject to the following regulation:

- Less than 3 months old prohibited.
- A certificate of good health issued between 3 and 5 days before entry into France.

EFFECTIVE 1 JULY 2012: Breathalyzer kits in all motor vehicles, this includes Electrical vehicles are mandatory. Fines begin on November 1st. Check this site www.ethylotest-alcotest.com/ DoD EM Status Vehicle Procedures DoD members not assigned to France in a diplomatic status will be categorized in the Emplois en Mission (EM) status. This includes all PEP personnel and students. The French government has established the following restrictions for importing vehicles.

A. Vehicles over 4 years old (and then every 2 years) are required to have the standard inspection (controle technique). The inspection through a commercial garage costs approximately 85 Euros. If required, there may be some technical maintenance/body work required to pass the inspection requirements. As of August 2010, all non-conforming vehicles (vehicles not manufactured in Europe) will be required to clear a more thorough inspection. The process requires that you get a statement from the manufacturer, also known as the certificate de conformit, reporting all of the modifications required on the vehicle to meet French standards. Depending on the manufacturer, the costs for this report are usually between 100 and 150 Euros. The costs of the modifications could be expensive in both parts and labor. After the modifications are completed, the French Administration, DRIRE, will inspect the vehicle for approval. The cost of this inspection is approximately 70 Euros. The entire process could take up to one year to complete. The final registration for the vehicle will be 75.50 Euros and license plates are 34 Euros.

The Defense Attaché Office strongly discourages PEP personnel, students, or any other non-diplomatically titled personnel PCSing to France from shipping a personal vehicle due to the lengthy, costly and complicated bureaucratic registration process. You should request Non-Temp Vehicle storage Questions may be directed to Jacques Ple at plejm@state.gov or Marc Piffeteau at piffeteauml@state.gov

a. POVs (includes data on prohibited vehicles, colors, etc.)

(2) Members registered on the diplomatic list with at least one dependent (non French) over 18 years old can register two cars in the Diplomatic series. (3) Members on the administrative and technical list can register one vehicle only. (4) Automobiles must be owned by members prior to importation, and a current ownership title and registration certificate (in the name of the employee assigned to France) are required.

b. MOTOR CYCLES/MOPEDS

2. CUSTOMS CLEARANCE PROCEDURES, REQUIREMENTS, AND RESTRICTIONS

Due to a local peculiarity of customs procedures all personal effects and POV's are highly recommended to be scheduled to arrive in Tbilisi after employee's accreditation at the post is completed. Service member/civilian employee must report to the Administrative Assistant immediately upon arrival to start accreditation formalities. It usually takes two weeks to obtain
Diplomatic or Service card issued by MFA of Georgia, a copy of which is strictly required by local customs for shipment clearance. Absence of Diplomatic/Service card causes major difficulties and delays with customs clearance of personal belongings, and delay delivery of property.

Import of medicines/medical supplies into Georgia requires obtaining of license and certificate, or separate permission from the local Ministry of Health, which is difficult to obtain. Recommend medicines be sent through the diplomatic pouch. If diplomatic pouch shipment is impossible, fax to GSO Shipping section a list with detailed description of medicines/medical supplies including manufacturer information, and copy of the commercial invoice with total value of the shipment. Two weeks advance notification is required for medicines/medical supplies destined for the Embassy/USG employees internal use.

8. PRIVATELY OWNED VEHICLES (POVs)

a. POV shipping/alternative transport: Many Americans ship a POV to post. ITGBL shipping has reduced transit time from the United States to just over 45 days (vehicles that transit ELSO may take as long as three months--check with GSO shipping before you ship your vehicle). Roads in Tbilisi have improved recently, but many remain in bad condition, especially outside the capital. Some personnel have sedans. When choosing a vehicle you may wish to bear in mind that driving conditions in Georgia can be somewhat chaotic, creating higher frequency of vehicle accidents. b. European and Japanese vehicles are widely available at prices somewhat higher than in the United States. Some US made cars are also available for purchase. It is also possible to hire a car and driver for approximately $650 a month (though due to inflation these rates are subject to change). Less expensive new and used local (mostly Russian) vehicles, suited to the roads and conditions in Georgia, are also available. c. An increasing number of major
international auto companies are opening local dealerships in Tbilisi. Most repair parts and local dealer mechanics are now available for Audi, BMW, Ford, General Motors (Opel), Honda, Hyundai, KIA, Mercedes-Benz, Mitsubishi, Renault, Toyota, Nissan, Volkswagen, Ford, Jeep, and Volvo. Keep in mind that some models of these manufacturers that are sold in the United States may not be available in Georgia, and parts often have to be imported for them (which could require several weeks). Please ask GSO if you have any questions about a particular model. d. If you decide to ship a POV, you may also want to include some filters, motor oil, belts, wiper blades, and similar parts in your HHE. These are also available locally, but generally at higher prices than in the United States. Also, Dunlop, Goodyear, Pirelli, Michelin, and Bridgestone tires in common sizes are easily available locally at higher prices than in the United States. Anti-theft devices such as the club and/or an alarm (this can also be purchased and installed locally) are recommended.

e. When importing a vehicle into Georgia, please send, ahead of your arrival, a scanned copy of your vehicle's title or certificate of origin. Post cannot clear your POV without it, and if the vehicle arrives ahead of the employee, the vehicle may incur unnecessary demurrage charges.

In order to ensure that all USG employees meet this requirement, you will need to provide proof of excess third party liability insurance valid in Georgia for a minimum of $75,000 before GSO will issue your license plates and turn your POV over to you. It is strongly recommended that you obtain comprehensive insurance on your own vehicle and supplementary liability coverage to ensure that you and whoever else may drive your vehicle are adequately covered. GSO motor pool can help you purchase such insurance locally, or you can choose to use an international insurance company based in the U.S.</td>

a. WEIGHT RESTRICTIONS

1) AIR FORCE PERSONNEL:
   (a) Accompanied tours: Full JTR weight allowance for all areas.
   (b) Unaccompanied tours: Enlisted E-5 and above, and officers are authorized full JTR. E-4 and below are normally authorized only UB allowance or 10 percent of full JTR. Exceptions to this policy may be authorized under AFI 24-501/JTR, APP W. Also refer to Attachment 2, Table A2.1, Rule 1, Item D, and Table A3.1 for reference to the Overseas Furnishings and Quarters Availability listing and procedures to request additional weight if applicable. (c) Unaccompanied tours where Air Force personnel will be living on Army operated installations: The Orders issuing officials (AFPC) should contact each gaining Army installation prior to placing orders to confirm current installation policy for assignment by rank and whether a barrack non availability statement will be issued when the inbound Air Force members arrives. Based on this info, orders shall specify household weight shipment authority. For more information AF members are encouraged to refer to the Army Web https://www.housing.army.mil/. This Army web page will also reference information in the Army Handbook. These individual checks will be in Air Force member’s best interest to ensure the member knows that most E-1 through E-6 will be placed into the barracks and this is applicable to all services stationed to an Army operated installation. (d) For those individuals assigned to/or living on an Air Force Installation, please refer to AFI 32-6001 for additional pet restrictions.
(2) ARMY PERSONNEL:  

(a) Accompanied tours: Full JFTR weight allowance for all areas.

(b) Unaccompanied Tours: Full JTR weight allowance is authorized for all areas; however, it is STRONGLY recommended that single/unaccompanied personnel ship no more than 25% (net) of their authorized weight allowance, including UB Transportation. Unaccompanied housing, including barracks rooms, are small and generally cannot accommodate HHG greater than 25% of the authorized weight allowance. Soldiers should be briefed that NTS government facilities are not available in Europe and excess HHG should be stored at a CONUS NTS facility prior to their arrival. Soldiers are financially responsible for storing all excess HHG that cannot fit into their assigned government quarters. Excess HHG will not be shipped back to CONUS. Soldiers should contact the housing office at their gaining duty station or their sponsor to request information on unaccompanied housing prior to making arrangements to ship HHG.  

(c) Single/unaccompanied officers and personnel in grades of E7 through E9: Assigned to the following APO numbers in the Kaiserslautern area are authorized full JFTR weight allowance: 09009, 09012, 09021, 09054, 09180,09227 and 09263.

5. FURNITURE, OVERSIZED

Government and economy living quarters are generally smaller than those in CONUS. Economy housing in Germany, Italy or Belgium may accommodate more HHG than government quarters, but are still smaller than homes and apartments in the United States. Many have narrow doorways and tight stairwells that cannot accommodate furniture that would fit easily into an American home. Service members/Civilians shipping large items such as king and/or queen size box springs and mattresses, oversized sofas, or other large furniture items that cannot be disassembled, may encounter problems when residing in government or economy housing due to narrow stairwells. Washers, dryers, ranges, refrigerators, kitchen cabinets, and wardrobes are furnished for government and economy quarters so these items should be placed in Non-temporary storage (NTS) in CONUS and not shipped to Germany, Italy or Belgium. There is no NTS in Europe. Therefore, HHG
shipped in excess of what will fit, or is too large to be placed in the Soldiers/Civilians living quarters cannot be stored at government expense. Storage will be at the Soldiers/Civilians expense as the Joint Travel Regulation does not allow reshipment back to CONUS for placement into NTS.

6. PETS/QUARANTINE

Standards laid out in the following document address requirements for shipping dogs, cats, and ferrets from the United States. PLEASE NOTE: Ferrets are not accepted as pets for movement on AMC military or commercially contracted aircraft. If you require information on shipments for ferrets or other exotic pets please contact your local USDA field office. 1. Importing dog and cat food that includes animal products (such as meat, milk, cheese, or yoghurt) is prohibited. Food [containing animal products] that is brought into the EU will be confiscated and disposed of. 2. Pit bull terriers, American Staffordshire terriers, Staffordshire bull terriers and bull terriers, or crossbreeds among them or with other breeds must not be brought into Germany regardless of any provisions established by individual German Federal States. a) The decision of whether or not a dog belongs to one of the breeds listed will be exclusively based on the appearance of the dog. b) Bringing a dog of the above-mentioned breeds or crossbreeds among them with other breeds into Germany may be punished with imprisonment of up to 2 years or a fine. c) The different German Federal States have established additional provisions. Therefore, [the person responsible for the dog] must also review whether or not keeping a dog of a certain breed will be allowed in the respective German Federal State. NOTE: For the remainder of this document the term pet or pets refers to dogs and cats only. ATTENTION: An examination fee of 55 Euro per pet will be implemented February 1, 2013, for all non-EU citizens who import a pet into the country. A. Quarantine Period - There is no quarantine period for pets entering Germany. B. Identification (Via standard electronic identification system with a read-only passive radio frequency identification device known commonly as a transponder Microchip): 1) Complies with ISO standard 11784 and 11785 2) Where the microchip does not comply with ISO standard 11784 or 11785, the owner or the natural person responsible for the pet on behalf of the owner must provide the means necessary (Microchip Reader/Wand) for reading the non-ISO compliant microchip at the time of inspection 3) The microchip must be implanted before the primary rabies vaccination or valid rabies booster is given to the pet before traveling: a) Primary Rabies Vaccine - This is the first rabies vaccination a pet ever receives; for EU countries this also applies to the first rabies vaccine given after the microchip was implanted; that is, rabies vaccinations received prior to the pet being microchipped are NOT recognized by the EU. b) Valid Rabies Booster - This is a rabies booster that was given to the pet before the previous (Either the primary rabies vaccine or another rabies booster) rabies vaccination expired C. Rabies Immunization:

(1) Please refer to "http://www.aphis.usda.gov/regulations/vs/iregs/animals/" (Enter the destination country you will be residing in under "Search APHIS") (2) Pets less than three months of age coming from the United States may not always require the rabies vaccination IF:

(a) These pets have pre-authorization from the EU member state BEFORE entering the country

(3) Any one year dose or three year dose rabies vaccine is valid as long as it is a U.S. approved vaccine, and was administered according to the manufacturer's specifications (for instance, a
vaccine labeled for 1 year use cannot be utilized as a 3 year vaccine)  (4) A valid rabies vaccine must occur after the animal has been microchipped to be valid for entry into an EU member state (5) At least 21 days must have elapsed between the completion of the primary rabies vaccination (as specified above) and before the pet enters the EU member state. (a) However, if the animal received a valid rabies booster - - 21 days does not have to elapse before travel.  (6) If a pet has received a non-ISO compliant microchip and then received a valid rabies vaccination with 21 days having elapsed since that vaccination and entering the EU member state; they:  (a) Do not require implantation of another ISO compatible microchip, but are required to carry with them a microchip reader/wand capable of reading the non-ISO compatible microchip implanted in their pet  (b) Do not require administration of another rabies vaccination before traveling as long as the rabies vaccination received is still valid  (c) Can have an ISO compatible microchip implanted in their pet so they do not have to carry the reader/wand with them  1. If they get this ISO compatible microchip implanted, they do not have to receive another rabies vaccination following this second microchip implantation. They are only required to document both chips on the required forms with their implantation dates D. Documentation (Verify the correct required documentation with your local USDA office):  (1) APHIS Form 7001 (Nov 2010) Acquired from any Army veterinarian, local veterinarian or USDA office  (a) Valid for only 30 days after issuance  1. Timeframe the form is valid can be shortened per the requirements of the Airline the service member is traveling on  (b) Requires certification by a USDA Accredited Veterinarian, Army Veterinarian, or GS 0701 Veterinarian before travel  (c) This form is not required to enter the European Union (EU). However, it’s highly recommended that service members acquire this form before travel from their on-base Army veterinarian to preclude the following:  a. If a member flies on a commercial carrier they may be required to have this form  b. If a member is scheduled to fly Patriot Express and somehow has to divert to a commercial carrier, having this form in advance alleviates last minute costs ($200) or delays  2. This form is not required to travel on Patriot Express (2) EU Non-Commercial Pet Form (Bilingual Health Certificate)  (a) For "Pets Dog, Cats, and Ferrets" destined to Germany, see link Under Pets heading Pets Dog, Cats, and Ferrets) Please refer to "http://www.aphis.usda.gov/regulations/vs/iregs/animals/ (Enter the destination country you will be residing in under "Search APHIS")  (b) Valid for 10 days to enter European Union and 4 months once inside the European Union  1. Timeframe the form is valid can be shortened per the requirements of the Airline the service member is traveling on  (c) Requires certification by a USDA Accredited Veterinarian, Army Veterinarian, or GS 0701 Veterinarian before travel E. Helpful Hints:  (1) As soon as you know you are going to travel and no later than 22 days prior to travel, get your pet microchipped first and then vaccinated for rabies if you have not already done so. Remember:  A VALID RABIES VACCINE MUST OCCUR AFTER THE MICROCHIP IS IMPLANTED (a) This will ensure the required 21 days has elapsed post vaccination prior to travel (2) When completing your required documentation (before you mail the forms or travel to your local USDA office to get them certified, if not using your on base Army veterinarian), fax or over-night ship them to your local USDA office to ensure they are filled out correctly before traveling to their office (a) This will ensure you do not waste travel time or postage only to have to redo the paperwork
(3) Many overseas bases have a full-time veterinarian on staff as well as commercial veterinarians available on the economy. (a) Most bases require pets to be registered with the base veterinarian after arrival. Check with base veterinarian for details. (4) The pet cage or carrier (See carrier shipping rules for correct cage dimensions based on pet size) used for shipping the pet must be labeled with the owner's name, pet's name, owners (or nominated persons) address, contact number and contact number at the final destination. (5) Since 21 Apr 2001, Germany has had a law in place prohibiting importation of certain dog breeds regarded as dangerous. For more information consult http://www1.zoll.de/english_version/a0_passenger_traffic/e0_vub/h0_dangerous_dogs/index.html. You may also contact the base veterinarian at your destination.

F. Unauthorized Pets: The import of Pit bull Terriers, American Staffordshire Terriers, Staffordshire Bull Terriers and their crossbreeding is prohibited. G. Fees: (1) The USDA form certification fee (approximately $70+, plus any shipping and handling if by mail) (2) Transporting pets to and from the PCS destination is at the member's expense and cost is based on the size of the pet being transported. Connecting flights may have fees in addition to AMC fees from BWI. (3) EFFECTIVE 1 February 2013, The fee for the import examination is 55 Euro. (4) All pet requirements are at the member's expense.

7. PRIVATELY OWNED FIREARMS (POF)

***NEW*** An updated copy of the Registration and Control of Privately Owned Firearms and Other Weapons in Germany (AER190-6) effective 08, November 2013 has been posted to SDDC Personal Property Web site under LINKS. (http://www.sddc.army.mil/PP) To avoid the possibility of German criminal prosecution for unauthorized possession of weapons or the possibility of punishment under the Uniform Code of Military Justice, privately owned firearms will not be included in household goods/unaccompanied baggage shipments, handcarried, or transported in luggage to Germany unless the owner possesses a valid German Weapons Possession Card (Waffenbesitzkarte) specifically listing those firearms. Antique POFs manufactured during or before 1898, and single-shot black powder POFs are not required to be registered with the German authorities, and may be shipped or transported in luggage to Germany. Headquarters, USAREUR and German Federal Ministry of the Interior are developing procedures to enable military and civilian personnel assigned to Germany and their dependents to obtain these cards through the USAREUR Central Registry. Members who have in their possession Waffenbesitzkarte from a previous assignment in Germany are authorized to ship POFs, as long as the Waffenbesitzkarte covering the POFs to be shipped has not expired. Copy of the Waffenbesitzkarte must accompany shipment.

8. PRIVATELY OWNED VEHICLES (POVs)

**Effective 30 January 2019:** Environmental Emissions Restrictions on Diesel POVs operated within various German city limits are changing "daily". BEFORE SHIPPONG A DIESEL POV, Personnel should email USTRANSCOM-Europe Personal Property Office at usarmy.sembach.598-trans-bde.mbx.ppd@mail.mil> and provide COMPLETE vehicle details, including VIN #. USTRANSCOM-Europe will call their local RMV and obtain the most current information.

**NOTE:** IT IS NOT POSSIBLE TO INCLUDE ALL GERMANY POV RESTRICTIONS IN THE PPCIG. For detailed POV guidelines, DOD Personnel PCSing to Germany should inquire with their unit or sponsor, and review Army in Europe, Regulation 190-1, (Navy) CNE-C6F Instruction 11240.6W, or (USAF) USAFE Instruction 31-202, for detailed guidelines on shipping POVs. Particularly, if shipping diesel fueled POVs.

**USAREUR CERTIFICATE OF LICENSE:** In order to register and operate a POV in Germany, a USAREUR certificate of license must be obtained which requires passing a very stringent test on European driving rules, requirements, and road signs. An individual must be in possession of a valid U.S. state license, or a valid license from another country, as a prerequisite for taking the test. Unit issued military operator's permits also meet the requirement for obtaining a USAREUR certificate of license; however, these permits can only be issued to service members and civilian employees. Family members cannot be issued a military operator's permit, therefore, family members not in possession of a valid license from the USA or another country, cannot be issued a USAREUR certificate of license. Any additions of different classes, such as a motorcycle endorsement must first be authorized on the valid state or country license. USAREUR is no longer permitted to issue learner's permits, or instructor's permits; and parents are not allowed to "teach" family members how to drive. Individuals arriving in Germany without a valid license desiring to obtain a USAREUR certificate of license must first complete requisite training and licensing in CONUS, or complete local German training and licensing requirements prior to being issued a USAREUR certificate of license. Cost of local training is expensive.

Service members should be informed of the higher insurance rate for Privately Owned Vehicles (POV) in Germany, before shipping their POVs. Only insurance companies approved by the German Government are authorized to issue a 29a (proof of German Minimum third party liability insurance) to register a POV in the U.S. Forces system in Germany. There are two insurance systems service members can choose from in Germany. NATO Tariff and German Tariff. Several companies issue
policies in the United States for registration of POVs in Germany. The differences in the systems are
the following.  (1) NATO Tariff: Annual tariff rates are based on age and marital status (all
payments can be made in US currency). The most expensive category personnel are individuals
under 25 years of age and single.  (2) German Tariff: Rates are based on POV HP/PS/or KW,
location where POV is registered and individual's driving record (substantiated by letter from service
member's home insurance office in U.S. only). Payment in the local German currency is
required.  e. SAFETY REQUIREMENTS: A POV shipped to Germany must also pass USAREUR
safety standards before it can be registered for driving in Germany. The cost of repair work and
parts are very expensive in Germany and should be done in CONUS before POV is delivered to the
Vehicle Processing Center. Counselors need to stress to each member on orders to Germany. It is
the member's responsibility to ensure POV meets USAREUR safety standards. This is best done
before making delivery to the POE. The most common causes of POV inspection failures in Germany
are:  (1) Tires: All tires must have at least 1.6mm tread over the complete tire surface. No
regrooved tires are allowed; snow tires (if on vehicle) must be on the drive wheels; and there can be
no mixing of radial and conventional tires.  (2) Exhaust System: No rusted out or leaking
exhaust system components allowed. Exhaust systems with cutouts, fiberglass packed, or straight
through exhaust systems are not allowed.  (3) Brakes: A mismatch of 20 percent or more
between wheels, as measured on the brake wheel drag machine. Hand brake must hold vehicle on
incline.  (4) Wheel Alignment: Wheels must be able to be turned to full right or full left
without jamming or rubbing any part of vehicle; tie rod steering arm assemblies must not be
damaged or worn.  (5) Lights: All installed lights must be operational.  (6) Exterior
Condition: Missing fenders, broken windows, extensive body damage, deterioration, broken springs,
or oil leaks are not allowed. Foreign manufactured vehicle frames are usually an integral part of the
body; therefore, rust damage is critical and will necessitate costly reconstruction to pass the
inspection.  (7) Horns: POVs must be equipped with a horn and it must be
operational.  (8) Modifications: Any modifications changing the vehicle body style (as to
ingine not being covered), altered bumpers which are not to manufacturers specifications, missing
or damaged running boards, or tires protruding beyond the fender wells are not allowed. Dark
tinted glass on the front driver's and passengers doors or on the front windshield that comes down
from the top of the windshield more than 4 inches that makes it impossible to see the driver and
occupants is prohibited by German law.

11. TRANSMITTING EQUIPMENT

a. Germany has different rules and regulations governing the use of the Frequency Spectrum within
their borders. As visitors in this country, we are subject to their rules and regulations. Violations of
these rules and regulations governing the use of the Frequency Spectrum in Germany, can result in
fines, confiscation of equipment, and imprisonment.  b. The frequency band equipment is
authorized to operate if determined by the nations Spectrum Allocation Tables(SAT). The Spectrum
Allocation Table in Germany is very different from the US (i.e., U.S. cordless phones operate in the
German cellular phone band but will cause local interference with the German cellular network).   c. In the US the FCC verifies all transmitters (legal) sold adhere to the US Spectrum Allocation Tables and are marked with FCC numbers (i.e., FCC: 1234567). Transmitters with the FCC numbers are not legal for use in Germany.   d. The following U.S. manufactured items are NOT authorized for use in Germany: CB Radios, cellular phones, cordless phones, baby monitors, wireless intercoms, radio frequency remotes, radio controlled vehicles, and radio frequency wireless LANs. NOTE: Items above can be purchased in Germany that adhere to the German Spectrum Allocation Tables.   e. INFRARED TRANSMITTER/REMOTE CONTROLS: No restrictions.

NON-NATO PERSONNEL ONLY: 1. Ruling of the SOFA between the Kingdom of Spain and the United States stipulates members of the US Military Forces and civilian employees ordered to Spain for duty, are authorized to import and retain one POV of non-Spanish manufacture free of all types of Spanish duties. The vehicle must be for the exclusive use of the military member, civilian employee, or a dependent and must arrive in Spain within 6 months, repeat, 6 months from the initial date of arrival of the military member or civilian employee. Members of the force and civilian component can neither import nor register a second non-Spanish manufactured POV. A second POV, shipped commercially, will be impounded at the POD and all storage and related handling fees, including reshipment will be at member’s expense. Military Members are solely responsible for all Spanish duties on POVs shipped commercially at personal expense. Suggest all personnel validate Spanish registration requirements before affecting a second vehicle at personal expense. If a second POV arrives via OPTLIFT, it will be held aboard the station pending reshipment via OPTLIFT to CONUS. In addition to this imported vehicle, the military member or civilian employee also may own and maintain one Spanish-manufactured vehicle purchased in Spain in accordance with special arrangements and free of the Spanish value added tax. Dependents over the age of 18 may own and maintain one vehicle of Spanish manufacture. 2. POVs/motorcycles are picked up at the vehicle-processing center in the city of Rota and members should have a current registration and must have metal license plates. If the registration has expired or the member doesn’t have metal plates, the vehicle can still be registered however, it will take ten to twelve days to complete the process for Spanish registration and license plates. Normally it takes 2 to 4 days to complete the Spanish registration process if the member has a current registration and metal plates. It is recommended that the registration be good for at least 90 days from the date the vehicle is turned in for shipment at the CONUS or overseas VPC. Members must have a POV/motorcycle registration, even if it is expired, in order to register the vehicle with Spanish traffic authorities. 3. Bumper stickers, decals on windows and windshield must be removed before members can pick up the vehicle. It is suggested this be done prior to turning in the POV for shipment. 4. Members must possess a valid US or foreign drivers license and members arriving in Spain must successfully complete a Spanish drivers test and obtain a Spanish drivers license. Spanish license processing takes approximately 10 working days. Members can drive during this period with either an international license, or a Spanish translation of their US or foreign drivers license obtained from the Security Department, NAVSTA Rota, Spain. 5. Members who are not ordered to Spain for duty are not eligible for customs clearance of...
their POV, under the rules governing members of the US Forces. Members who ship their POV to Spain on PCS orders which assigned them to another country, or on retirement orders with a home of selection other than Spain, and with the intent of picking up the vehicle at the Spanish port and driving it to their final destination, must be advised:  
(A) Customs clearance cannot be effected by Commanding Officer, NAVSTA Rota, Spain.  
(B) The POV must be properly manifested and shipped for discharge at the designated commercial port of Algeciras, Cadiz, Spain. Preferably Cadiz inasmuch as the port is 35 miles from the Naval Station and Algeciras is 90 miles south.  
(C) Commercial customs clearance and all costs involved are the responsibility of the member, and customs clearance can take a week or more.  
(D) All documents for the vehicle must be current and after effecting clearance, the POV must be picked up by the owner.  
(E) Shipping a POV contrary to above information will result in personal delay, expenditure, and frustration.  

PERSONNEL ASSIGNED TO NATO ONLY

1. In Accordance with the "Stationing Agreement" Between NATO (SHAPE) and the Kingdom of Spain signed 28 February 2000 and the "Exchange of Letters". NATO personnel may own at any time one duty-free vehicle if unaccompanied or, if accompanied by dependents, two duty free vehicles.  
2. Motorcycles: "Personnel entitled to a tax-free motor car shall, in addition be authorized to import or purchase a motorcycle to include a motorcycle/bicycle, motor scooter, or similar 2/3 wheel/skidmachine free of duties and taxes. Resale or replacement of such vehicel shall be governed by the same provisions specified on motor vehicles.  

*POV/MOTORCYCLES (Regardless NATO or other, only 1 vehicle may be shipped at government expense)

a. POVs (includes data on prohibited vehicles, colors, etc.)

No restrictions identified.

b. MOTOR CYCLES/MOPEDS

A non-Spanish manufactured motorcycle/moped/motorized bike with a 50cc* engine or larger is considered a POV and must be shipped to Spain via the VPC and registered as any other POV.  
Do not ship as HHGs.  
ATVs and Motor cross vehicles, provided they remain on base and off-road, are not considered POVs and may be imported into Spain as HHGs. Possession of these types of vehicles for off-road use will not count against the limitation of tax-free vehicles members may import and own.  
2. Spanish Traffic Regulations requires proof of two years experience before issuing a full motorcycle drivers license.  
(CLASS A license allows the holder to operate motorcycles regardless of piston displacement, up to a maximum weight of 350 kilograms/771.62 LBS.)  
Proof of two years experience can be provided if the current stateside or foreign drivers license has a motorcycle endorsement and is at least two years old. If the current stateside or foreign drivers license has a motorcycle endorsement but is under two years old due to renewal, documentation from a previous motor vehicle department can be presented to prove the member has accumulated the required two years of experience. If two years of holding a valid drivers license with a motorcycle endorsement cannot be proven the CLASS A license will not be issued. Failure to obtain the Spanish drivers license with the required motorcycle endorsement will result in termination of the registration process. At this time arrangements will have to be made for the exportation of the motorcycle, which may be determined to be paid by the member.  
* MOPEDS (with less than 50cc engine capacity): The Spanish Ministry of Industry prohibits registration/operation of non-Spanish manufactured mopeds with less than 50cc engine capacity. They cannot be imported into the country as HHG or as POV via the VPC. Failure to comply with above information will result in hardship on member, personal expenditures, and severely strain Spanish customs/US Forces relations.

Assessed charges can be extremely expensive if not properly coordinated with a broker. Property owners are fully responsible for payment of all Greek customs related handling and storage fees, NOT the U.S. government. Any government authorized storage in transit of personal property shipments at U.S. Government expense cannot commence until the property owner has personally arranged for the release of his/her property from the possession of the Greek customs authorities. POVs imported into Greece in conjunction with retirement or separation from service are subject to extremely high import duties, which can be as much as 200 percent of the assessed value by Greek customs authorities (i.e., POV value is assessed at $10,000; import duties would be $20,000). ENSURE DD FORM 1299 IS ACCOMPLISHED FOR EACH SHIPMENT AND CONTAINS THE FOLLOWING STATEMENT IN THE REMARKS BLOCK "DEPARTMENT OF STATE MANAGED SHIPMENT". NOTE: THIS CAN BE ACCOMPLISHED BY USING THE ADDITIONAL INFORMATION FIELD (SEE DPS SMARTBOOK ON WWW.MOVE.MIL (PPSO TAB)). c. SUBMIT DD FORM 1299, DD FORM 1797 AND A COPY THE MEMBER/EMPLOYEES ORDERS VIA FAX/EMAILED TO U.S. DEPARTMENT OF STATE TRANSPORTATION AND TRAVEL MANAGEMENT DIVISION, PHONE: 1-800-424-2947 OR 202-663-0891/0892, FAX: (202) 663-3209, EMAIL: DODPP@STATE.GOV. d. AFTER SUBMISSION OF REQUIRED DOCUMENTS TO DOS, PLACE THE DPS SHIPMENT RECORD IN A "CANCELLED" STATUS. OTHER: All Navy, Marine Corps, Coast Guard, Army, and DOD civilian personnel being assigned to Guam should be informed that:

(1) If the shipment does not arrive by the RDD, the service member should be counseled to contact the Navy Housing and Family Service Center for assistance in getting necessary furniture as stated below. Additionally, advise the member that if the shipment missed the RDD they can file a inconvenience Claim against the carrier. (2) Household Appliances: Guam is a full JTR weight allowance area for the command-sponsored service members assigned to Guam. However, Government-owned appliances, to include refrigerators, stoves, washers, dryers, and central air conditioning units are provided automatically for Government quarters and upon request (command-sponsored members) for off-base housing. The Housing Department will not remove the Government-owned appliances already in Government quarters. Shipment of the appliances listed above to Guam is neither necessary nor recommended. (3) All other furniture support is limited to a maximum period of 90 days unless HHGs are not received within 90 days through no fault of the service member. (4) Members should be advised to contact their assigned sponsors before making any final arrangements for shipment of HHGs to Guam. Depending on the size of the family quarters to be assigned, the Housing Office has advised that a standard housing unit has no more than an 8-foot high ceiling with room sizes of about 10 feet by 12 feet, 12 feet by 14 feet, and 8 feet by 10 feet. Due to the limited spaces of the Government housing units, members should be advised to ship only furniture that can be accommodated within the unit spaces.

a. WEIGHT RESTRICTIONS
For All Personnel:  
(1) Accompanied tour: Full JTR weight allowance.  
(2) Unaccompanied tour: Guam is not a weight restricted area. However, there are Housing requirements IAW the NAVADMIN policies regarding BAH/OHA. All E4s and below are required to occupy barracks at 100%. E4s over 4 years regardless of years served are required to occupy barracks unless accompanied with dependant. In light of this existing requirement, E4s should be advised by the Transportation office at origin not to ship any HHG that cannot fit into a barracks. Service member should be advised to utilize NTS in lieu of shipping HHG to Guam. If service member elects to ship their HHG in lieu of NTS and they do not receive OHA they will be liable for all storage fees after the govt paid temp storage has expired (90-180 days).(CH 03-OCT-2014 SDDC-PAC RB)

8. PRIVATELY OWNED VEHICLES (POVs)

a. POVs (includes data on prohibited vehicles, colors, etc.)

ENTIRE SECTION UPDATED ON 19-FEB-2016 (SDDC-PAC RB) 1. There are several good reasons not to ship a Privately-Owned Vehicle (POV) to Hong Kong: a. Public transportation is excellent. b. Public parking facilities are scarce and expensive. c. Hong Kong uses a right-hand drive system and requires POVs meet U.K. specifications. 2. Because of the very stringent requirements imposed by the Hong Kong Government, the cost of modifications, and the uncertainty the modifications will bring the POV up to required standards, Post will NOT approve the importation of LEFT-HAND DRIVE POVs (i.e. American style). a. Many employees wait until after their arrival at Post to assess their need for a POV, then buy a POV locally if needed. b. Japanese and European cars are the most popular, and parts and maintenance facilities for them are readily available. Though the current used car market is particularly buyer-friendly, fewer than half of Hong Kong Mission personnel have POVs. Many who DO own a POV in Hong Kong find insurance coverage somewhat higher than in the U.S. 3. Given the above, if you seek to ship a right-hand POV to Hong Kong, please first contact the GSO Shipping and Customs Office, email: gso_hongkong@state.gov, and provide the following information: a. Make, Model, Year of POV b. Number of cylinders, displacement (in cubic centimeters or cubic inches) c. Chassis number, engine number and engine model After you have submitted the above information, GSO Customs and Shipping will research the POV specifications to determine compatibility to similar POVs in Hong Kong, and eligibility for importation. GSO Customs and Shipping personnel will inform you of their findings. 4. DO NOT ship a POV to Hong Kong without specific permission from Post. If your POV shipment is approved for importation, the Hong Kong Government will require certification your POV is in compliance with the emission control standards of Hong Kong. a. Customers may apply for an exemption of emission control and noise control based on diplomatic courtesy. The exemption process usually it takes approximately 2-4 weeks. 5. Only unleaded gasoline is available in Hong Kong. DO NOT remove catalytic converters. 6. Mail POV shipping documents, including the original Bill of Lading to General Services Officer, US Consulate General, PSC 461 Box 9, FPO AP 96521-0006 to arrive NO LATER THAN 2 weeks prior to the anticipated arrival of the POV into Hong Kong. 7. Trucks, vans and pickup models are considered commercial POVs and may not be imported into Hong Kong. 8. POVs with tinted windows cannot be registered. 9. The POV owner must have purchased the POV more than six months prior to arrival at Post or licensing will be denied. In addition, the owner should have been issued a valid driver’s license and resided for at least six months in the country where the POV was last registered. 10. POVs require a thorough mechanical and safety inspection before being registered in Hong Kong. Due to the stringent inspection process, successful POV registration may
take between 4 - 6 months if all inspection requirements are met.  11. When the owner of an imported POV departs Post, the POV cannot be sold to a local resident. The POV can only be sold to diplomatic personnel assigned to Hong Kong, exported, or disposed of.  12. POVs 6 years old or older must undergo inspection annually prior to the renewal of POV registration. b. Anyone who cannot ship a POV to Hong Kong, because of the above requirements or restrictions, should request Service approval for POV storage. No storage facilities for POVs exist at Post. c. For further information or inquiry, please feel free to contact the GSO Customs and Shipping Office, email:gso_hongkong@state.gov

b. MOTOR CYCLES/MOPEDS

Motorcycle/mopeds must be shipped separately as POVs and are imported duty-free.

c. GASOLINE/CATALYTIC CONVERTERS

2. CUSTOMS CLEARANCE PROCEDURES, REQUIREMENTS, AND RESTRICTIONS

DOD/DOS arranged moves
For shipments going to Papa AB, Hungary, customs form AE Form 302 will be requested and completed by 950th Transportation Battalion, Bremerhaven at email addresses: (usarmy.bremerhaven.598-trans-bde.list.950th-cargo-control-group@mail.mil) and (ursula.b.kappler2.ln@mail.mil) upon receipt of the following information from the TSP or agent: cargo description, pieces and weight, soft copy of GBL, correct delivery address including APO#, POC name and POC phone number.

DOS Arranged Moves
A Hungarian customs official is on hand when unaccompanied baggage air and surface shipments are delivered. It is, therefore, highly advisable to prepare a complete inventory of effects brought into Hungary and be prepared to submit complete inventories upon arrival and departure. One advance copy of the inventory should be forwarded to GSO, American Embassy, Budapest, for translation into Hungarian. Incoming shipments cannot be custom cleared until member is physically present on station and registered with the Hungarian authorities. Due to mail lag time often experienced by American Embassy Budapest, origin shipping office should forward message to TWX address providing member's name, destination carrier (to include the mail and telex address), shipment date, and PPGBP and airway bill number.

DOD Arranged Moves
DO NOT PLACE SHIPMENTS IN SIT AT ORIGIN, allow shipments to continue to move forward. AF members stationed at Papa AB will be required to obtain a residency permit prior to delivery at destination. To avoid delivery delay of personal property, AF members stationed at Papa AB are required to have a no-fee official passport issued prior to arrival. Members need to contact their servicing Military Personnel Flight with questions.

6. PETS/QUARANTINE

Pets are not subject to quarantine, but dogs and cats must have all shots up-to-date at least 30 days prior to departure. EU Form 988, bilingual Veterinary Certificate is required. (The rabies shot must be at least 30 days old, but not older than 1 year.) The certificate must be issued within 10 days prior to arrival in Hungary. The requirement is for a microchip and if the requirement is not met upon arrival the pet will be quarantined at the owner's house until the requirement is met. Attached is the latest TM-2 info on pets. 21. Pet information: There are up to four requirements for importing dogs and cats into Hungary, depending on one's shipping point of origin:

A) Physical identification requirements. The pet must have a implanted microchip for identification. Hungary uses the 11784 ISO or 11785 ISO microchip standard. If the microchip follows another standard the owner of the pet must provide a scanner able to read the implanted device. To date, pet owners arriving from the USA have not experienced problems meeting the identification requirements, but owners may wish to bring this microchip standard requirement to the attention of their veterinarian.

B. Pet Passport or EU Veterinary Certificate. Pets shipped from EU countries are expected to have pet passports issued by an authorized Veterinarian. When importing pets from the USA, a completed EU Form 988, veterinary certificate can be substituted for a pet passport. A blank copy of this certificate can be obtained on the GSO page of post's intranet website at (http://budapest.state.gov) or from post's shipping assistants (VeroD@state.gov or FassyB@state.gov).

C. Rabies vaccinations. The pet should be inoculated at the age of 3 months. The inoculation should be repeated annually. The most recent rabies vaccination should have been completed at least 30 days prior to the pet's date of arrival in Hungary. Pet owners must carry with them an official record of these vaccinations (whether in a pet passport or international health certificate).

D. Blood test. A blood test is NOT required for pets coming from EU countries, the USA, Australia, Barbados, Bahrain, Bermuda, Canada, Croatia, Jamaica, Japan, Mauritius, New Zealand, Russia, and Singapore. A blood test is required for pets coming from other
countries. For further information, please contact post's shipping assistants (VeroD@state.gov or FassyB@state.gov). E. Quarantine. If the pet does not comply with the above listed requirements then quarantine may be ordered at the house of the owner until all the necessary requirements are fulfilled. Other pets. If you are planning to ship more exotic pets, please check with the CLO or the closest Hungarian embassy or consulate. Hungary is a signatory to The Washington Convention on International Trade in Endangered Species of Wild Flora and Fauna. Pet food and supplies. The Commissary stocks dog and cat food and kitty litter. These items may also be purchased locally. You should consider bringing unique specialty pet supplies in your HHE. When providing post with your initial information, please indicate whether or not you intend to bring a pet to post and confirm your pet status in your subsequent arrival cables.

7. PRIVATELY OWNED FIREARMS (POF)

No restrictions identified.

a. HAND GUNS

Prohibited.

b. RIFLES/SHOT GUNS

Hungarian law only allows one shotgun or one rifle to be imported for hunting purposes. Serial/model numbers and caliber information must be provided to the Regional Security Officer (RSO) and General Service Officer (GSO) in advance. A permit must be obtained for all firearms BEFORE importation is possible. If permit is not available at the time of importation, weapon will be confiscated by the customs official. It will remain in their custody until the member can show a valid permit or leaves Hungary, whichever is sooner. No firearms may be imported for personal use without prior approval from the ambassador.

c. TOY RELATED GUNS

No restrictions identified.

d. OTHER (i.e. AMMO, EXPLOSIVES, ETC)

8. PRIVATELY OWNED VEHICLES (POVs)

Please note that none of these expenses are reimbursable to the member. Member must possess a valid state driver's license and also possess a US State Department-authorized international driving permit (AAA or NAC). Member and dependents with driver's licenses will receive European driving regulations training.

a. POVs (includes data on prohibited vehicles, colors, etc.)
(1) Hungarian regulation requires vehicles to conform to European specifications, but the Embassy has a waiver covering all of the Embassy's official and diplomats' privately-owned vehicles (POVs). There is no restriction on the type of vehicle imported. (2) Each vehicle must go through a thorough technical inspection prior to registration/licensing. If the vehicle fails the inspection, all repairs/modifications must be completed before registration is allowed. All of these repairs are at the owner’s expense and are not reimbursable. Some of these repairs might be quite expensive. Therefore, it is in the best interest of the member to ship/purchase a vehicle that is new or in 'like new' condition. (3) POVs should be shipped in a sea container and consigned to American Embassy Budapest, Szabadsag ter, Attn.: members name. Information copy of documentation should be mailed to American Embassy, 1054 Budapest Szabadsag Ter 12, ATTN: GSO. (4) Papa AB, Hungary: POVs will be shipped direct to Papa Hungary, through the VPC contract.

b. MOTOR CYCLES/MOPEDS

Motorcycles/mopeds can be imported with household goods. They are considered POVs if the engine size exceeds 50cc and must be registered as such. If the motor size remains under 50cc, it does not require registration.

c. GASOLINE/CATALYTIC CONVERTERS

All vehicles must be equipped with a three-way controlled catalytic converter. There are no exceptions made to this law.

d. INSURANCE AND SAFETY REQUIREMENTS

Due to limited vehicle registration/insurance options and the fact that there are currently no US insurance companies offering primary or third party liability coverage in Hungary, the member should be prepared to either: (1) store their US-spec POV stateside; (2) title and register their US-spec vehicle in the Hungarian system ($350-$1,300 depending on the status of the title and the type of vehicle) only if allowed by their lienholder (if applicable); (3) rent/lease/buy and register and insure an EU-spec vehicle; or (4) pay approximately $350/month for mandatory third party liability insurance (plus collision & comprehensive coverage as required).

a. POVs (includes data on prohibited vehicles, colors, etc.)

POVs: Authorized DOD personnel may import one POV duty-free. Icelandic Government imposes no restrictions as to color, age, or dimensions.

b. MOTOR CYCLES/MOPEDS

Shipments of two-wheeled motorized POVs (motorcycles/mopeds) to Iceland is prohibited due to severe weather and unsafe road condition.

c. GASOLINE/CATALYTIC CONVERTERS
Diesel fuel is available from a commercial source on base. The price per gallon at this station fluctuates with local market prices but does not include host nation taxes. As of JUN 2005, the price is $1.74 per liter. While this service is available to any member, prior arrangement must be made through the Iceland Defense Force Staff Judge Advocate Office.

d. INSURANCE AND SAFETY REQUIREMENTS

1. INSURANCE: Liability insurance is mandatory for all POVs in Iceland. Insurance must be purchased in Iceland; no US insurance companies are allowed to underwrite insurance in Iceland. Cost of liability insurance varies with type and year of the vehicle but generally runs from $400 to $500 per year. Comprehensive/Collision insurance is not required but is available for an additional cost of $200 to $1,000 per year.2. SAFETY REQUIREMENTS: a. Headrests: Icelandic laws require all POV's manufactured after 1 Jan 1983, to be equipped with high-back front seats extending to a minimum of 30 inches from the top of the seat cushion to the top of the back of the seat, or built in adjustable headrests (clip on headrests are not acceptable). b. Tinted windows: Icelandic law prohibits tint (peel off type) on the driver's side and front passengers side windows. This causes failure of inspections. c. Seatbelts: It is mandatory safety requirement in Iceland all POVs be equipped with three-point seatbelts (shoulder strap) in the front seats and the rear seats where they can be arranged, or alternatively, lap belts. d. Lights: All vehicles being operated in Iceland must have low beam headlights and exterior lights/parking lights when the vehicle is driven day and night, 24 hours. Daytime running lights will not be accepted in Iceland and will cause failure of inspection. In order for newer model cars to pass inspection, they must remove the fuses or relay connected to the daytime running lights. Recommend that members have the diagram of the electrical connection of the vehicle in order to disconnect the daytime running lights. (The taillights are not on when running lights are activated, therefore making them illegal in Iceland.) All fog lights must have "E" or "DOT" marking on. e. License Plates: Front and rear license plates are required. Recommend a license plate holder be installed for front and rear before you arrive in Iceland. Brackets are very hard to purchase in Iceland. f. Side view mirrors: Two side view mirrors (one on each side) are mandatory on all POVs. g. Warning triangle: It is a mandatory requirement to have a reflective warning triangle available in the trunk of each POV. h. Mud flaps: No mud flaps are required on regular vehicles. For certain vehicle types modified for higher ground clearance, four mud flaps are required, for example jeeps and trucks. i. Fender flares: All vehicles that have tires which extend past the body are required to have fender flares installed. j. Trailer hitch: Hitch balls must be removed prior to inspection. k. Steering: Vehicles with steering wheel on the right hand side will not be accepted in Keflavik Iceland. l. Speedometer: Speedometer must indicate speed in kilometers/MPH. Transparent overlays can be manufactured to satisfy this requirement. m. Turning Signal: Vehicles manufactured after March 1988 turning signal must be visible from front and side of the car, signal must blink not only from bumper but also the side of front fender headlights, or will cause failure of inspection. n. Exhaust System: Vehicles manufactured after 01 July 1990, that have the tail pipe ends extending to the right must have pipe end bent down or straight back or will cause failure of inspection.

REPAIRS: 1. Tires and minor mechanical repairs are available at the Navy Exchange Service Station on-base. Limited POV parts are available. Parts and repairs off-base are expensive. 2. Because vehicle repairs in Iceland are expensive and the mandatory inspections are quite strict, it is recommended all POVs shipped be in excellent condition and any required repairs be accomplished prior to shipment. 3. THE FOLLOWING OPTIONS APPLY TO DRIVING ON SNOW OR ICE-COVERED ROADS: a. Snow tires on all wheels. b. Chains on all wheels of the drive axle (front or rear). c. Studded tires on all wheels. d. Studded tires on wheels of one axle and chains on
wheels of the other axle. You may not use two studded tires alone. Chains and studded tires may not be used during the period 16 April through 31 October, unless necessary due to special driving conditions. Should you be observed driving a vehicle on ice and snow covered roads without the proper equipment, you may be issued a citation; furthermore, if you are involved in an accident and your vehicle is not properly equipped, you will automatically be held responsible for the accident.

g. REGISTRATION: The initial cost to register a POV is $270 (varies with exchange rate). This includes registration, safety inspection, plates, and headlight inspection. A POV that fails a safety inspection is subject to $24 reinspection fee. There is also an annual safety inspection charge of $67.

h. MODIFIED/ALTERED VEHICLES: Vehicles which have been significantly modified or altered from their original factory specifications (e.g., fourwheel drive trucks with raised suspensions) may be subject to a special inspection at the Icelandic Motor Vehicle Supervision Office to ensure they conform with all applicable vehicle rules and specifications. The cost of the inspection is approximately $200. Additionally, these vehicles are required to carry both a fire extinguisher and a first aid kit at all times.

i. VEHICLE AVAILABILITY: Four-wheel drive vehicles are very popular in Iceland. Used POVs, some with four-wheel drive, are available on-base. Additionally, many models of new POVs can be purchased on and off-base, free of Iceland taxes. However, these vehicles cannot be shipped back to the US at Government expense, unless the vehicle is purchased to replace a vehicle lost through fire, theft, accident or similar causes.

a. POVs (includes data on prohibited vehicles, colors, etc.)

1) All vehicles that do not comply with the below requirements cannot, repeat, CANNOT be imported to New Delhi. Vehicles not complying with this mandatory requirement will be subject to re-exportation at the owner’s expense. (CH)–FOR MUMBAI–All POVs imported into Mumbai must comply with EURO IV emission standards. Compliance certification should be obtained from the manufacturer of the POV. EURO IV certificates from dealers are not acceptable. POVs which do not meet EURO IV emission standards cannot be imported into Mumbai. (CH 21-Dec-2017 TCJ4-HB-PAC RB)

2) The GOI has imposed additional restrictions on the importation of government owned vehicles and POVs to India that do not comply with the new EURO III emission standards. These standards came into effect April 01, 2005 and are more stringent than EURO II or current US Environment Protection Agency (EPA) standard. All vehicles that were manufactured prior to April 01, 2005 and are shipped to India on behalf of US Embassy employees will be required to comply only with the older EURO II or US EPA emission standards. (US EPA standards are less stringent than Euro III emission standards).

3) In order to obtain US EPA emission compliance certificate, employees are requested to contact Mr. Frederick Hart at U.S. EPA. He can be contacted at tel: 734-214-4877 and fax 734-214-4869, email address is: hart.Frederick@epamail.epa.gov. Mr. Hart will take approx. 20 days to mail this certificate; therefore, please do not forget to provide your mailing address to U.S. EPA. (4) U.S. EPA will need the vehicle make and model, year, the engine size, and the most important thing is the test group number or the engine family name. This is made up of 12 alphanumeric characters and is located under the hood of the vehicle on the emissions label. The VIN number will not be of any use to U.S. EPA. Please note it takes about 20 days for U.S. EPA to mail this certificate to the customer. They will not fax your certificate or send it by email attachments. (5) The GOI now requires that new vehicles manufactured after April 01, 2005 comply with EURO III norms to be cleared by customs and registered in India. Therefore, any employee that plans to ship an automobile to India that was manufactured after April 01, 2005 must obtain a EURO III certificate from the manufacturer and fax it to GSO at 91-11-2419-8223. Please note that the dealer’s EURO III compliance certificate will not be acceptable by the GOI. POVs that do not meet the EURO III emission standards cannot be imported to New Delhi. POVs should be stored in CONUS for the duration of the employee’s tour of duty. (6) All employees may import a POV which meet all applicable standards, or may order a new vehicle directly from a manufacturer or authorized dealer and import it into India duty free. Additionally, all vehicles entering India must be fitted with a catalytic converter. An employee is allowed to import a left-hand drive vehicle. The vehicle can be more than three years old. Such a vehicle can be sold to another diplomat, or privileged person only, or must be exported at the time of employee’s departure from India. (7) Note that the GOI considers motorcycles as POVs. If you intend to import a motorcycle in your HHGs, you will not be allowed to import or purchase another duty free vehicle unless you
have a title of First Secretary (or Equivalent) and above. Also, please ensure that your motorcycle complies with EURO II/ III emission standards. The GOI may grant permission to import a second vehicle (First Secretary and above only) upon specific request. Upon departure, diplomatic personnel may sell their POV to another diplomat on a duty fee basis.(8) All employees are required to have the bill of sale or invoice of their vehicles in order for the vehicle to be imported into the country and for sale of your vehicle after the completion of your tour of duty.(9) Employees fortunate enough to have no claims against their auto insurance policies in the U.S. or at their previous posts are encouraged to bring with them a proof of no claim letter, written on their insurer’s letterhead. This documentation will help in obtaining reduced auto insurance premiums in New Delhi.

6. PETS/QUARANTINE

The Government of Indonesia (GOI) requires the quarantine of all pets arriving into Indonesia, regardless of their country of origin for a period of 14 days, although occasionally a pet importer or employee has been able to arrange an earlier release. However, the earlier release is never given. Also, pet-owners are required to pay the full cost of the 14-day quarantine regardless of how long the pet remains in quarantine. As of March 4, 2010, the cost of quarantine is IDR 560,000 (USD 60.00) for small animals and IDR 980,000 (USD 105) for large animals. This does not include a handling fee to transport the pet to the quarantine area of the airport or the handling fees of a pet importer. Pets are also subject to duties and taxes from the GOI plus an approximate fee of USD 200.00-500.00 in addition to pet handling and quarantine fees. Incoming members determine the appropriate method of bringing pets to Indonesia. Currently, the most efficient way to send pets is as accompanied baggage. Many U.S. air carriers place restrictions on pets during the hot summer months. To obtain the proper import permit, the AMEMB recommends members use a local pet transport service. (CH PPP-POP 3-10-2010)

8. PRIVATELY OWNED VEHICLES (POVs)

Per U.S. Embassy Jakarta/USASEAN Management Notice 192-15, dated 16-Nov-2015, and Indonesian Ministry of Finance decree number 149-PMK.04-2015, all Administrative and Technical Staff (regardless of Service affiliation) are NO LONGER ALLOWED to import a POV (car, motorcycle, or moped) into Indonesia. This restriction DOES NOT apply to members of the diplomatic staff (those having diplomatic rank). (CH 02-Dec-2015 SDDC-PAC RB)
(1) The Government of Indonesia (GOI) must approve all POV imports before the POV is shipped. Personnel should contact their organization of assignment to determine their eligibility for POV importation and to provide information required to obtain GOI approval. The GOI prohibits importation of POVs for persons on the Diplomatic List and personnel assigned to the office of Military Attached for Defense Program (OMADP). Only sedan and sedan-type station wagons with engine displacement of less than 4000cc and costing less than $30,000.00 (excluding insurance and freight) may be imported. Vans buses, 4-wheel drive vehicles (except RAV 4 type of vehicle) and trucks are specifically prohibited. (2) The GOI will give approval ONLY AFTER the member arrives at post and has obtained his/her Diplomatic ID Card. Personnel may not ship POVs until this approval is received. For personnel desiring to ship a POV The following information will be provided by message to: AMEMBASSY JAKARTA //TRANS OFF// with info to USDAO Jakarta, ID, and ODC JAKARTA ID//XO// as soon as possible after receipt of assignment notification or fax directly to GSO/TRS (62-021-3435-9923). Experience with GOI indicates 60 to 90 days may be required to obtain the advance approval.

(g) Estimated date of importation.

b. MOTOR CYCLES/MOPEDS

Per U.S. Embassy Jakarta/USASEAN Management Notice 192-15, dated 16-Nov-2015, and Indonesian Ministry of Finance decree number 149-PMK.04-2015, all Administrative and Technical Staff (regardless of Service affiliation) are NO LONGER ALLOWED to import a POV (car, motorcycle, or moped) into Indonesia. This restriction DOES NOT apply to members of the diplomatic staff (those having diplomatic rank). After Motorcycle Importation review on Jan 2016, The Government of Indonesia considers a motorcycle as a POV and it will be processed through regular POV channels. Motorcycles cannot be shipped with HHG; it takes months to bring any vehicle into Indonesia, so the HHG and motorcycle cannot be linked or HHG would also take 4 to 6 months to clear. Shipment of a motorcycle cannot even START until AFTER the individual arrives and is accredited. Once accreditation is approved, the vehicle must have permission to enter the country before it can begin transport to Indonesia. This also means no other vehicle can be imported or purchased duty-free. Average time of POV or motorcycle clearance/entry into the Indonesia is 5 to 6 months AFTER arrival. The MFA is not consistent about permitting importation of motorcycles, so it has to be done on a case-by-case basis. If post has the motorcycle specifications first, post can discuss this with contacts in the MFA. Motorcycles and scooters are plentiful in Indonesia so if shipping is not an option, one may be purchased fairly easily. It is dangerous, however, to use a motorcycle on the MASSIVELY OVERCROWDED streets in Jakarta. (CH 07-May-2017 SDDC-PAC RB)

c. GASOLINE/CATALYTIC CONVERTERS

No restrictions on catalytic converters. Unleaded gasoline is available. (CH PPP-POP 3-10-2010)

All personal vehicles must be covered by third-party liability insurance. The AMEMB Jakarta recommends individuals carry a minimum amount of IDR 300,000,000.00 (USD 32,786.88) in coverage. The cost for this amount of coverage is approximately IDR 2,500,000.00 (USD 273.22 per year). (CH PPP-POP 3-10-2010)

Personnel contemplating retirement, separation, or relocating dependents to Indonesia should be counseled that all customs entry requirements to include payment of duties and taxes remain the responsibility of the member and is a personal matter between the member and the Government of Indonesia (GOI).

13. OTHER
Personal Effects: Do not mingle personal effects with MAP supplies and equipment. Such a practice will cause difficulty in obtaining release of personal effects due to import clearance from the Government of Indonesia (GOI). Do not containerize POV with liftvans either, as the clearance process for vehicles will not allow the release of HHG until approval is received, sometimes a 3 month process.

2. CUSTOMS CLEARANCE PROCEDURES, REQUIREMENTS, AND RESTRICTIONS

Irish customs require a full inventory of all incoming shipments be furnished with customs clearance and transfer of residency forms in order for shipping agent to clear all HHG and air freight arriving in Ireland. It is important to mail one copy of all inventories and other documents to post as soon as they are available so shipments will not be delayed. These documents should be addressed to the
shipment assistant. Without inventories post faces difficulties in obtaining release of shipments. Customs will refuse release and charge exorbitant storage fees. Upon submission of inventories customs will release shipments.

6. PETS/QUARANTINE

Ireland requires an extensive six-month quarantine for all animals (including birds) unless they are arriving from the United Kingdom, where they have been for a minimum of six months. No exceptions are made. The animal must arrive with a valid shot record, a current rabies shot (administered no more than 30 days prior to arrival), and a certificate of good health. The originals of these documents should travel with the pet but be sure you also have copies. Cost ranges from around 1500 dollars for a cat to over 2200 dollars for a dog, depending on size. Ireland has only one approved quarantine facility which is located on the outskirts of Dublin. You should contact the Irish Department of Agriculture’s Veterinary Division for further information.

7. PRIVATELY OWNED FIREARMS (POF)

No restrictions identified.

a. HAND GUNS

Local law requires a gun owner must be in possession of a current Irish Firearm Certificate (Gun License) for each firearm prior to importation into Ireland. In the absence of the owner's Irish Firearm Certificate, Irish customs will take possession of the firearms at the port of entry and will hold them until a firearm certificate is shown by the owner, at which time the firearms will be released to the owner. Irish laws governing the use and possession of any type of firearm are strictly enforced with heavy penalties. No person under the age of 16 years may own or use a firearm and will be denied a firearm certificate. A primary requirement of obtaining a Firearms License is the owner's proof of membership in a local gun club (approx USDOLS 45.00 to 55.00 per year) or permission from two local landowners to hunt on their property (no charge). The following are prohibited for importation or purchase throughout Ireland: (1) Automatic weapons (repeater and automatic shotguns must be adapted so that they carry no more than three cartridges); (2) Guns exceeding .22/250 (5.6mm) calibre or with a barrel shorter than 24 inches; (3) Cross bows. (4) Up to 500 cartridges may be imported with each gun. Cartridges of any bore are generally available in the larger Irish towns. Smaller towns will usually supply 12 bore cartridges, but there may be some difficulty in purchasing ammunition of smaller bore.

b. RIFLES/SHOT GUNS

Employees must have the following information for each gun in order to complete the necessary application forms: (1) For rifle or airgun, air rifle, and shotgun: Applicant's date of birth; (2) Calibre, manufacturer, and number of gun; (3) Whether single or double barreled, or repeater; (4) Bore (calibre); (5) What type of birds or animals you hope to shoot; (6) Number of rounds of ammunition to be imported with gun; (7) details of any firearm certificate now held by you; (8) ETA of gun into Ireland.
Deer hunting requires a Special Firearms Certificate and Hunting License. Rabbits are open season all year round and no hunting license is required. Long bows require a separate license in place of the Firearms Certificate, evidence of membership in a long bow club.

d. OTHER (i.e. AMMO, EXPLOSIVES, ETC)

8. PRIVATELY OWNED VEHICLES (POVs)

Do not pack Certificate of Title with HHG or POV as this is required to clear vehicle thru customs. All vehicles of 4 years or more will be required to pass the National Car Test to obtain a certificate of competency.

b. MOTOR CYCLES/MOPEDS

No restrictions identified.

c. GASOLINE/CATALYTIC CONVERTERS

d. INSURANCE AND SAFETY REQUIREMENTS

Motor Insurance in Ireland is extremely expensive. A minimum of third party coverage by an Irish insurance company is mandated by Irish Law. The following list includes factors which inflate already costly insurance premiums: (1) Imported/Non-standard vehicles to Ireland including left-hand drive vehicles; (2) Soft top convertible vehicles; (3) Vehicles in excess of 2000 C.C.; (4) Drivers under 30 years of age; (5) Drivers with no previous insurance record; (6) Drivers with previous accidents/convictions; (7) Vehicles with markings indicating a higher performance engine, e.g. turbo, GTI, etc. e. Inbound military personnel who are coming to Ireland on a transfer of residency basis are permitted to import one vehicle free of local duties provided vehicle has been in their possession for a period of at least six months prior to shipping. A valid certificate of title is required to register the vehicle.

8. PRIVATELY OWNED VEHICLES (POVs)

No restrictions identified.

a. POVs (includes data on prohibited vehicles, colors, etc.)

The Israeli Ministry for Foreign Affairs and Customs Authorities do not authorize the importation of POV's until the owner has arrived in country. Please make sure that the arrival of a POV coincides with that of the owner. (1) VEHICLE DETAILS: The following details must be forwarded to post: make and model, year, engine size (very important) and VIN No. Before shipping a POV please fax and send a copy of vehicle title to: 1) American Embassy Tel Aviv, Israel GSO Shipping, FAX 011-972-9-955-8656, Email: TelAvivGSOSShipping@state.gov. 2) American Consulate, Jerusalem, FAX: 011-972-2-622-3561, E-mail: JerusalemShipping@state.gov. (2) REGISTRATION: US spec POV's are allowed to be imported. Before shipping any vehicle to Israel please check with the
appropriate local transportation office. (3) ADDITIONAL INFORMATION: Employees are exempt from customs duties on bought or imported vehicles. However, such duties will have to be paid when selling a vehicle on the local market and therefore will have a direct bearing on your ability to sell the vehicle upon departure. Customs duties are based on each vehicle and on the current customs regulations in force at the time. The age of the vehicle does not necessary allow for graded reduction. (4) RESTRICTIONS: The importation of diesel powered vehicles (older than 4 years) or right hand drive vehicles is not permitted by the GOI. (5) SECOND VEHICLE: Employees, if accompanied by a spouse, are permitted to import or purchase a second POV duty-free.

c. GASOLINE/CATALYTIC CONVERTERS

Unleaded fuel is available; therefore catalytic converters do not have to be removed.

d. INSURANCE AND SAFETY REQUIREMENTS

Insurance costs in Israel are subject to the Dollar rate and Inflation and can very greatly depending on the type of vehicle. There are 2 basic kinds of insurance in Israel. (1) Mandatory Insurance: This is a statutory insurance set by the Government of Israel (GOI). Its purpose is to cover bodily injury to any person involved in an accident. No vehicle may be registered or driven on Israeli roads without this insurance. This insurance costs between 500-900 USD (depends on the make and model, engine size or weight of the car). (2) The second kind of insurance, which covers damage to property, can be split into different levels of coverage: I) Third Party/Liability covers damage to the other party's vehicle. II) Comprehensive/collision covers all eventualities e.g., theft, damage to owner's vehicle. The policy may be purchased locally or from the US, however, please note that some US policies do not cover for third party. In addition, please check when purchasing a US policy how you would be represented locally in the case of an accident. Embassy policy requires at least third party coverage for all Embassy POV's.

Local regulations require that in some cases shipments be opened, inspected, and assessed by Customs Authorities, in owner's presence, at port of arrival and any custom duties and/or import taxes be paid before goods are released for onward movement to final destination. Therefore, owner must ensure that if required, they are present at the time of release of their effects. They must also make certain they fully understand any limitations in their Israel Visa category before their arrival in Israel, which might cause unnecessary delays in releasing their shipments. b. Household effects must be consigned to the owner and shipped by prepaid seafreight only. AMC flights should not be used for this type of shipments. Destination PPSO is TMO, Israel tel. 011-972-9-956-7081 fax. 011-972-9-950-1611, E-mail: Laurence.Bliss.is@dcma.mil.

(1) Aviano AB: Members should contact their sponsors for specific information. Currently the Furnishing Management Office (FMO) provides all major household appliances, wardrobes and transformers to operate the small appliances since there is a difference in wattage. (2) Leghorn: Ranges, refrigerators, washers, dryers, kitchen cabinets, and wardrobes should not be shipped as these items are provided by Central Furnishing Management Office. Non-temporary storage of items shipped is not authorized. (3) Naples: Ranges, refrigerators, freezers, washers, dryers, kitchen hutches, and wardrobes should not be shipped as these items are provided by Partial Full Tour Furnishing (PFTF). We advise the service member to check with his or her sponsor for details. (4) NAS Sigonella: It is not recommended to ship major electrical appliances due to the difference in wattage. The Housing Office provides the following items for use in on and off base housing: washer, dryer, refrigerator, stove, microwave, kitchen cabinets, wardrobes, transformers, gas detectors, carbon monoxide detectors, computer desk, standing fan, and medicine cabinet. We strongly advise that the member check with his sponsor before arranging his shipment to Sicily. (5) La Maddalena: It's not recommended to ship a range, freezer, refrigerator, kitchen cabinet, washer, dryer and wardrobes, these items are provided by the Housing Office upon request. (CH)

5. FURNITURE, OVERSIZED

Government and Economy living quarters are generally smaller than those in CONUS. Economy housing in Italy accommodate more HHG than government quarters, but are still smaller than homes and apartments in the United States. Many have narrow doorways and tight stairwells that cannot accommodate furniture that would fit easily into an American home. Service members shipping large items such as king and/or queen size box springs and mattresses, oversized sofas, or other large furniture items that cannot be disassembled, may encounter problems when residing in government or economy housing due to narrow stairwells. Washers, dryers, ranges, refrigerators, kitchen cabinets, and wardrobes are furnished for Government and Economy quarters. There is no Non-temporary storage in Europe authorized for HHG shipped in excess of what will fit, or is too large to be placed in, the Soldiers living quarters. Excess property shipped will not be stored at Government expense. Storage will be at the Soldiers expense.

6. PETS/QUARANTINE

Standards laid out in the following document address requirements for shipping dogs, cats, and ferrets from the United States. PLEASE NOTE: Ferrets are not accepted as pets for movement on AMC military or commercially contracted aircraft. If you require information on shipments for ferrets or other exotic pets please contact your local USDA field office. NOTE: For the remainder of this document the term pet or pets refers to dogs and cats only. ATTENTION: An examination fee of 55 Euro per pet will be implemented February 1, 2013, for all non-EU citizens who import a pet into the country. A. Quarantine Period - There is no quarantine period for
pets entering Italy.

B. Identification (Via standard electronic identification system with a read-only passive radio frequency identification device known commonly as a transponder "Microchip"): (1) Complies with ISO standard 11784 and 11785. (2) Where the microchip does not comply with ISO standard 11784 or 11785, the owner or the natural person responsible for the pet on behalf of the owner must provide the means necessary (Microchip Reader/Wand) for reading the non-ISO compliant microchip at the time of inspection. (3) The microchip must be implanted before the primary rabies vaccination or valid rabies booster is given to the pet before traveling:

a) Primary Rabies Vaccine - This is the first rabies vaccination a pet ever receives; for EU countries this also applies to the first rabies vaccine given after the microchip was implanted; that is, rabies vaccinations received prior to the pet being microchipped are NOT recognized by the EU.

b) Valid Rabies Booster - This is a rabies booster that was given to the pet before the previous (Either the primary rabies vaccine or another rabies booster) rabies vaccination expired.

C. Rabies Immunization: (1) Usually is required for all pets entering Italy. (2) Pets less than three months of age coming from the United States may not always require the rabies vaccination IF: (a) These pets have pre-authorization from the EU member state BEFORE entering the country. (3) Any one year dose or three year dose rabies vaccine is valid as long as it is a U.S. approved vaccine, and was administered according to the manufacturer's specifications (for instance, a vaccine labeled for 1 year use cannot be utilized as a 3 year vaccine). (4) A valid rabies vaccine must occur after the animal has been microchipped to be valid for entry into an EU member state. (5) At least 21 days must have elapsed between the completion of the primary rabies vaccination (as specified above) and before the pet enters the EU member state.

However, if the animal received a valid rabies booster after -- 21 days do not have to elapse before travel. (6) If a pet has received a non-ISO compliant microchip and then received a valid rabies vaccination with 21 days having elapsed since that vaccination and entering the EU member state; they:

(a) Do not require implantation of another ISO compatible microchip, but are required to carry with them a microchip reader/wand capable of reading the non-ISO compatible microchip implanted in their pet.

(b) Do not require administration of another rabies vaccination before traveling as long as the rabies vaccination received is still valid.

(c) Can have an ISO compatible microchip implanted in their pet so they do not have to carry the reader/wand with them. If they get this ISO compatible microchip implanted, they do not have to receive another rabies vaccination following this second microchip implantation. They are only required to document both chips on the required forms with their implantation dates.

D. Documentation (Verify the correct required documentation with your local USDA office): (1) APHIS Form 7001 (Nov 2010) - Acquired from any Army veterinarian, local veterinarian or USDA office. (a) Valid for only 30 days after issuance. (1) Timeframe the form is valid can be shortened per the requirements of the Airline the service member is traveling on.

(b) Requires certification by a USDA Accredited Veterinarian, Army Veterinarian, or GS 0701 Veterinarian before travel. (c) This form is not required to enter the European Union (EU). However, it’s highly recommended that service members acquire this form before travel from their on-base Army veterinarian to preclude the following: (a) If a member flies on a commercial carrier they may be required to have this form. (b) If a member is scheduled to fly Patriot Express and somehow has to divert to a commercial carrier, having this form in advance alleviates last minute costs ($200) or delays. 2. This form is not required to travel on Patriot Express.

(2) EU Non-Commercial Pet Form (Bilingual Health Certificate): (a) See link Under Pets heading Pets Dog, Cats, and Ferrets) http://www.aphis.usda.gov/regulations/vs/iregs/animals/animal_italy.shtml (b) Valid for 10 days to enter European Union and 4 months once inside the European Union.
Timeframe the form is valid can be shortened per the requirements of the Airline the service member is traveling on. Requires certification by a USDA Accredited Veterinarian, Army Veterinarian, or GS 0701 Veterinarian before travel. Helpful Hints: (1) As soon as you know you are going to travel and no later than 22 days prior to travel, get your pet microchipped first and then vaccinated for rabies if you have not already done so. Remember: A VALID RABIES VACCINE MUST OCCUR AFTER THE MICROCHIP IS IMPLANTED. (a) This will ensure the required 21 days has elapsed post vaccination prior to travel. (2) When completing your required documentation (before you mail the forms or travel to your local USDA office to get them certified, if not using your on base Army veterinarian), fax or over-night ship them to your local USDA office to ensure they are filled out correctly before traveling to their office. (a) This will ensure you do not waste travel time or postage only to have to redo the paperwork. (3) Many overseas bases have a full-time veterinarian on staff as well as commercial veterinarians available on the economy. (a) Most bases require pets to be registered with the base veterinarian after arrival. Check with base veterinarian for details. (4) The pet cage or carrier (See carrier shipping rules for correct cage dimensions based on pet size) used for shipping the pet must be labeled with the owner’s name, pet's name, owners (or nominated persons) address, contact number and contact in Italy. (5) Since 21 Apr 2001, Germany has had a law in place prohibiting importation of certain dog breeds regarded as dangerous. For more information consult http://www1.zoll.de/english_version/a0_passenger_traffic/e0_vub/h0_dangerous_dogs/index.html. You may also contact the base veterinarian at your destination.

F. Unauthorized Pets: The import of Pit bull Terriers, American Staffordshire Terriers, Staffordshire Bull Terriers and their crossbreeding is prohibited. G. Fees: (1) The USDA form certification fee (approximately $70+, plus any shipping and handling if by mail). (2) Transporting pets to and from the PCS destination is at the member’s expense and cost is based on the size of the pet being transported. Connecting flights may have fees in addition to AMC fees from BWI. (3) EFFECTIVE 1 February 2013, The fee for the import examination is 55 Euro. (4) All pet requirements are at the member’s expense.

7. PRIVATELY OWNED FIREARMS (POF)

Shipping of any kind of weapon is prohibited. The Italian Government has imposed a ban on shipment of privately owned firearms to Italy. POF includes any weapons that is designed for or can be readily converted to be used for attack, defense, sports, games or hunting by driving a projectile through the barrel. This includes air pistols, air rifles and firing replicas of antique firearms. Additionally, it includes spring-opening knives, fixed bowie knives, straight-edge razors, brass knuckles, blackjack devices, cans with sharpened points, pipes, chains, slings, metal spheres, and any other like weapon which may be used for offending a person is forbidden. Vehicles must be in mechanically safe operating condition and each must undergo a detailed safety inspection. Vehicles that do not conform to the mechanical and safety standards may be denied a decal and/or temporary pass for operation aboard the military installation. Common causes of POV inspection failures in Italy are:

2. **Horns:** A POV must be equipped with horns capable of being heard at least 200 feet.
3. **Lights:** All installed lights must be operational. The tail lights or a separate lamp must illuminate the rear license plate. Backup lights must function when the transmission is engaged in reverse gear. All POVs except light motorcycles or mopeds 50cc or less will be equipped with directional signals.
4. **Tires:** All tires must have at least 1mm tread over the complete tire surface. No re-grooved tires are allowed; the tires must be mounted on the drive wheels of the vehicle, unless the POV is equipped with snow tires. Tires extending laterally beyond the fenders are prohibited.
5. **Windshield Wipers:** Must be operational and the blades serviceable.
6. **License Plates Mounts:** All vehicles require front and rear license plate mounts.
7. **Others:** Faulty exhaust system, exterior condition (missing fenders, broken windows, etc.), missing mirrors, and improper wheel alignment (wheels that cannot be turned from full right to full left without jamming or rubbing part of the vehicle).

**VPC: Livorno, Italy**

Requirements: "Members shipping a POV to Italy are advised that it is extremely important that the owner's name shown on the title of the vehicle or the current vehicle registration must match the name of the person registering the POV. The Italian customs does not accept a power of attorney from any person other than the person whose name is shown on the title of the vehicle or the current vehicle registration to register a POV."

**AVIANO REQUIREMENTS:** All POVs operating on Aviano Air Base will conform to POV Safety Standards outlined in Aviano Instruction 24-307 (available on the Aviano Air Base Web-Page [https://avo-intranet/LogReadiness/_html/lgrvm_pov_main.htm]).

**POV DOCUMENTATION:** Duty-free clearance of POV and/or motorcycle/moped shipped as a POV is arranged by military terminal personnel at the port of entry. In order to complete this procedure expeditiously, it is imperative that the DD 788 or DD 788-2 clearly states the correct chassis and license of the vehicle imported. To further expedite customs clearance and vehicle registration, ensure that the advance copy of the DD 788 or DD 788-2 is mailed to the destination ITO/TMO prior to shipment arrival. Also ensure member retains a legible copy of the DD 788 or 788-2 for both automobile and/or moped/motorcycle shipped as POV. "Members shipping a POV to Italy are advised that it is extremely important that the owner's name shown on the title of the vehicle or the current vehicle registration must match the name of the person registering the POV. The Italian customs does not accept a power of attorney from any person other than the person whose name is shown on the title of the vehicle or the current vehicle registration to register a POV."

**a. POVs (includes data on prohibited vehicles, colors, etc.)**
(1) The Italian Ministry of Finance (Customs) authorizes DOD military and civilian employees to import, free of duty taxes, no more than three privately-owned motor vehicles including motorcycles for personal and/or family member’s use. However, only one is authorized at government expense. b. MOTOR CYCLES/MOPEDS

FOR ASSISTANCE AND CLARIFICATIONS ON MOTORCYCLE AGE RESTRICTIONS FOR NAVY PERSONNEL ASSIGNED TO NAPLES AND SIGONELLA, PLEASE REFER TO THE APPROPRIATE PPCIG INTERNATIONAL PPSO PAGE. NOTE: Motorcycle age restrictions ONLY affects Air Force members assigned to Aviano Air Base, Italy. To drive motorbikes, starting 19 January 2013, there are three different kinds of driver’s licenses: A1, A2, or A. A1 driver’s license can be obtain with 16 years of age and allows driving small motorbikes, A2 driver's license it is an intermediate license slightly different from the one that was released prior than 19 January 2013 because allows, from 18 years of age on, to drive motorbikes which have a slightly higher power. Driver's license A, no limits driver's license, also known as A3 driver's license, allows driving all kinds of motorbikes but now, it can be obtained only after 24 years of age. The age limit can be lowered to 20 provided that an A2 driver's license has been issued to the driver since at least two years. The driver who already has the B driver's license, to obtain the A driver's license only need to take the practical exam. To start driving a motorbike prior than 24 years of age, it is then possible to obtain A1 driver’s license starting with 16 years of age or A2 driver's license starting from 18 years of age. It is important to underline the fact that the concept of loss of limits does not exist anymore: to pass from one category to the other it is always necessary to take the corresponding practical exam. CONTACT the destination TMO/ITO before shipping your motorcycle! ATTENTION: Personnel assigned to Aviano AB are NOT authorized shipment of any Off-Road vehicle to this location regardless of the cc’s. 1. All mopeds, motorbikes, and motor scooters shipped with HHG are entered duty free, but must be licensed and registered with the motor vehicle registration office prior to use on the road. Plates will be not issued for those less than 50 cc. To operate any motorcycle, or other two wheeled vehicles the registered owner/operator must be 18 years of age and have a motorcycle endorsement on the state side license. Also before registration and licensing all individuals must show evidence of successfully completing an approved motorcycle safety course. (CH) 2. To effectively clear customs by local port officials, all mopeds/motorcycles shipped with HHG must be packed in a separate container (Container # 1). a. Crate must be properly marked on the outside of the crate that this shipments contains a motorcycle/moped b. Government Bill Of Lading i. Block 27 1.
This shipment consists of one lot of household goods and motorcycle (Type, chassis/serial number)

c. Inventory must include: i. Type, Year and Make of Motorcycle/Moped ii. Serial/Chassis Number  
   d. Transportation Control and Movement Document (TCMD) i. Type, Year and Make of Motorcycle/Moped ii. Serial/Chassis Number  
   3. A copy of the title/registration, the members orders, GBL and inventory regardless on destination must be sent to Personal Property Shipping Office, Attn: Motorcycle Clearance, PSC 808 Box 42 FPO AE 09618  
   4. Failure to comply with this requirement could result in the return of the motorcycle/moped, confiscation by Italian Customs Authority, fine or penalty and paid of importation fees.  
   5. Carrier Must Ensure the following:  
      a. Inventory is properly prepared  
      b. GBL is annotated with the motorcycle  
      c. Ocean Bill of Lading Identities that shipment contains motorcycle  
      d. Advance paperwork is forward to General or Port Agent. (Vicenza and Livorno) The following guidance is provided to assist with shipment of motorcycles into Italy for GBLOC: WKAS area of responsibility. Motorcycles may be shipped as Household Goods but must be packed in a separate container and listed on the inventory with make, model and chassis number in addition block 27 on the PPGBL and/or the TCMD must identify the make model and chassis number, (example: THIS SHIPMENT CONSISTS OF ONE LOT OF HOUSEHOLD GOODS WITH A 1984 HONDA 750CC MOTORCYCLE CHASSIS/SERIAL NUMBER JT2AM21). When the origin installation fails to give destination prior notification of shipments with a motorcycle, major problems with the Italian Customs Authority can occur. A COPY OF THE ORDERS MUST BE IN THE ADVANCED PACKAGE TO THE TSP, OTHERWISE THE MOTORCYCLE CANNOT BE CUSTOMS CLEARED. Failure to properly import the motorcycle is a violation of Italian Law and requires a formal letter of explanation to the customs office on why the motorcycle was not cleared properly and request after the fact clearance. Italian Customs can fine the US Government, the member or confiscate the motorcycle. After the fact and approval is not guaranteed. Prior notification by the origin PPSO will prevent these problems. For questions please contact GBLOC: WKAS, Inbound Branch usarmy.rheinland-pfalz.405-asfb.mbx.basops-inbound@mail.mil  
      Origin PPSO must have the member provide clear and legible copy of the title and registration to their office. If the title is held by a lien holder, customs MAY accept a letter from the lien holder authorizing the motorcycle to be exported, although there is no guarantee that customs will accept such a letter but the member still needs to provide it. Without the title and registration or letter from lien holder, the member may be subject to duties, taxes, as well as, having to finalize customs and register their motorcycle on their own: Origin PPSO will provide the copies of the paperwork to the TSP so they can forward the paperwork to their Italy agent prior to arrival of the motorcycle in Italy: TSP responsibility - The ocean bill of lading (OBL) must list the motorcycle, VIN number, make, and model (it will be up to the TSPs to instruct their CONUS port agents accordingly). Italian Customs require motorcycles to be cleared at final destination rather than at the port of entry. NOTE: Motorcycles will be moved from the Italian port of entry to destination on a requested AE Form 302 issued by GBLOC: WKAS. In order to prepare the AE Form 302, the above-mentioned information must be noted on the GBL, inventory and OBL. Shipments being custom cleared will require 2 (two) AE Form 302 request from the TSP (1 for household goods and 1 for motorcycles). If this information is not available, the motorcycle container and household goods containers will be delayed pending customs clearance at the port. Upon arrival at final destination, customs requires copies of the title and registration. NOTE: These requirements do not apply to off-road bikes (dirt bikes), as they do not have to be registered in Italy. If off-road bikes are declared on the GBL and inventory document as motorcycle and not dirt bike, this will cause major problems and delays in the customs clearance process.

c. GASOLINE/CATALYTIC CONVERTERS
1. There is adequate availability of unleaded gas to accommodate the operation of catalyst-equipped POVs. Members shipping a POV to Italy no longer must remove their catalytic converter to participate in the DOD Importation Control Program. There are no approved facilities for removing/refitting catalytic converters.

d. INSURANCE AND SAFETY REQUIREMENTS

(1) Insurance is required to operate all vehicles on Italian highways. (2) Automobile insurance for the Naples area is expensive. Cost depends on make, model, and year of vehicle with the annual premium for minimum coverage costing up to $4,000.00 per year. Vehicles cannot be released for registration and use, without proof of valid insurance. (3) Liability insurance with equivalent dollar minimum of 100,000-50,000-10,000 is currently required. Individuals who retain this coverage with US companies must possess a valid insurance green card. Insurance is available on the local economy.

12. SEPARATEES/RETIREES ENTITLEMENTS/LIMITATIONS
Retired personnel who choose Italy as home of selection and wish to ship their household goods should contact the nearest Italian Embassy or Consulate for information concerning customs, taxes, and any other requirement in connection with importation of personal property into Italy or obtain the Certificate of Residence issued by the local Italian area city Municipal Hall officials. When accomplished and prior to shipment arrival, contact the commercial carriers broker with the documents to obtain clearance. Shipments may be made on the PPGBL (SF1203), however, upon shipment arrival the customs clearance process is their responsibility and is not authorized at government expense. The GBL when issued must be annotated in block 25 with the words retirement or separation shipment.

13. OTHER

Strongly recommend that member shipping full JFTR carefully select those items needed to establish living comfort, considering economy and government lease quarters are in almost all cases, smaller than those found in CONUS. Storage space in these quarters is very limited. Ranges, refrigerators, washers, dryers, kitchen cabinets, and wardrobes should not be shipped as these items are provided by family housing. Except for temporary loan, no other items are available. Non-temporary storage of items shipped is not authorized.

Members must be counseled on items provided to them (i.e. washer, dryer, refrigerator, stove, etc.), type of housing available to them and size of houses to determine what to ship and what items to place in NTS for the duration of their tour in Japan. All worldwide Personal Property offices must consult each installations specific PPCIG instructions to properly council member.----Consistent with Air Force policy all unaccompanied members are authorized either an unaccompanied baggage shipment or elect 10% of full JTR weight entitlement via surface. However, AFI 24-501, Table A3.1, Rules 2 and 4, and the Overseas Furnishings and Housing Availability report may authorize additional weight contingent upon the members rank or employees grade and unaccompanied housing availability. All additional authorized weight must be identified on members or employees PCS orders.--b. Air Force personnel assigned to non-AF installations (e.g., Camp Zama, etc) receive the same weight entitlement as host-base personnel, unless gaining MPF (identified on PCS orders) dictates a higher weight entitlement.3. NAVY PERSONNEL (Also see Item 7 below):--a. Navy personnel assigned to a USMC Command or Unit ok Okinawa, Japan: 25 percent of full JTR weight allowance or 2,500 pounds, whichever is greater. (CH SDDC-PAC-27-Oct-2016)--b. Japan (Includes Navy personnel assigned to a Non-USMC Command or Unit on Okinawa, Japan): Full JTR weight allowance. (CH SDDC-PAC 27-Oct-2016 RB).----(1) This DOES NOT indicate customers should ship their full authorized weight.----(2) Housing in Japan is smaller than homes in CONUS.----(3) Commercial storage in Japan is almost non-existent and Base Housing Offices will NOT fund overflow items to be sent back for Non-Temporary Storage.----(4) Average waiting time for military on-base housing is 12-24 months.----(5) Civilians are recommended to contact their respective Base Housing Office for on-base military housing entitlement.----(6) Contact the new
Command, Unit, Sponsor, or Base Housing Office for the size and or square footage of the Government, Privatized, Economy, or Unaccompanied Personnel Housing to determine what items to ship and what items to place in NTS for the duration of tour in Japan.----(7) Government appliances (washer, dryer, refrigerator, cooking stove, air conditioner, and kerosene heater) are provided by each Base Housing Office; for on-base. Loaner furniture (tables, chairs, chests of drawers, and beds) may also be available upon request while waiting for HHGs to arrive.----(8) All worldwide Personal Property Offices MUST consult each installations specific PPCIG instructions to properly counsel customers. (Also see Item 5. FURNITURE, OVERSIZED on the Country Instructions Main page.)

(1) OKINAWA, JA: 25 percent of full JTR weight allowance or 2,500 pounds, whichever is greater. MCB Camp Butler continues to receive personal property shipments in excess of the JTR administrative weight restrictions. Improper counseling by ITOs has caused financial hardship for Marine Corps and Navy members attached to MCB Camp Butler. Close examination of the area clearance, which required for accompanied tour personnel, is necessary.----(1) Accompanied tour personnel are authorized to ship 2,500 lbs or 25 percent of their full JTR weight allowance, whichever is greater. Additional weight items not provided by base housing is clarified in the area clearance. An unaccompanied baggage shipment is authorized not to exceed 600 pounds for active duty member and 200 pounds each family member.----(2) The weight of the Unaccompanied Baggage shipment, minus PBPandE and Required Medical Equipment, DOES count against the Administrative Weight Limitation (JTR, Appx W, paras. D and F). (SDDC-PAC 10-Sep-2015 RB)----(3) Colonel (06) on accompanied tour at MCB Camp Butler is authorized 10,000 pounds of HHG.----(4) BGEN (07) and above are authorized full JTR weight allowance on accompanied tour.---b. MCAS IWAKUNI, JA: (CH)----(1) Effective immediately, accompanied tour personnel are authorized to ship 75 percent of their full JTR weight allowance. Due to the generally smaller size of government quarters available aboard MCAS Iwakuni, large furniture items such as oversized couches sofas and king size bed sets should be placed in NTS at origin. An unaccompanied baggage shipment is authorized not to exceed 600 pounds for active duty member and 200 pounds each family member. The weight of the Unaccompanied Baggage shipment, minus PBPandE and Required Medical Equipment, DOES count against the Administrative Weight Limitation (JTR, Appx W, paras. D and F). (SDDC-PAC 10-Sep-2015 RB) Limited exceptions may be granted on a case-by-case basis until 1 October 2006.----(2) Colonel 06 or equivalent on an accompanied tour as the Commanding Officer, MCAS Iwakuni or Marine Aircraft Group 12 is authorized full JTR weight allowance.----(3) Unaccompanied tour personnel (dependent restricted) are authorized to ship no more than 10 percent of the full JTR weight allowance, only if off base quarters are authorized by command. Be advised mostly all unaccompanied tour personnel are assigned to the barracks and off base quarters are limited. Only unaccompanied baggage shipments are highly encouraged for unaccompanied tour personnel. (AMSSD-PPP-PO 4 Aug 2010)5. DEPARTMENT OF DEFENSE EDUCATION ACTIVITY (DoDEA) personnel assigned to Okinawa are the responsibility of Kadena AB, Okinawa, JA.6. KADENA AB, JA: Personnel assigned to Detachment 1, 18 Combat Support Group, APO AP 96368-5198 are not authorized to ship POVs and HHGs.7. YOKOTA AB and MISAWA AB --On-Base First-- Policy:--Yokota AB and Misawa AB established an --On-Base First-- Policy for ALL accompanied and unaccompanied members. This policy applies to ALL Air Force AND Non-Air Force personnel with Permanent Change of Station Orders to Yokota AB and Misawa AB. Based on availability, members must accept an on-base Family Housing (FH) or Unaccompanied Housing (UH) unit that meets their respective grade and category. If there is no available housing ready for occupancy within a reasonable time as determined by the Housing Office, the applicant may be allowed to secure acceptable community (off base) housing. Unaccompanied personnel are required to reside on base in most cases and shipping excess personal property will not fit in UH. Personnel must coordinate
with their sponsors and base housing in advance to preclude hardships because the government will not ship the excess property back to NTS. Additionally, individuals with pets must also coordinate with their sponsor and the housing office because no pets are permitted in UH and or some accompanied FH (towers). 5. FURNITURE, OVERSIZED

---a. MISAWA AB: Due to shortage of Government-owned essential furniture items, members with pay grade of E5 and above serving an accompanied tour are required to ship privately-owned essential furniture items, i.e., beds, clothes chests, dining set, and living room sets to Misawa AB, JA, in conjunction with their PCS move.—ATTENTION: Please be advised all major appliances such as stoves, refrigerators, washers, and dryers are available and will be furnished by the Government. Exception is a freezer, which is not provided by the Government. Due to small size of on and off-base quarters, contact your local sponsor for additional data concerning size and available floor space of quarters. Consider NTS Non-temporary Storage (NTS) of nonessential items to avoid unnecessary and expensive commercial storage at Misawa area. (CH)—b. YOKOTA AB: Effective 1 September 1998, Air Force personnel assigned to Yokota will be authorized concurrent travel. Individuals should contact their sponsors or their gaining command to inquire about housing and the availability non-availability of government furnishings.—c. YOKOSUKA NAVAL BASE, YOKOHAMA, CFAY SASEBO, NAF ATSUGI, MCAS IWAKUNI: ALL DOD PERSONNEL MUST be counseled that Commercial Storage in Japan is almost non-existent. Most local economy Japanese-styled homes or apartments cannot accommodate large furniture items. Items may not fit through doorways, staircases, elevators or windows. Customers may incur excess cost to dispose of or relocate excess or oversized furniture. To avoid unnecessary and expensive commercial storage, large furniture items and major appliances such as a washer, dryer, gas range, freezer, refrigerator, large couches sofas and king size bed sets should be placed in NTS at origin for duration of the overseas tour. Major appliances are furnished in both Government Quarters and Off-Base Housing (local economy) upon request from the command-sponsored DoD customer.(CH 28-JUL-2015 SDDC-PAC RB)
6. PETS/QUARANTINE

--a. SHIPPING PETS----(1) The shipment of pets as excess baggage accompanying the member in PCS travel may be accomplished by requesting category --B-- travel.----(2) Advance (90-120 days) reservations are required for pets and should be requested at the same time PCS port call is being requested. There is no entitlement for shipment of pets at Government expense. Pet owners are responsible for making all travel arrangements, complying with shipping requirements, and all associated costs. (CH SDDC-PAC 14-Jan-2011 RB)--b. JAPANESE REGULATIONS----(1) Japanese Animal Quarantine Service Regulations require all animals entering Japan be examined to determine if they are free from communicable diseases.----(2) Animals found to be free from communicable diseases and meeting entrance requirements may be released to the owner s custody, subject to the restrictions discussed below.----(3) As of 6 June 2005, the Government of Japan (GOJ) began enforcing a new quarantine program for import and export of animals and pets.--------(a) Active duty military members, members of the civilian component and their respective dependents enter Japan under the US-Japan Status of Forces Agreement (SOFA). The SOFA sets forth rights and responsibilities applicable to US Forces individuals who enter Japan.--------(b) US Forces, Japan (USFJ) negotiated with the Government of Japan to resolve how this new pet quarantine program will affect SOFA status personnel. This document provides guidelines and recommendations for SOFA status personnel assigned to Japan who will be transporting personal pets into and out of Japan.--------(c) There will be some differences between how the new Japanese pet quarantine program will be applied to SOFA status members and how it will apply to others. Due to these differences, the information on the new pet quarantine program published by the GOJ, the US State Department, the USDA, and the USFJ may differ.--------(4) To minimize any inconvenience which might otherwise be experienced, we recommend following the guidelines listed below.--------(a) DO NOT HESITATE TO CONTACT THE INSTALLATION VETERINARIANS IN JAPAN IF NECESSARY. All contact information may be found on the Japan District Veterinary Command website: (http: www.usarj.army.mil organization vet index.htm).--c. LENGTH OF QUARANTINE----Ministry of Agriculture, Forestry and Fisheries (MAFF) quarantine inspectors and US Army Veterinary Command veterinarians will determine the length of each pet’s quarantine period when the pet arrives in Japan. The quarantine periods will range up to 180 days.--d. RECOMMENDATIONS----(1) The USFJ Veterinarian offers the following recommendations to assist SOFA status personnel in the movement of their pet to Japan. Each item listed below is important and must be accomplished AS SOON AS THE MILITARY MEMBER IS AWARE OF MOVEMENT TO JAPAN. This will ease the transition and acceptance of the pet into Japan.--------(a) Microchipping: Before completing any of the following requirements, PLEASE MICROCHIP YOUR PET FIRST. Any vaccinations or testing prior to microchipping will be considered invalid. All animals must obtain a microchip before arriving in Japan. ISO or ISO-compatible chips that meet the ISO 11784 and 11785 Standard are recommended. HomeAgain and AVID microchips are acceptable. The identification number of the microchip must be annotated on the Rabies Certificate, the Health Certificate, and on the rabies serology (FAVN) test results sheet.--------(b) Vaccinations: SOFA status personnel bringing a dog or cat into Japan should be prepared to present documentary evidence that their pet has had at least two rabies vaccinations since being microchipped.--------(i) The most recent vaccination must have been given not less than 30 days and not later than 12 months prior to arrival.--------(ii) The most recent rabies vaccination form (DD 2208, Rabies Vaccination Certificate) will be required and requires annotation of the microchip number.--------(iii) Complete information for the past two rabies vaccinations will be annotated on the health certificate (MDJ OP 2209, Veterinary Health Certificate for Import Export for Japan).--------(iv) The first rabies vaccine may be given at the
same time as the microchip. The second rabies vaccine booster should be given at least 30 days or more after the first rabies immunization.--------(c) Fluorescent Antibody Viral Neutralization (FAVN) Test:---------(i) This blood test needs to be performed after the second rabies vaccination and is good for up to 2 years.---------(ii) For PUPPIES and KITTENS (< 12 months): blood should be drawn >30 days after the second rabies vaccination.---------(iii) For ADULT DOGS and CATS (>12 months with a history of rabies vaccinations): blood can be drawn within 2 days or later of the second rabies immunization.---------(iv) A FAVN test result which indicates an antibody level greater than or equal to 0.5 IU ml is acceptable. The microchip number needs to be annotated on the FAVN test result form. The FAVN blood test can be ordered through Kansas State University Rabies Laboratory or DOD Veterinary Food Analysis and Diagnostic Laboratory, Fort Sam Houston, TX.--------(d) Advance Notification:---------(i) Kadena AB, Yokota AB, and Misawa AB currently have capabilities for handling AMC arrivals of dogs and cats so the ADVANCE NOTIFICATION IS NOT NEEDED IF THE ANIMAL ARRIVES AT A MILITARY INSTALLATION.---------(ii) If the animal is traveling by commercial air, the GOJ requires an advance notification of pet movement as soon as transportation is scheduled for SOFA members. A notification approval will be returned and is used when checking the animal in with the airline. Therefore, in order to avoid problems at check-in with the airline, this prior notification approval form is VERY IMPORTANT. Please annotate in the --Remarks-- box the following statement: --This pet belongs to a US SOFA sponsored family and will be assigned to (list installation).---------(iii) The advance notification form is found on the JDVC website:http: www.usarj.army.mil organization vet_r_doc.aspx---------(iv) The advance notification form is required to be sent by mail or by FAX to the port of entry. Addresses and FAX numbers for the respective port of entry may be found at this website (Narita arrivals should fax to Terminal 1): http://www.maff.go.jp/e/index.html--------(e) All incoming animals must enter Japan through officially designated ports:---------(i) Seaports: Keihin, Nagoya, Osaka, Kobe, Kanmon, and Naha.---------(ii) Airports: New Tokyo (Narita), Tokyo (Haneda), Nagoya, Osaka (Kansai), Fukuoka, Kagoshima, and Naha (Okinawa).---------(iii) Military AMC ports: Kadena AB, Yokota AB, and Misawa AB.--e. HEALTH CERTIFICATE:----(1) An individual health certificate is required for each animal that is moved into or out of Japan. The military health certificate is valid for 10 days and must be completed within 10 days before arrival. Please note the traveler will lose one day during travel to Japan from the US.----(2) The MDJ OP Form 2209 (Veterinary Health Certificate for Import Export for Japan) may be used by military veterinarians. The MDJ OP Form 2209 may be found onwww.public.navy.mil/surfor/lsd49/Documents/2209.pdf. (CH 09-Jan-2018 USTCI4-HB-PAC RB)--f. USDA CERTIFICATION:----(1) If a health certificate is issued by a licensed civilian veterinarian, the health certificate and rabies certificate must be certified by a USDA State Veterinarian and bear the USDA raised embossed seal. These health certificates are valid up to 30 days before arrival.----(2) Health certificates issued by a military veterinary treatment facility using the MDJ OP Form 2209 do not require the USDA certification.----(3) Airlines require a health certificate that is within 10 days of arrival. Therefore if the USDA certified health certificate isn not dated within 10 days of arrival, an additional certificate will be required within 10 days of arrival for the airline.----(4) The USDA certified certificate will be used upon arrival for processing the pet at Customs.--g. AGE REQUIREMENT:----(1) Japan discourages the importation of dogs and cats under the age of 12 months. These pets rarely meet the vaccination and FAVN test requirements prior to 11 months.----(2) Pets under the age of 11 months can be imported but must start out with a 180 day quarantine period. This quarantine period may be reduced if all of the steps above are completed before arrival in Japan. Primary emphasis is placed on microchipping, rabies vaccinations (one at 91 days of age followed by a second one not earlier than 30 days after the first), and the FAVN test (must be drawn not earlier than 30 days after the second rabies vaccination).----(3) For animals over the age of 12 months, with a history of vaccination, the primary difference is the FAVN
test may be performed any time after the second rabies vaccination. --h. OFFICIAL TRAVEL ORDERS
(2 copies): ---- Pet owners must submit Official Travel Orders upon arrival at the Animal Quarantine
Service in the airport Customs area to verify SOFA status. --i. MDJ Form 270 (Pet Quarantine and
Examination Certificate; 2 copies): ---- (1) All SOFA status personnel entering Japan with a pet must
complete a MDJ 270. The MDJ 270 allows your pet to be released to you for transportation to your
US Military Quarantine Facility. The form may be downloaded from the JDVC website and should be
completed prior to arrival in Japan. ---- (2) You must submit the form to the Animal Quarantine
Officer upon arrival, then to your US Military Veterinary Treatment Facility within 72 hours after
entry into Japan to continue and complete the quarantine processes. --j. USFJ Form 380 EJ
(Customs Free Import or Export of Cargo or Customs Declaration of Personal Property): ---- (1) This
form is required when your pet(s) enters Japan unaccompanied as cargo or on a different flight as
the sponsor. You do not need this form if you are accompanying the animal as baggage. ---- (2) You
can only use this form within 6 months of being assigned to Japan. After 6 months, you can still use
the form, but you may be required to pay any Customs duties associated with bringing a pet into the
country. You may obtain the form by having your sponsor take a copy of your orders to the
transportation office at your gaining command. The base transportation officer will sign the
appropriate box after verifying your orders. --k. Pet owners or their authorized representatives
should be prepared to provide the following information to the Animal Quarantine Officer: ---- (1)
Military mailing address ---- (2) Duty phone number (Ask your sponsor for a duty number) ---- (3)
Command information
NOTE: Placing the above certificates in a zip lock plastic bag and taping it securely to the top of the Pet's cage seems to work best. These forms must accompany the animal during transit. Ensure these forms are completely filled out. It is suggested that you carry in your possession the originals of each certificate. When clearing customs, all supporting documentation, including the animal's health record, must be available for referencing in case questions arise concerning the health and or identity of the animal and validity of the records. --l. QUARANTINE
PERIOD: ---- (1) The quarantine period is primarily determined by the date the blood for the FAVN
test was collected. This is only valid if the microchip was received prior to the two rabies
vaccinations and the rabies immunizations were received prior to the blood being drawn for the
FAVN test. The FAVN test result level must be equal to or greater than 0.5 IU ml. Equation used:
(180 days) minus (# days since blood drawn for an acceptable FAVN test at the date of arrival) = # of
quarantine days assigned. ---- (2) The earlier the pet meets the microchip, two vaccinations, and
FAVN test standards, the shorter the assigned quarantine period (up to 180 days).------- (a) Those
pets arriving with a FAVN test equal to or greater than 180 days and less than 2 years will be
released directly into the custody of the owners without a quarantine time period assessed.-------
(b) When the animal is taken to the Military Veterinary Treatment Facility within 72 hours after
arrival, the MDJ Form 270 will be completed by the Military Veterinarian and the quarantine process
is complete. ---- (3) Quarantine length is also assessed by the sequential order and completion of all
previous steps, the accuracy and the completion of all paperwork, pet identification and
documentation, including Health Certificates, Rabies Certificates, USDA certification (if required),
and Advance Notification Approval.------- (a) Any fault or deviation found in any of these areas will
result in an AUTOMATIC 180 DAY QUARANTINE PERIOD.------- (b) Military Veterinarians may be
able to reassess and correct quarantine periods associated with some paperwork mistakes.------- (4)
Home Quarantine:------- (a) SOFA status personnel are authorized to quarantine their animals in on-
base housing only.------- (b) Those pets assessed quarantine time, can complete it in the owners
home on base.------- (5) Kennel Quarantine:------- (a) Pets not meeting the entry requirements or
SOFA status personnel that are required to live in off-base housing must quarantine their animal(s)
at the owners expense in a quarantine facility.------- (b) Military quarantine facilities are available
but limited in boarding space. Please secure kenneling reservations ahead of time. If space is not
available the quarantine period must be completed at a designated Japanese Animal Quarantine Station at the arrival airport. See website: http://www.maff.go.jp/e/index.html

SPECIAL NOTE: (1) The practice of allowing pets to remain in the custody of their owners during the assigned --home quarantine-- period is a privilege and not an obligation on the part of Japanese authorities. Therefore, it is imperative U.S. Forces pet owners cooperate and fully comply with Japanese Quarantine Laws and military regulations pertaining to the requirements for examining or otherwise processing animals for entry into or exit from Japan. (2) Failure to present the animal to a Veterinary Treatment Facility (VTF) for the final physical examination is a serious violation of Japanese law and may result in a fine or other punishment. (3) Failure to comply with the requirements for final physical examination will result in a report of the incident being forwarded to the individual’s command. FORMS: (1) All forms and information may be found at the Japan District Veterinary Command webpage: www.usarj.army.mil/organization/vet/r_doc.htm (2) All contact information to include phone, email, and FAX information is also found at the JDVC website. A pet processing checklist is also available to assist clients and veterinarians in completing all requirements in a timely manner. Any questions may be forwarded to the respective Branch Chief or to Commander, JDVC.

Shipment of air guns, also called pellet or BB guns, that propel metallic projectiles are not authorized in any personal property shipments (household goods or unaccompanied baggage). Per USFJ 31-207, para 3.1., air guns (including those in which compressed gas is used) equipped with a mechanism for shooting metallic bullets are considered firearms under Japanese law. Paintball markers or paintball guns with a maximum velocity UP TO 300 Feet Per Second (fps) may be shipped in any personal property shipments (HHG and UB). All DoD installations in Japan do not prohibit shipment, storage, and use of paintball guns markers for use at MWR facilities that accommodate paintball tournaments and or activities. Per USFJ 31-207, para 6.8., paintball markers (guns) are authorized IAW Service Component and installation Commanders guidance. 8. PRIVATELY OWNED VEHICLES (POVs)

--a. POV shipments are subject to embargo or waiver requirements.----(1) Effective 1 April 1996, the Assistant Secretary for Defense (for Management Policy) has granted limited case-by-case, waiver authority to Commander USFJ for shipment of post 1976 type vehicles to Mainland Japan only.----(2) Okinawa continues to be under an embargo status and is not included under this waiver authority except for Category C POVs (see below).----(3) The waiver authority for Mainland Japan has been further delegated by USFJ to Component Commanders. SEE paragraph l. below for authorized Component Commanders.----(4) When requesting a waiver, the following information should be included:--------(a) make, year, model of vehicle--------(b) Vehicle Identification Number (VIN)--------(c) if equipped with California emission.--b. All DoD military members employees must obtain prior approval from their respective service authority in Japan named in para 8.l. All imported motor vehicles must be registered by the Government of Japan.--c. All DoD service members MUST be counseled on the following items:----(1) the high cost of initial registration of their POV in Japan ($3000 to $5000 dollars per vehicle based on 100 Yen to $1.00 US dollar).----(2) availability of parts and qualified maintenance----(3) emissions testing ($3,000 to $5,000).--d. POVs shipped to Japan are either category A, B or C:----(1) CATEGORY A are POVs manufactured prior to 31 March 1976. CATEGORY A POVs will have to meet the insurance, taxes, registration fees and local vehicle emission standards and safety requirements (headlights, color of bulbs, MPH to KPH, speedometer, etc.). This category will NOT require a waiver. Category A POVs may be shipped to Mainland Japan or Okinawa, Japan as appropriate. Estimated cost per vehicle is between $500 to $1000 based on 100 Yen to $1.00 US dollar.----(2) CATEGORY B are POVs manufactured
after 31 March 1976. Category B POVs will have to pass the Japanese Vehicle Emission Standards (JVES), plus the above-mentioned items (insurance, tax, and registration requirements). This category will require a waiver (component services) and is authorized for shipment to Mainland Japan ONLY! Estimated cost per vehicle is between $3000 to $5000 based on 100 Yen to $1.00 US dollar.---(3) CATEGORY C are Japan-spec POVs previously registered and exported from mainland Japan and/or Okinawa. Category C POVs require a shipment waiver from service component representatives acknowledging all associated costs will be at the personal expense. Copy of the original car title or Japan export title will be presented to Transportation Office during counseling and to the origin Vehicle Processing Center (VPC). Per confirmation from the National Agency, Vehicle Inspections Office, Okinawa, emissions testing is not required for stock vehicles and can be registered in mainland and/or Okinawa, Japan. In order to ensure current emissions and safety standards are met, all modified Japan-spec POVs will be shipped to mainland Japan to undergo emissions, safety, and noise testing. All additional costs plus the subsequent delivery to Okinawa will be at member s or DoD employee s expense. Origin VPCs must ensure NOT to ship any modified Japan-spec POVs directly to Okinawa to include POVs purchased from a Japan Export Company. Any changes that affects safety and the manufacturer s original factory intake, exhaust, tuning and suspension are considered car modification.

--e. Due to the remote locations and size of the installations of CDR Fleet Activities Sasebo NAVSUP Fleet Logistics Center Yokosuka Site Sasebo (QENF), MCAS Iwakuni (QEML) and Misawa AB (QEFL), there are no on-base facilities authorized to modify or inspect vehicles to meet Japan emission and safety standards. The estimated cost per vehicle may be $2,000 to $5,000 based on 100 Yen to $1.00 US dollar regardless of vehicle category A or B.--f. Oversized vehicles (i.e.-special purpose vehicles, campers, motor homes, recreational vehicles, etc.) exceeding 12 meters in length, 2.5 meters in width, and or 3.8 meters in height will not comply with Japanese registration standards. Modifications, including installed camper shells, cannot protrude more than 15cm from each side of the vehicle. Total vehicle weight cannot exceed 20 tons: axle weight-10 tons; and wheel weight-5 tons.--g. Members should contact their sponsors and or transportation offices concerning the current cost of owning and operating POVs in Japan.--h. DIESEL passenger vehicles shipped to the Kanto plain: "Government of Japan vehicle regulations concerning some diesel-powered vehicles are in effect in the Tokyo, Nagoya and Osaka metropolitan regions. U.S. Forces must abide by these regulations. The Tokyo region includes CFAF Yokosuka (QENQ), NAF Atsugi (QENL), Yokota AB (QFFL) and Camp Zama (QFAC). The new regulations are designed to reduce pollution in these heavy-traffic areas. Owners of older model diesel vehicles must determine if this law applies to their POV prior to shipping to an affected area. If they are shipping intra-Japan, they can check with their local Land Transportation Office (LTO). The newcomer can also request that his/her sponsor check with the local LTO. Members moving to the affected areas should consider these regulations when purchasing older model diesel vehicles. Information on vehicle registration can be obtained from local (Japan) installation vehicle registration offices." (CH)--i. MOTORCYCLES MOPEDS:----(1) Motorcycles Mopeds over 250cc, manufactured 1 July 1999 or later, must comply with Government Of Japan (GOJ)-imposed brake standards. In addition to the brake standard requirement, motorcycles mopeds over 250cc, manufactured 1 April 2001 or later, must pass GOJ emissions testing and meet engine-exhaust emission control standards.----(2) The estimated minimum costs for mandatory engine exhaust emission testing is approximately $800. Costs to bring a noncompliant motorcycle to standards depends on type model. If a motorcycle does not meet brake standards, costs to bring the motorcycle into compliance could run $2000-$4000. (Brake testing costs depend on type model). These are separate requirements (subject to manufactured dates). Failure to meet compliance places the owner in an even costlier situation. The additional cost of meeting GOJ s standards is subject to the various equipment types and models and degree of difficulty in meeting compliance.
There is only one brake testing facility in Tokyo; two emission testing facilities located in Tokyo and one in Osaka. There are no brake or emissions testing facilities near Misawa, Sasebo, or Iwakuni (mainland Japan).—-(3)

The following paragraphs outline current DoD policy on importing motorcycles mopeds over 250cc:--------(a) Manufactured prior to 1 Jul 99: No import restrictions.--------(b) Manufactured 1 Jul 99 to 31 Mar 01: The motorcycle must meet brake standards. No import restrictions to mainland Japan, however, member should have a manufacturer’s certificate stating the motorcycle meets Japanese brake standards.----(4) Members assigned to military installations outside the Kanto Plain (Tokyo area) will face high costs and extreme inconvenience transporting the motorcycle to a brake testing facility, if testing is required. Members assigned to Okinawa do not have a brake testing facility on the island.----(5) The motorcycle owner, whether assigned to mainland Japan or Okinawa, should contact the motorcycle manufacturer and obtain a certificate that specifically states the vehicle meets Japanese brake standards. If the member has any doubt about meeting the brake standard, he/she may send the manufacturer’s brake certificate to the sponsor in Japan and ask him/her to check with the local LTO. The sponsor can then advise the member (before shipment) if the motorcycle meets standards. Ensuring the brakes meet Japanese standards prior to shipment is critical, especially for Okinawa, as there are no brake testing facilities on the island.----(6) Manufactured 1 Apr 01 or later: Both brake and engine exhaust emission standards must be met. Members assigned to military installations outside the Kanto Plain (Tokyo area) will face high costs and extreme inconvenience transporting the motorcycle to an engine exhaust testing facility, and to a brake testing facility (if required). Members must sign a memo (prepared by origin Transportation Officer) acknowledging costs inconvenience if the member chooses to ship to mainland Japan. A copy of this memo will be included in advance shipping documents sent to the destination Transportation Office. Motorcycles are prohibited from importation to Okinawa due to the lack of brake and emission testing facilities.----(7) Motorcycles mopeds must be insured with a temporary registration tag in order to be driven to a testing facility.----(8) It is critical that counselors brief members of the extremely high GOJ compliance costs when shipping motorcycles mopeds into Japan. Counselors should advise members, as an alternative, to place their motorcycles mopeds into non-temporary storage as household goods for the duration of their tour in order to avoid compliance expenses. Service members may also use their POV storage entitlement (if a POV is not shipped) to store their motorcycle as a POV in the POV storage program where it will receive proper care.----(9) IAW Japanese Customs requirements, all motorcycles (to include mopeds) shipped as HHGs must be properly inventoried. The make, model, chassis number, and engine size must be noted on the inventory and shipping documents. Motorcycles may also be shipped as POVs. (NOTE: motorcycles mopeds do not require POV waivers). Motorcycles mopeds shipped as part of HHGs that fall in the above manufactured date category [b.(1)] must still comply with GOJ’s requirements.----(10) Motorcycles shipped as HHGs to Japan: All Transportation Offices are required to identify the inclusion of a motorcycle with make, model, chassis number, and engine size in block 25 of the PPGBL and as trailer card data on applicable Transportation Control and Movement Documents. Personal property Transportation Service Providers must show the same information on the inventory.----(11) Diplomatic Personnel: Department of Defense personnel on diplomatic assignment to the U.S. Embassy, Tokyo must contact their sponsor or the Transportation Section of the Embassy for specific guidelines regarding shipping a motorcycle. --j.

Prices off base start at approximately $4.00 per gallon for 89 octane. Higher grade gasoline off base is more expensive.----(2) Members should be counseled on extremely stringent emission standards imposed.--k. INSURANCE SAFETY REQUIREMENTS:----(1) Effective 01 Jan 1997, each POV shall have insurance required by the
Japanese Motor Vehicle Damage Compensation Guaranty Law.----(2) POV owners must secure and maintain supplemental coverage of no less than 30,000,000 Yen or $300,000 for bodily injury, and 3,000,000 Yen or $30,000 for property damage.----(3) Military and family members, and civilians assigned to US Navy commands, shall not operate private or rental vehicles unless the proper insurance provisions have been met.--l. 11. TRANSMITTING EQUIPMENT

Transmitting equipment is defined as any device that emits a wireless radio frequency signal. This includes, but is not limited to, the specific equipment devices described in the subparagraphs below. Transmitting devices designed and manufactured to be used in the U.S. operate in frequency bands authorized for their use in the U.S. Many of those same devices cannot be used in Japan because of different Japanese allocations for frequency bands. Any questions concerning the operation of personal wireless devices or radio transmitting equipment should be directed to the appropriate base frequency manager or the U.S. Forces Joint Frequency Management Office (JFMO) at Yokota AB, Japan (DSN) 315-225-4613, (CML from U.S.) 011-81-311-755-4613, (CML from Japan) 042-552-2510 x54613. Note: UNAUTHORIZED USE OF ANY TRANSMITTING EQUIPMENT IN JAPAN COULD RESULT IN SEVERE PENALTIES, INCLUDING MONETARY FINES AND IMPRISONMENT. --a. CITIZEN BAND (CB) RADIO EQUIPMENT: ----The Status of Forces Agreement (SOFA) prohibits the use of Citizen Band (CB) equipment in Japan by U.S. Forces personnel. CB equipment typically is available in the form of small walkie-talkie type radios that transmit and receive in the citizens radio service band. These radios are normally known in the U.S. as Family Radio Service (FRS) or General Mobile Radio Service (GMRS). --b. AMATEUR HAM RADIOS: ----Amateur HAM radio use on U.S. bases and facilities in Japan must be approved by the appropriate base frequency manager and base commander. In addition the foreign (non-Japanese) operator must submit an application to the Japanese government, regardless of the location of the transmitting equipment. More information about foreigners using amateur radio in Japan is available at: http://www.jarl.org/English/0-2.htm --c. BABY MONITORS: ----The use of baby monitors or baby alarms is permitted in Japan with the provision that the device operates in the 2.4 Gigahertz (GHz) band. MANY TYPES OF BABY MONITORING DEVICES MADE FOR USE IN THE U.S. CANNOT BE USED IN JAPAN BECAUSE THEY OPERATE IN THE 900 MHZ BAND, which is used for a different purpose in Japan. Use of these 900 MHz monitors causes extensive interference to Japanese emergency and cell phone networks. U.S. FORCES USING THESE 900 MHZ BABY MONITORS IN JAPAN ARE SUBJECT TO MONETARY FINES AND DISCIPLINARY ACTION. Any questions about whether a particular baby monitor is authorized or not should be directed to the base frequency manager or the USFJ JFMO. --d. WIRELESS LOCAL AREANETWORK (LAN) TRANSMITTING EQUIPMENT: ----The use of wireless LAN equipment is authorized in Japan as long as it transmits in the 2.4 GHz frequency band. The use of amplifiers, boosters, or any other device that alters the transmitted power or the transmitted signal
characteristics is strictly prohibited.--e. CORDLESS TELEPHONES: ----Cordless home telephones may be used in Japan but must operate in one of the following frequency bands: 2.4 GHz (Gigahertz) 5.8 GHz. Specifically prohibited are cordless telephones with base stations and or remote units that transmit in the 900 MHz (Megahertz) band. These 900 MHz phones cause extensive interference to Japanese emergency and cell networks. In addition, any other cordless telephone use (other than 2.4 GHz and 5.8 GHz) must be approved by the appropriate base frequency manager.--f. RADIO CONTROLLED MODEL EQUIPMENT (RCME): ----RCME is defined as scale model aircraft, boats, vehicles, etc. remotely controlled using radiofrequencies. Use of RCME is authorized per the following guidance:--------(1) Operator, controlling transmitter, and controlled device must be entirely within the confines of U.S. facilities and areas.--------(2) Japan-wide: Remote control transmitter must operate on one of the following frequencies at no more than 2 watts of power: 26.995, 27.045, 27.095, and 27.255 Megahertz (MHz).--------(3) Japan-wide: Remote control transmitter must operate on one of the following frequencies at no more than 1 watt of power: 72.24, 72.4, 75.64 MHz. --------(4) Additional frequencies in these same bands have been approved for specific Japan U.S. base locations and can be provided upon request by the appropriate base frequency manager or the USFJ JFMO. 12. SEPARATEES/RETIREES ENTITLEMENTS/LIMITATIONS

----Separatees and retirees DO NOT fall under the Status of Forces Agreement (SOFA) and are not entitled to the exemptions of personnel whose status in Japan stems from this agreement.---- Personnel contemplating retirement, separation or relocating dependents to Japan should be counseled that all customs entry requirements, to include payment of duties, taxes, customs inspection fees, etc. remain the responsibility of the member and is a personal matter between the member and the Government of Japan.----In April 2013 applicable duties, taxes and customs inspection fees destined for Okinawa totaled approximately 2,000USD for a 500-pound shipment of HHG. Please ensure customers are counseled of potential costs accordingly. (CH 07-MAY-2013)

---a. JAPAN NATIONAL HOLIDAYS: Japanese Customs offices close 29 Dec through 03 Jan. Also, many commercial companies including transportation and port operations close between 29 Apr through 05 May for golden week. RDDs should not be assigned later than 28 Dec or earlier than 05 Jan or between 29 Apr through 05 May. For planning purposes when scheduling RDDs, Japanese National Holidays are: 01 Jan----New Year s Day 2nd Monday of Jan----Adulthood Day11 Feb----National Foundation Day 21 Mar----Vernal Equinox Day 29 Apr----Showa-No-Hi (Ex Emperors Birthday) 03 May----Constitution Day 04 May----Midori-No-Hi (Green Day) 05 May----Children s Day 3rd Monday of July----Ocean Day 11 Aug----Mountain Day 3rd Monday of Sep----Respect for the Aged Day 23 Sep----Autumn Equinox Day 2nd Monday of Oct----Health-Athletics Day 03 Nov----Culture Day 23 Nov----Labor-Thanksgiving Day 23 Dec----Emperor s Birthday (2108 ONLY)---b. BOATS: Considering all the expenses involved and limited weight entitlement allowed, this activity discourages the importation of boats to Okinawa.---(1) Sailboats, motorboats, jet skis and wave runners may be imported to Japan duty-free subject to the following provisions:--------(a) Boats must be included in personal property shipments and imported within 6 months of sponsors arrival in Japan. Japan law states boats are not assessed customs duty, therefore, USFJ Form 380 EJ is not required.--------(b) Sponsor must declare boat as unaccompanied personal property at the time of his/her entry in Japan and possess evidence of ownership (title registration papers) and date of purchase.--------(c) If an imported boat is subsequently sold transferred to non-SOFA personnel (enterpriser or business), consumption tax of 5 percent of the boats value may be charged by the Government of Japan.--------(2) All members should be counseled on the following:--------(a) Insurance costs average $1,000 to $2,000 annually, depending on coverage.--------(b) Any individual operating a boat with a motor must obtain a Japan Class 2 boating license (Certificate of Competency for Small Vessel Operator). The license cost is approximately $400, and the test is only given in English twice each year. A Personal Watercraft (PWC) requires an additional license. Both licenses involve a written and practical examination.--------(c) Parking is very limited at the marina, as well as in off-base housing areas. Ball type hitches are very rare and should be shipped in with the water craft, or trailers must be converted for a pintle hook connection. A towing license is required to tow any trailer in Japan. An ordinary SOFA license is not sufficient.--------(d) Slips at Japanese marinas are very expensive. A typical slip on Tokyo Bay for a 30-foot boat will cost at least $23,000 for the first year and $10,000 each additional year (Yokohama Bayside Marina).--------(3) For Okinawa: Members requesting shipment of boats should be counseled on the following:--------(a) Considering all the expenses involved and limited weight entitlement, importation of boats to Okinawa is discouraged.--------(b) It is difficult and expensive to obtain a boat license. 1. Army personnel (Also see Item 7 below): a. Army members/civilians assigned to non-Army installations (e.g., Kadena AB, etc) receive the same weight entitlement as host-base personnel, unless the stated otherwise below. b. 403rd AFSB LRC, Torii Station, Okinawa, JA: 

Household Goods:---------All accompanied Army Soldiers and Civilians are authorized full weight allowance JFTR, U5310-B/JTR C5154-B. Housing and temporary furniture support is provided by Kadena AB. Unaccompanied and single members are authorized an administrative weight allowance of 2,500 (net) or 25% (net) of the allowance in JFTR U5310-B, whichever is greater. Unaccompanied civilians are authorized to ship 4,500 (net) of the allowance in JTR C5154-B. (CH SDDC-PAC 10-Oct-2013 RB) 

Unaccompanied Baggage (UB):---------Accompanied Army Soldiers are authorized UB NTE 2,000 pounds. UB shipments via expedited mode (commercial air), maximum of 1,000 pounds (net), including PBP&E is authorized (see JFTR U5320B).---------Unaccompanied active duty members normally assigned to furnished GOV'T QTRS, UB is authorized NTE 10% of the member's authorized weight allowance (or the administrative weight limit shown in the JFTR, APP W, whichever is less).---------Unaccompanied active duty members not normally assigned to furnished Bachelor Enlisted QTRS or Bachelor Officer QTRS are authorized UB NTE 2,000 pounds (or the administrative weight limit shown in the JFTR APP W, whichever is less).---------All maximum weights exclude the weight of professional books, papers and
equipment (PBP&E) if transported with UB. UB shipments via expedited mode (commercial air), maximum of 1,000 pounds (net), including PBP&E is authorized (see JFTR U5320B). UB weight is part of the member's authorized HHG weight allowance (see JFTR, par. U5310-A7 and JFTR, par. U5315-B). Soldiers required to reside in UPH should consider shipping less than their authorized weight allowance due to the small size of rooms. The remaining HHG will be stored in nontemporary storage at origin. See pictures of the size of UPH on Army Housing One Stop, https://onestop.army.mil.

Accompanied Civilians are authorized UB NTE 350 pounds net weight for each adult and dependent age 12 or older, and 175 pounds net weight for each child under age 12 (JTR, par. C5170) except when air transportation of UB is used, JTR, par. C5160-B or JTR, par. C5524 applies. The UB total transported by air (or any expedited mode) must not exceed 1,000 lbs. net weight. Air transportation is not authorized when an employee performs RAT, except when the additional tour of duty is served at a PDS in another OCONUS area and as authorized in JTR, pars. C5524 and C5526.

Unaccompanied Civilians are authorized UB NTE 350 pounds net weight. (CH SDDC-PAC 10-OCT-2013 RB)

HHG Excess to Government/Privatized/Economy/Unaccompanied Personnel Housing (UPH). Contact the new command, unit, sponsor, or housing office for the size and/or square footage of the Government/privatized/economy/UPH to determine how much HHG to ship. HHG not shipped must be stored in non-temporary storage at origin. Return transportation and Government paid storage of HHG excess to Government/privatized/economy/UPH are not authorized. Army: https://onestop.army.mil for housing information. (CH SDDC-PAC 30-Sep-2011 RB)

Unaccompanied Army members and civilians are authorized 5,000 lbs or 50% of full JFTR/JTR weight allowance, whichever is greater.

Unaccompanied and single members are authorized the administrative weight allowance of 2,500 or 25% of the authorized weight allowance, whichever is greater. This administrative weight allowance includes the unaccompanied baggage weight entitlement. For example: Single E-5 full JFTR is 7,000. 2,500 or 25% of 7,000 lbs is 1,750. 2,500 is greater than 1,750 lbs. Therefore the entitlement is 2000 HHG + 500 UB= 2500lbs.

Unaccompanied civilians are authorized 4,500 pounds of HHG plus unaccompanied baggage. NOTE: All personnel should check with their sponsor/housing manager for items not to ship. Housing in Japan is smaller than in CONUS, commercial storage is not available and excess furniture will not be shipped back to CONUS for storage. (CH 3/5/10, PPP-POP) EFFECTIVE WITH PICKUP DATE OF 01-DEC-2011 and later, all accompanied and unaccompanied Army Soldiers are authorized an administrative weight allowance of 2,500 pounds (net) or 25% (net) of full weight allowance in JFTR U5310-B, whichever is greater. All accompanied or unaccompanied civilians are authorized an administrative weight allowance of 4,500 pounds (net) in JTR C5154-B. (CH SDDC-PAC 30-Sep-2011 RB)

Unaccompanied active duty members NORMALLY assigned to furnished GOV'T QTRS, UB is authorized NTE 10% of the member’s authorized weight allowance (or the administrative weight limit shown in the JFTR, APP W, whichever is less).

Unaccompanied active duty members NOT NORMALLY assigned to furnished Bachelor Enlisted QTRS or Bachelor Officer QTRS are authorized UB NTE 2,000 pounds (or the administrative weight limit shown in the JFTR APP W, whichever is less). All maximum weights exclude the weight of professional books, papers and equipment (PBP&E) if transported with UB. QEML-------(CH SDDC-PAC 30-Sep-2011 RB)2. Air Force personnel (Also see Item 7 below):
a. All accompanied Air Force members PPTY shipments to or from Kadena AB, Yokota AB, and
Misawa AB which are picked up on or after 1 Mar 08 are authorized to ship their full JFTR weight
entitlement. This does not indicate members must ship their full weight. Housing in Japan is smaller
than homes in the CONUS, commercial storage in Japan is almost non-existent and housing offices
will not fund items to be sent back for storage. Members must be counseled on items provided to
them (ie. washer, dryer, refrigerator, stove, etc.), type of housing available to them and size of
houses to determine what to ship and what items to place in non-temp storage for the duration of
their tour in Japan. All worldwide Personal Property offices must consult each installation's specific
PPCIG instructions to properly council member. Consistent with Air Force policy all unaccompanied
members are authorized either an unaccompanied baggage shipment or elect 10% of full JFTR
weight entitlement via surface. However, AFSUP/JFTR, Table A2.2 Rule 2/4 and the Overseas
Furnishings and Housing Availability report
821) may authorize additional weight contingent upon the members/employees rank/grade and
unaccompanied housing availability. All additional authorized weight must be identified on
members/employees PCS orders. b. Air Force personnel assigned to non-AF installations (e.g.,
Camp Zama, etc) receive the same weight entitlement as host-base personnel, unless gaining MPF
(identified on PCS orders) dictates a higher weight entitlement.3. Navy personnel (Also see
Item 7 below): a. Okinawa, JA: 25 percent of full JFTR weight allowance or 2,500 pounds,
whichever is greater. NOTE: A weight restriction will not apply unless it appears in the member's
orders. Refer to NAVSUP Pub 490 for detailed guidance. b. Japan (except Okinawa) - Full
JFTR/JTR weight allowance. (CH SDDC-PAC 24-MAY-2013 RB) c. This DOES NOT indicate
customers must ship their full authorized weight. Housing in Japan is smaller than homes in the
CONUS. Commercial storage in Japan is almost non-existent and housing offices will NOT fund items
to be sent back for storage. Customers must be counseled on items provided to them (i.e..washer,
dryer, refrigerator, stove, etc.), type of housing available to them, and size of houses to determine
what to ship and what items to place in Non-Temporary Storage for the duration of their tour in
Japan. Contact the new command, unit, sponsor, or housing office for the size and/or square
footage of the Government/privatized/economy/Unaccompanied Personnel Housing to determine
how much HHG to ship. Customers may incur excess cost to dispose of or relocate excess or
oversized furniture. All worldwide Personal Property offices MUST consult each installation's specific
PPCIG instructions to properly council customers. (Also see Item 5. FURNITURE, OVERSIZED on the
Country Instructions Main page.)4. Marine Corps personnel(Also see Item 7 below): a.
Okinawa, JA: 25 percent of full JFTR weight allowance or 2,500 pounds, whichever is greater. MCB
Camp Butler continues to receive personal property shipments in excess of the JFTR administrative
weight restrictions. Improper counseling by ITOs has caused financial hardship for Marine Corps and
Navy members attached to MCB Camp Butler. Close examination of the area clearance, which
required for accompanied tour personnel, is necessary. (1) Accompanied tour personnel are
authorized to ship 2,500 lbs or 25 percent of their full JFTR weight allowance, whichever is greater.
Additional weight items not provided by base housing is clarified in the area clearance. An
unaccompanied baggage shipment is authorized not to exceed 600 pounds for active duty member
and 200 pounds each family member. The weight of the Unaccompanied Baggage shipment,
minus PBP&E and Required Medical Equipment, DOES count against the Administrative Weight
Limitation (JFTR para U5315-B1). (SDDC-PAC 04-May-2011 RB) Col (06) on accompanied tour at
MCB Camp Butler are authorized 10,000 pounds of HHG. BGEN (07) and above are authorized full
b. MCAS Iwakuni, JA: (CH)(1) Effective immediately, accompanied tour personnel are authorized to ship 75 percent of their full JFTR weight allowance. Due to the generally smaller size of government quarters available aboard MCAS Iwakuni, large furniture items such as oversized couches/sofas and king size bed sets should be placed in NTS at origin. An unaccompanied baggage shipment is authorized not to exceed 600 pounds for active duty member and 200 pounds each family member. The weight of the Unaccompanied Baggage shipment, minus PBP&E and Required Medical Equipment, DOES count against the Administrative Weight Limitation (JFTR para U5315-B1). (SDDC-PAC 04-May-2011 RB) Limited exceptions may be granted on a case by case basis until 1 October 2006. (2) Colonel/06 or equivalent on an accompanied tour as the Commanding Officer, MCAS Iwakuni or Marine Aircraft Group 12 is authorized full JFTR weight allowance. (3) Unaccompanied tour personnel (dependent restricted) are authorized to ship no more than 10 percent of the full JFTR weight allowance, only if off base quarters are authorized by command. Be advised mostly all unaccompanied tour personnel are assigned to the barracks and off base quarters are limited. Only unaccompanied baggage shipments are highly encouraged for unaccompanied tour personnel. (AMSSD-PPP-PO 4 Aug 2010) S. Department of Defense Dependent School(DODDS) personnel assigned to Okinawa are the responsibility of Kadena AB, Okinawa, JA. 6. Kadena AB, JA: Personnel assigned to Detachment 1, 18 Combat Support Group, APO AP 96368-5198 are not authorized to ship POVs and HHGs. 7. Yokota AB and Misawa AB "On-Base First" Policy: Yokota AB and Misawa AB established an On-Base First Policy for ALL accompanied and unaccompanied members. This policy applies to ALL Air Force AND Non-Air Force personnel with Permanent Change of Station Orders to Yokota AB and Misawa AB. Based on availability, members must accept an on-base Family Housing (FH) or Unaccompanied Housing (UH) unit that meets their respective grade and category. If there is no available housing ready for occupancy within a reasonable time as determined by the Housing Office, the applicant may be allowed to secure acceptable community (off base) housing. Unaccompanied personnel are required to reside on base in most cases and shipping excess personal property will not fit in UH. Personnel must coordinate with their sponsors and base housing in advance to preclude hardships because the government will not ship the excess property back to non-temporary storage. Additionally, individuals with pets must also coordinate with their sponsor and the housing office because no pets are permitted in UH and/or some accompanied FH (towers). POV importation will also be in compliance with paragraph 8a(1), below. Additionally, your duty-free import privilege is good only for 6 months after the date you arrive to serve with USFK, or the date your authorized dependents arrive for reunion with you, whichever is later. Shipments arriving after this 6 month period are subject to duty/taxes (up to 250 percent of the fair market value), or the shipment must be returned to the sender, or shipped out of Korea, abandoned, or sold at public auction. a. HAND GUNS
DOD personnel may bring non-automatic firearms in ‘reasonable’ quantities, (i.e.-a number/type normally found in the home for private use by the owner/and or his/her dependents). When arriving at Korean POD, weapons/ammunition may be seized whether or not an individual is on travel orders. Individuals who have weapons/ammunition seized should contact the USFK Customs Officer immediately upon arrival in the ROK. All firearms, other weapons, to include any weapon which fires/ ejects projectiles of any kind, by means of an explosive force (except for children's toys that eject a plastic projectile) and ammunition, will be stored in a unit arms room, rod and gun club, or Korean National Police Armory only. No weapons or ammunition will be stored in government or private housing, both on or off post. Weapons will be registered within 3 working days of receipt with the MP/SP unit of your assigned area. Military personnel on leave and US civilians on leave to Korea have no Status of Force Agreement(SOFA) rights to import weapons and ammunition. They must comply with ROK domestic law (i.e.-obtain import permits through a Korean Embassy/Consulate or the Korean Government prior to importation). Any personally owned weapons mailed to Korea must be registered as are those that are imported through personal property shipments. Under no circumstances may a weapon be sold or given to a Korean National. Severe criminal penalties will be imposed by the Korean government for any personnel who violate this law. These weapons/ammunition, once imported, will be registered/stored as outlined above. IMPORTANT NOTE: Government-Owned firearms (GoFs). GoFs are authorized import in a HHG shipment as long as the Make, Model, Caliber, and Serial number is listed on the CUSTOMER’S ORDERS as well as the HHG SHIPMENT INVENTORY. 8. PRIVATELY OWNED VEHICLES (POVs)

----------PLEASE READ CAREFULLY----The POV section on this page has been restructured for clarity.

(CH SDDC-PAC 11-Sep-2015 RB)

a. POVs (includes data on prohibited vehicles, colors, etc.)

---1. For shipment authorizations by Branch of Service and restrictions, see the applicable paragraphs below.---a. ARMY ACTIVE DUTY MEMBERS:--------(1) Unaccompanied Tour. Shipment of a POV is NOT AUTHORIZED....REGARDLESS OF RANK, and REGARDLESS OF TOUR LENGTH. Per 8th Army G1, Korea, POV shipment authorization to or from Korea is directly tied to whether or not Army personnel has command sponsorship, and is not tied to the length of tour. (CH 26-May-2016 SDDC-PAC RB)--------(2) Accompanied COMMAND-SPONSORED TOUR: Shipment of one POV is authorized.--------(3) Extended Tour (i.e.-Assignment Incentive Pay). Shipment of a POV is NOT AUTHORIZED.--------(4) Storage. Storage of one POV is authorized when a member IS NOT authorized to ship a POV.--------(5) Joint Domicile Couples: Shipment of --ONE-- POV authorized for the Soldier Service Member whose orders state joint domicile, accompanied command sponsored tour, and have civilian dependents accompanying the Soldier Service Member to Korea. The other Soldier Service member is authorized storage of one POV in CONUS. If neither of the Joint Domicile Couple has civilian dependents accompanying them to Korea, then --NO-- POV shipment is authorized to Korea for either Soldier Service Member, and POV storage in CONUS is authorized, per determination by 8th Army ISL 23-Jun-2016. (CH 23-Jun-2016 SDDC-PAC RB)--------(6) Per JTR, Par. 5380-B4, Customers who stored their POV at Government expense in CONUS, then receive Command Sponsorship approval while in Korea, are not authorized to ship their stored POV to Korea. (CH 03-Feb-2016 SDDC-PAC RB)--------(7) Army Civilian Employee. See paragraph 7.e. below.---b. AIR FORCE ACTIVE DUTY PERSONNEL: Shipment of one POV [as defined in paragraph 2 below] is authorized for persons on an accompanied tour and E-7, GS-5 and above who are on an unaccompanied tour in Korea. Advance approval is not required unless member is assigned to specified units below:--------(1) Camp Red Cloud: 607th Weather Sq.--------(2) Camp Casey: Det 1, 604th DASS; Det 20, 30th Weather Sq.--------(3) A request to possess and operate a POV in these areas must be forwarded through CBPO channels to the commander of the parent unit (607th WS, 604th DASS, or 83ALD). Authority to ship aPOV must be stated in the member’s PCS order and must cite authority’s correspondence. (CH 30-NOV-2017 TCJ4-HB-PAC RB)---c. NAVY ACTIVE DUTY PERSONNEL: Shipment of one POV [as defined in paragraph 2 below] is authorized for persons on
an accompanied tour and E-7 and above who are on an unaccompanied tour in Korea. Unaccompanied personnel must comply with the provisions of paragraph a.(1) above when contemplating shipment of a POV.

d. MARINE CORPS ACTIVE DUTY PERSONNEL: Shipment of one POV [as defined in paragraph 2 below] is authorized for persons on an accompanied tour and E-7 and above who are on an unaccompanied tour in Korea. Unaccompanied personnel must comply with the provisions of paragraph a.(1) above when contemplating shipment of a POV.

e. DoD CIVILIAN PERSONNEL: Queries concerning POV allowances should be IAW the JTR, Vol.2, Chapter 5, Part E and addressed to one of the following addresses:—(1) Department of the Army and Navy Civilian Employees: Seoul Civilian Personnel Advisory Center, Attn: EANC-SA-CPAC, Unit 15333, APO AP 96205-0177.—(2) DoD Dependent Schools: Contact the DoD Education Activity, Arlington, VA, as listed in the employees orders.

2. USFK defines a POV as any motorized vehicle, excluding motor driven cycles with a total engine displacement of 49cc or less, including but not limited to, automobiles, trucks, station wagons, jeeps and motorcycles owned or operated for personal use.

3. USFK policy restricts operation and registration to one POV per family without regard to whether the vehicle is shipped as a POV or as household goods (HHG). Exceptions to the one POV limitation must be directed to the members gaining unit for approval by the appropriate authority.

4. Registration and Operation. Paragraphs (a) and (b) effective 15 Jan 09 HQ, USFK (FKCS), memorandum dated 30 Jan 09, subject: Second Interim Driving Policy Regarding Privately Owned Vehicle Driving Privileges:—a. USFK Drivers License. All service members are eligible to apply for a USFK drivers license. Service members E-6 and below on an unaccompanied tour require approval from the first O-5 in their chain of command.

b. POV Ownership and Registration.—(1) Service members in the grades of E-7 and above and all personnel on an accompanied command-sponsored tour may own and register a POV with USFK.—(2) Service members on an unaccompanied tour in the grades of E-6 and below may be granted an exception to policy to own and register a POV with USFK by the first O-6 in the chain of command and the responsible O-6 Area Commander.—(3) The service member must actually be assigned on a command-sponsored tour "with family members" and those family members must be living in Korea with the service member. Occupation of billet that is on the Command Sponsored Position List (CSPL) is not sufficient.—(4) Registration and operation of a POV is restricted in many geographical areas. This is due to mission constraints as well as physical location.

5. Korea DOES NOT have commercial POV storage facilities.

6. Unleaded fuel is available at all major installations in Korea and is generally available at most service stations on the local economy. Catalytic converters do not need to be removed. If the catalytic converter is not removed, unleaded fuel must be used. Removal of the catalytic converter is at the members option and expense.

7. There are no specific Korea safety requirements for POVs; however, USFK requires a local safety inspection as part of the POV registration procedures. AAFES is the primary source of general automotive repair in Korea. Very little automotive repair is available on the local economy. The AAFES repair facilities service all makes and models of POVs; however, AAFES does not always have the capability to deal with technological advancements that are in the newer models. The problem of servicing new models is intensified due to the lack of mechanic experience, equipment and part availability.

### b. MOTOR CYCLES/MOPEDS

Motorcycles/Mopeds fall within the USFK definition of POVs, paragraph 8a (1) above. Mopeds or motor driven cycles can only be registered and operated by personnel authorized to possess a POV.

(1) Personnel in the grade of E-7/GS-5 or above and authorized dependents desiring to register or operate a two-wheeled motorized vehicle (including mopeds) in the ROK must have in
their possession proof of completion of a 'hands-on' riding course. The following courses are acceptable: Better Biker Program (BBP), Experienced Rider Course (ERC), Motorcycle Riders Course (MRC) and Riding and Street Skills (RSS). Upon completion of one of the above courses, members must obtain and keep in their possession a Motorcycle Safety Foundation (MSF) Course Completion Card. The MSF Course Completion Card must be presented along with a valid inspection sticker for your vehicle to be registered and operated. These courses are not offered in the ROK and must be completed prior to arrival. A motorcycle safety training course is taught in Yongsan/Seoul. Limited slots are available. (CH)  (2) ROK law prohibits the travel of two wheeled vehicles on all expressways (no exceptions). (CH)  (3) Personnel contemplating shipment of a two-wheeled motorized vehicle in their HHG should contact their gaining unit regarding registration and operation procedures. DO NOT use DPM HHG or Code T for shipment of motorcycle to Korea. If a motorcycle is shipped by DPM or Code T, the member may have difficulty registering the motorcycle because they do not have proper Korean Customs Clearance and Import documents which are required, it will then be the member's expense and responsibility to provide. MAKE SURE TO SHIP MOTORCYCLES BY Code 3 OR Code 4 ITGBL ONLY. (CH SDDC-PAC, 06-Apr-2011 RB)  (4) In order for two-wheeled vehicles shipped in HHG to properly and expeditiously clear through the ROK customs the following information must appear on the inventory: year, make, model, body number, cc capacity, mileage, serial number and price. (CH)

c. GASOLINE/CATALYTIC CONVERTERS

Unleaded fuel is available at all major installations in the ROK and is generally available at most service stations on the local economy. Catalytic converters do not need to be removed. If the catalytic converter is not removed, unleaded fuel must be used. Removal of the catalytic converter will be at the member's option and expense.

Third party insurance is required and can be obtained upon arrival. With a letter from your previous/current car insurance company stating how long you have had no claims, reduced insurance rates may be obtained. The following is a basic listing of POV inspection standards required: (1) Serial numbers of motor and chassis must be the same as stated on vehicle registration. (2) All tires must have at least 1mm tread over the complete tire surface. (3) Exhaust system: No rusted out or leading exhaust system components allowed. Exhaust systems with cutouts, fiberglass-packed, or straight through exhaust system are
not allowed.  (4) Brakes: A mismatch of 20 or more between wheels, as measured on the brake wheel drag machine. Hand brake must hold vehicle on incline.  (5) Wheel Alignment: Wheels must be able to be turned to full right or full left without jamming or rubbing any part of vehicle. Tierod steering arm assemblies must not be damaged or worn.  (6) Lights: All installed lights must be operational. All automobiles must have a third brake light mounted inside the rear window. All automobiles must have a center high-mounted brake light.  (7) Exterior Condition: Missing fenders, broken windows, extensive body damage, deterioration, broken springs, or oil leaks are not allowed.  (8) Horns: Must be equipped with a horn and it must be operational. Horns must not be extremely loud or be confused with emergency vehicles or police.  (9) Seat Belts: Required for the front seat of the vehicle.  (10) Tinted Windows: Vehicles with windows and windscreens tinted more than fifty percent visibility are not allowed in Malaysia.  (11) Traffic in Kuala Lumpur is heavy and disorganized and it moves on the left with the steering on the right, i.e., cars are right-hand drive (RHD). Motorbikes are abundant and generally do not follow traffic rules. For these reasons small or medium-size cars are more practical. Japanese and European automobiles may be ordered locally from their manufacturers. Many employees have ordered reconditioned cars from Japan with good results.

(12) Left-hand drive cars are permitted in Malaysia but are not recommended due to the traffic conditions in Kuala Lumpur. They also have limited resale value.  (13) If you plan to import an American car, bring along extra belts, plugs, windshield wipers, oil and fuel filters, etc., as spare parts are often expensive or difficult to find. Parts, for most foreign makes and service are readily available. While service is relatively inexpensive, parts are expensive.  (14) Members who will drive in Malaysia must obtain a Malaysian driver's license after arrival. If you possess a U.S. or other foreign driver's license, conversion to Malaysian driver's license will be issued upon Ministry of Foreign Affairs approval.

2. CUSTOMS CLEARANCE PROCEDURES, REQUIREMENTS, AND RESTRICTIONS

a. The Government of Mexico requires a detailed item listing of the contents of each container. To satisfy this requirement, the Embassy GSO must be provided a legible copy of the inventory which is translated into Spanish and included with the request for free entry.  
b. It is imperative origin ITOs forward this legible copy of the inventory and a copy of the PPGBL showing the number of
outer containers, total weight of shipment (either net or gross), estimated value of shipment, and port of entry to the Embassy GSO as soon as available. It takes approximately 5-6 weeks after receipt of this data to obtain the import permit and nonreceipt of the above documentation or omission of any of the required information will cause delay and serious hardship for member and family. c. Although the initial destination is to a point in CONUS (Brownsville, Texas), this is only a transfer point for onward movement to Mexico. Shipments must be packed for overseas delivery. Shipments remain in Brownsville, Texas until the Mexican Government processes and approves this request for free entry. d. After approval, it normally takes 2-3 weeks for delivery of HHG to owner. New arrivals should anticipate spending 5 to 9 weeks in temporary quarters without HHG and should plan accordingly. e. In order to avoid storage charges, please ship HHG, UAB and POV to coincide with the arrival at post of the member. The GOM will not issue any import permits, nor release any shipments until member is country and has been accredited.

d. OTHER (i.e. AMMO, EXPLOSIVES, ETC)

Not Authorized for importation into Mexico
8. PRIVATELY OWNED VEHICLES (POVs)

Effective immediately POVs of any age can be imported into Mexico for any member arriving in diplomatic status. There is no longer a required waiting period of three years between the time that an imported vehicle is purchased or imported by a U.S. Direct Hire (USDH) employee at post and the time they are able to nationalize the vehicle for sale on the local market in Mexico. POVs may be nationalized at any point after they are imported or purchased but no less than six months before the owner’s departure from post. Please see below for more details on the nationalizing process.

a. POVs (includes data on prohibited vehicles, colors, etc.)

(1) Following are the Government of Mexico’s (GOM) laws concerning importation of privately-owned and official vehicles. These laws were implemented on January 1, 1992, and are still current.

   (a) Within certain dollar limitations which must be verified with post management, all types of vehicles can be imported and sold.

   (b) POVs for the Chief of Mission can be imported for the term of assignment, but the value cannot exceed 60,000 US dollars. Additionally, these employees are allowed to buy two Mexican made vehicles which are exempt from value added taxes (IVA).

   (c) All other accredited US personnel are allowed to import one US vehicle of any model or make. Also, these employees are allowed to purchase one Mexican made vehicle, which is exempt from value added taxes (IVA). According to GOM law, it is illegal to import vehicles under a Temporary Import Permit (TIP) and keep them in country.

   (d) Vehicles should be shipped and consigned to: US Logistics Center, 225 South Vermillion Avenue, Brownsville, TX 78521; telephone: 956-725-6803; FAX: 011-525-207-5080.

   (e) Following are the documents needed to register a personal (imported) vehicle in Mexico.

      (1) Import Permit issued at the border by the Mexican Government at the time of your entrance into country. (2) Original Title or Certificate of Origin. These documents must be under the employee’s name. (3) Copy of bill of sale, also known as an invoice. If the original document is not available, a certified and notarized copy of the bill of sale must be provided to SRE. Bill of sale must contain name of owner, VIN or engine number, year, color, make, and model. If the vehicle was purchased through a credit union or bank, these institutions must issue a letter stating that the original document is being held by them. The price must appear in the letter. The letter must be signed and notarized by a notary public and attested to by a Mexican Consulate in the United States.

      (4) Proof of Mexican third party Liability insurance.

      (f) Once all the necessary and completed documents have been turned in to GSO, Customs and Shipping will begin the process to register your vehicle. Expect to wait four to six weeks to receive your diplomatic license plates. During the Christmas and Easter holidays, this process can take considerably longer as the SRE is closed for business during these times. (2) Vehicle Purchased in Mexico: The following documents are necessary to register a vehicle purchased in Mexico. (a) A photo copy of the bill of sale or invoice endorsed to the employee. (b) Proof of third party insurance. As with imported vehicles, it will take three to four weeks for the SRE to issue the diplomatic plates for a locally purchased vehicle. Please refer any questions or requests for assistance to your post’s Customs and Shipping team or to the Customs and Shipping team in Mexico City at MexicoCityCS@state.gov.

b. RESTRICTIONS ON SHIPMENTS OF RETIRED PERSONNEL OR DEPENDENTS RESIDING IN MEXICO: Transportation officers are prohibited from shipping personal effects of above categories to the Brownsville, TX address. d. UNACCOMPANIED BAGGAGE

2. CUSTOMS CLEARANCE PROCEDURES, REQUIREMENTS, AND RESTRICTIONS

a. HHG and POV should not be sent to arrive in advance of the employee, since customs clearance cannot be arranged unless the employee has arrived at Post. If necessary, please arrange temporary storage at Elso Antwerp. Post will advise Elso Antwerp when employee is ready to receive his effects and POV; surface shipments from Antwerp generally arrive within two to three weeks of the
request. If all the documentation is in order, local moving company normally clears and delivers HHG and POV from port within 10 working days.  

b. Original ocean bill of lading and complete packing list should be sent to the Embassy Rabat, ATTN: GSO, as soon as possible, preferably by air courier, since duty free entry requests from the Moroccan authorities cannot be initiated without them. Inbound customs clearance arrangements for all DOD shipments to Morocco have been coordinated and effected with American Embassy, Rabat, Morocco.  

c. DUTY-FREE IMPORTATION: Shipments of personnel not on the diplomatic list must be shipped sufficiently far in advance to ensure arrival in Morocco within 6 months from date of employee's anticipated arrival in country. Staff members are only allowed one duty free HHG, one UB. Shipments must arrive in Morocco during first 6 months of tour. Duty free clearance of subsequent shipments is not routinely granted by the MFA, even if authorized by new orders (i.e., home leave and return to post orders). Staff members who need to ship separate shipment of HHGs (i.e., from post of origin and from permanent storage) should instruct Antwerp to consolidate shipment prior to forwarding to Rabat.  
d. DIRECT SHIPMENTS: POVs and HHGs may on occasion be shipped direct to Rabat rather than via Elso Antwerp provided employee will arrive before shipment and routing and costs are advantageous to the Government. Advise Embassy in advance with proposed routing. Also POVs and HHGs may be shipped directly as long as they are really shipped directly. Past experience has been that such shipments from CONUS are transferred to other ships, usually in Spain, and the shipment arrives on an unknown vessel, such shipments often remain at Casablanca Port for long periods of time before being located. However, if accurate timely trans-shipment information on such shipments is provided, the Embassy has no objection.  
e. RESTRICTED ITEMS: Shipments containing restricted items cannot be declared until employee has arrived in country, been declared to the MFA and been issued a Moroccan ID Card (process can take 4 to 6 weeks). Employee should be instructed not to ship restricted items in UB shipments. This will avoid prolonged delays in customs clearance upon arrival in Rabat. Restricted items: firearms, and video tapes; will be removed by customs official for inspection and further delay clearance process. 

3. CONSUMABLES

No restrictions identified.  
a. ALCOHOLIC BEVERAGES 

Alcoholic beverages should not be shipped with UB but can be combined with HHG. The Foreign Ministry stated, informally, quantities imported should not exceed a reasonable amount for personal use and specified one case was considered reasonable.

**6. PETS/QUARANTINE**

Nepal requires an import exemption permit to bring pets into Nepal. Please send the health certificate (endorsed by United States Department of Agriculture-APHIS or government authority of country of origin) and recent rabies vaccination chart TO kathmanduGSO_CustomsandShippingRequests-DL@state.gov as soon as possible but no less than 5 working days before the arrival of the pet arrival in Kathmandu. The health certificate must indicate that the pet has been vaccinated and is good for at least six months after the arrival of the pet arrival in Kathmandu. Please contact GSO for supplementary information if you intend to import anything other than a cat or dog. Please contact GSO for supplementary information if you intend to import a pet as cargo, or if you intend to import anything other than a cat or dog.(CH 09-JAN-2018 USTCJ4-HB-PAC RB)

**7. PRIVATELY OWNED FIREARMS (POF)**

The Government of Nepal allows diplomats to import certain types of firearms. However, GSO must be notified for supplemental instructions before, repeat, before shipment is made.

**a. HAND GUNS**

**b. RIFLES/SHOT GUNS**

**c. TOY RELATED GUNS**
8. PRIVATELY OWNED VEHICLES (POVs)

Privately-Owned Vehicles (POVs): The Government of Nepal (GON) allows each customer to import one POV duty-free. Diplomats may import a new vehicle as long as they have a conformity of production (COP) certificate indicating the vehicle meets or exceeds Euro-3 vehicle emission standards. The vehicle must also be ordered direct from the manufacturer and shipped direct with a Certificate of Origin. A vehicle that is imported new may be sold locally at the end of the customer's tour. A recent concession has been made by the GON which allows diplomats to import a used vehicle that meets EURO-3 vehicle emission standards. Used vehicles imported into Nepal CANNOT be sold locally. They must be re-exported at the completion of the customer's tour. There is no waiver to allow imported used vehicles to remain in Nepal upon completion of tour. There is no age limit on used vehicles. (CH 21-Mar-2016 SDDC-PAC RB)

a. POVs (includes data on prohibited vehicles, colors, etc.)

For US-made vehicles: Since the GON does not have the tools or equipment to compare U.S. EPA and EURO standards, Post requests the importing customer obtain a certificate from the manufacture (or its dealer) certifying current U.S. EPA emission standards of the vehicle being imported is equivalent to EURO-3 vehicle emission standards. Note: 1. It is mandatory that prior approval from GON be obtained before shipping POV to Post. Although Nepal is a right-hand drive (RHD) country, left-hand drive vehicles may be imported on a case-by-case basis. Vehicles with tinted glass MAY NOT be imported to Nepal. Before shipping a POV to Post you should contact GSO for the latest information on POV import regulations, as the regulations change often. Email: kathmanduGSOCustomsandShippingRequests-DL@state.gov 2. POVs should be containerized in a 20 ft. sea container, marked and consigned as follows: EMPLOYEE NAME American Embassy, Kathmandu, Nepal Port of discharge: Kolkata Notify Party: American Embassy General Services Officer Kathmandu, Nepal Tel: 977-1-4237200, ext. 4586 Fax: 977-1-4007277 3. Upon arrival at Kolkata port, the vehicle will be cleared from Indian customs and container-trucked to Kathmandu. 4. The original bill of lading should be forwarded directly to Post (American Embassy, Kathmandu, ATTN: GSO, Maharajgunj, Kathmandu, Nepal) via air courier in advance of the POV's arrival at Post. 5. Customers who decide to ship a new vehicle should consider bringing spare parts, particularly air and oil filters, a set of shock absorbers, and an extra set of tires. A four-wheel drive vehicle is not necessary for Kathmandu. Large sport utility vehicles such as Ford Explorers, Lincoln Navigators, Hummers, and the like, are not good options for Kathmandu due to narrow roads and lanes leading up to houses, as well as narrow or awkward entrance gates. Vehicles of this size should be avoided. 6. There are Ford, Chevrolet, Toyota, Honda, Subaru and many other vehicle dealerships in Kathmandu. Vehicles may be purchased locally but will most likely have to be shipped in from the point of manufacture in order to be sold duty free. This will take, on average, two months. 7. Motorcycles and scooters are considered POVs. Do not ship motorcycles or scooters in your HHG until you have contacted the GSO for special importation and clearance instructions. 8. In order to register a vehicle in Nepal, please ensure the VIN and engine numbers are clearly visible for inspection and photography by GON Department of Transportation officials. If these numbers are NOT visible for photography, you will not be allowed to register or use the POV in Nepal. (CH 21-Mar-2016 SDDC-PAC RB)
b. MOTOR CYCLES/MOPEDS

There are no restrictions on importation of motorcycles or mopeds in personal effects. However, these must be crated separately and the airway bill must describe the shipment as "personal effects and motorcycle/moped". The packing list/invoice should also contain the serial (VIN) and engine number of the cycle. Motorcycles/mopeds are considered to be motor vehicles by the GON and therefore, if any customer intends to ship or buy a POV, a motorcycle/moped should not be shipped until importation permission is granted by the Ministry of Foreign Affairs. A recent concession has been made by the GON which allows diplomats to import a used motorcycle that meets EURO-3 emission standards. Used vehicles imported into Nepal cannot be sold locally. They must be re-exported at the completion of the customer's tour. There is no waiver to allow imported used vehicles to remain in Nepal upon completion of tour. There is no age limit on used vehicles. (CH 21-Mar-2016 SDDC-PAC RB)

c. GASOLINE/CATALYTIC CONVERTERS

5. FURNITURE, OVERSIZED
Government and Economy living quarters are generally smaller than those in CONUS. Economy housing in Germany may accommodate more HHG than government quarters, but are still smaller than homes and apartments in the United States. Many have narrow doorways and tight stairwells that cannot accommodate furniture that would fit easily into an American home. Service members shipping large items such as king and/or queen size box springs and mattresses, oversized sofas, or other large furniture items that cannot be disassembled, may encounter problems when residing in government or economy housing due to narrow stairwells. Washers, dryers, ranges, refrigerators, kitchen cabinets, and wardrobes are furnished for Government and Economy quarters. There is no Non-temporary storage in Europe authorized for HHG shipped in excess of what will fit, or is too large to be placed in, the Soldiers living quarters. Excess property shipped will not be stored at Government expense. Storage will be at the Soldiers expense.

6. PETS/QUARANTINE

Standards laid out in the following document address requirements for shipping dogs, cats, and ferrets from the United States. PLEASE NOTE: Ferrets are not accepted as pets for movement on AMC military or commercially contracted aircraft. If you require information on shipments for ferrets or other exotic pets please contact your local USDA field office. NOTE: For the remainder of this document the term pet or pets refers to dogs and cats only. ATTENTION: An examination fee of 55 Euro per pet will be implemented February 1, 2013, for all non-EU citizens who import a pet into the country. A. Quarantine Period - There is no quarantine period for pets entering Germany. B. Identification (Via standard electronic identification system with a read-only passive radio frequency identification device known commonly as a transponder Microchip): (1) Complies with ISO standard 11784 and 11785 (2) Where the microchip does not comply with ISO standard 11784 or 11785, the owner or the natural person responsible for the pet on behalf of the owner must provide the means necessary (Microchip Reader/Wand) for reading the non-ISO compliant microchip at the time of inspection (3) The microchip must be implanted before the primary rabies vaccination or valid rabies booster is given to the pet before traveling: a) Primary Rabies Vaccine - This is the first rabies vaccination a pet ever receives; for EU countries this also applies to the first rabies vaccine given after the microchip was implanted; that is, rabies vaccinations received prior to the pet being microchipped are NOT recognized by the EU. b) Valid Rabies Booster - This is a rabies booster that was given to the pet before the previous (Either the primary rabies vaccine or another rabies booster) rabies vaccination expired

C. Rabies Immunization: (1) Please refer to "http://www.aphis.usda.gov/regulations/vs/iregs/animals/ (Enter the destination country you will be residing in under "Search APHIS") (2) Pets less than three months of age coming from the United States may not always require the rabies vaccination IF: (a) These pets have pre-authorization from the EU member state BEFORE entering the country (3) Any one year dose or three year dose rabies vaccine is valid as long as it is a U.S. approved vaccine, and was administered according to the manufacturer's specifications (for instance, a vaccine labeled for 1 year use cannot be utilized as a 3 year vaccine) (4) A valid rabies vaccine must occur after the animal has been microchipped to be valid for entry into an EU member state (5) At least 21 days must have elapsed between the completion of the primary rabies vaccination (as specified above) and before the pet enters the EU member state. (a) However, if the animal received a valid rabies booster - 21 days does not have to elapse before travel. (6) If a pet has received a non-ISO compliant microchip and then received a valid rabies vaccination with 21 days having
elapsed since that vaccination and entering the EU member state; they:  
(a) Do not require implantation of another ISO compatible microchip, but are required to carry with them a microchip reader/wand capable of reading the non-ISO compatible microchip implanted in their pet  
(b) Do not require administration of another rabies vaccination before traveling as long as the rabies vaccination received is still valid  
(c) Can have an ISO compatible microchip implanted in their pet so they do not have to carry the reader/wand with them  
1. If they get this ISO compatible microchip implanted, they do not have to receive another rabies vaccination following this second microchip implantation. They are only required to document both chips on the required forms with their implantation dates  
D. Documentation (Verify the correct required documentation with your local USDA office):  
(1) APHIS Form 7001 (Nov 2010) Acquired from any Army veterinarian, local veterinarian or USDA office  
(a) Valid for only 30 days after issuance  
1. Timeframe the form is valid can be shortened per the requirements of the Airline the service member is traveling on  
(b) Requires certification by a USDA Accredited Veterinarian, Army Veterinarian, or GS 0701 Veterinarian before travel  
(c) This form is not required to enter the European Union (EU)  
1. However, it's highly recommended that service members acquire this form before travel from their on-base Army veterinarian to preclude the following:  
(a) If a member flies on a commercial carrier they may be required to have this form  
(b) If a member is scheduled to fly Patriot Express and somehow has to divert to a commercial carrier, having this form in advance alleviates last minute costs ($200) or delays  
2. This form is not required to travel on Patriot Express  
(2) EU Non-Commercial Pet Form (Bilingual Health Certificate)  
(a) For "Pets Dog, Cats, and Ferrets" destined to Germany, see link Under Pets heading Pets Dog, Cats, and Ferrets) Please refer to "http://www.aphis.usda.gov/regulations/vs/iregs/animals/  
(b) Valid for 10 days to enter European Union and 4 months once inside the European Union  
1. Timeframe the form is valid can be shortened per the requirements of the Airline the service member is traveling on  
(c) Requires certification by a USDA Accredited Veterinarian, Army Veterinarian, or GS 0701 Veterinarian before travel  
E. Helpful Hints:  
(1) As soon as you know you are going to travel and no later than 22 days prior to travel, get your pet microchipped first and then vaccinated for rabies if you have not already done so. Remember: A VALID RABIES VACCINE MUST OCCUR AFTER THE MICROCHIP IS IMPLANTED  
(a) This will ensure the required 21 days has elapsed post vaccination prior to travel  
(2) When completing your required documentation (before you mail the forms or travel to your local USDA office to get them certified, if not using your on base Army veterinarian), fax or over-night ship them to your local USDA office to ensure they are filled out correctly before traveling to their office  
(a) This will ensure you do not waste travel time or postage only to have to redo the paperwork  
(3) Many overseas bases have a full-time veterinarian on staff as well as commercial veterinarians available on the economy  
(a) Most bases require pets to be registered with the base veterinarian after arrival. Check with base veterinarian for details  
(4) The pet cage or carrier (See carrier shipping rules for correct cage dimensions based on pet size) used for shipping the pet must be labeled with the owner's name, pet's name, owners (or nominated persons) address, contact number and contact number at the final destination.  
(5) Since 21 Apr 2001, Germany has had a law in place prohibiting importation of certain dog breeds regarded as dangerous. For more information consult http://www1.zoll.de/english_version/a0_passenger_traffic/e0_vub/h0_dangerous_dogs/index.html. You may also contact the base veterinarian at your destination.  
F. Unauthorized Pets: The
import of Pit bull Terriers, American Staffordshire Terriers, Staffordshire Bull Terriers and their
crossbreeding is prohibited. G. Fees: (1) The USDA form certification fee (approximately
$70+, plus any shipping and handling if by mail) (2) Transporting pets to and from the PCS
destination is at the member's expense and cost is based on the size of the pet being transported.
Connecting flights may have fees in addition to AMC fees from BWI. (3) EFFECTIVE 1 February
2013, The fee for the import examination is 55 EURO. (4) All pet requirements are at the
member's expense

7. PRIVATELY OWNED FIREARMS (POF)

"Shipping a privately owned firearm (POF) into the Netherlands by US personnel or their dependents
is not prohibited outright, but as a practical matter it is almost impossible to accomplish legally.
Prior to shipment, permission to import the POF into the Netherlands is required from Dutch
customs. If the requester does not have a valid Dutch weapons permit, Dutch customs must refuse
permission to import the POF unless it will remain under the control of Dutch customs upon its
arrival. A Dutch weapons permit is not likely to be granted, as the application requires
documentation that few American citizens can provide. Given these difficulties, we recommend
that personnel moving to the Netherlands do not attempt to ship a POF into the country." In
order to ship a POF, Department of Defense personnel must have in their possession a document
showing authorized consent from the Netherlands Minister of Security and Justice. Information for
obtaining this consent can be provided by using the website shown
reside on the economy must register weapons with local police authorities. Failure to register
firearms may result in confiscation of weapons. The use of firearms in the Netherlands is
uncommon because of hunting formalities, availability of shooting ranges and stringent laws
governing there use. b. Host nation policy is to absolutely minimize the import of weapons.
Although there is no restriction on import quantities, the need for having a weapon must be proven
to local authorities. Military installations might have restricted storage facility for POFs, due to lack
of adequate storage facilities. c. Membership with a local (Dutch) rod and gun club is
mandatory. Firearms must be fired (at least 8 times a year) at an authorized range. d. Firearms may be shipped in HHG or UB. However, they must be clearly identified on the carrier's
descriptive inventory.

a. HAND GUNS

b. RIFLES/SHOT GUNS

c. TOY RELATED GUNS

d. OTHER (i.e. AMMO, EXPLOSIVES, ETC)

8. PRIVATELY OWNED VEHICLES (POVs)
No restrictions identified.

a. **POVs (includes data on prohibited vehicles, colors, etc.)**

(1) General information: Local customs permit registration of more than one POV, tax/duty free. Other than HQ JFC Brunssum eligible registration of POVs might encounter to pay more registration fees than used to in the US to license and register a POV. AAFES auto service will reduce service to light maintenance (sample: oil change, etc.) Heavy duty maintenance is no longer available through AAFES, only local economy vendors/dealers/garages. Large American vehicles can and may be operated in the Netherlands, but member may encounter challenges when parking.  

(2) Eligibility for licensing: Driver must have a valid US driver's license in possession. Minimum age to drive a moped is 16 years. Minimum age to drive a motorcycle or automobile is 18 years. Special requirements are applicable for members who have no valid US driver's license in possession.  

(3) Long Term Lease Vehicles: Because a leased vehicle is not registered nor owned in the member's name, import is not allowed by Netherlands customs as a tax-free vehicle. It is recommended that the member's destination sponsor contact the Military Base Vehicle Registration Office for update information and requirements.  

(4) Automobiles, Mopeds, and Motorcycles must be registered at local military authority, and a drivers license must be obtained prior to operation of the vehicle.

b. **MOTOR CYCLES/MOPEDS**

Mopeds/motorcycles can be imported in personal property shipment duty free. There is no restriction on the number of vehicles imported.

c. **GASOLINE/CATALYTIC CONVERTERS**

Unleaded gas is available, however, not in all European communities. Members no longer have to remove catalytic converters from their POV prior to shipping. However, members must have their catalytic converter systems tested annually to ensure their POVs have not been run on leaded fuel while overseas. In addition, a final test will be required 10 calendar days prior to the POV being turned in for shipment back to the Customs Territory of the United States. This requirement is to confirm the POV is in conformity with EPA Federal and Regulatory Emission Control Standards.

d. **INSURANCE AND SAFETY REQUIREMENTS**

(1) All vehicles must be in sound mechanical condition, have no protruding parts, and tires must have sufficient tread; i.e., automobiles may not have tread less than 1.6 millimeters.  

(2) If a car is intended to be used, or could be used, to pull a trailer, it must have two outside mirrors (1 left/1 right) and a directional signal on each side of the vehicle.

ENSURE DD FORM 1299 IS ACCOMPLISHED FOR EACH SHIPMENT AND CONTAINS THE FOLLOWING STATEMENT IN THE REMARKS BLOCK DEPARTMENT OF STATE MANAGED SHIPMENT NOTE: THIS CAN BE ACCOMPLISHED BY USING THE ADDITIONAL INFORMATION FIELD (SEE DPS SMARTBOOK ON WWW.MOVE.MIL (PPSO TAB)). ---c. AFTER SUBMISSION OF REQUIRED DOCUMENTS TO DOS, PLACE THE DPS SHIPMENT RECORD IN A ---CANCELED--- STATUS. OTHER: 1 - Active duty military and military sponsored civilians on PCS to New Zealand. All personal property is imported duty free with the stipulation they are for the member's personal use and will not be sold or otherwise disposed of. The responsible transportation office for active duty military and DoD sponsored civilians on PCS to New Zealand is the 337 ASUF, Canberra Australia, RAFK. Refer to Australia international PPSO for consignment and contact information. 2 - All personnel must obtain a New Zealand Diplomatic Exemption Visa (DEV) in their passport prior to arrival to be officially recognized and confirm their right to enter New Zealand. Application can be made to the nearest New Zealand Embassy/High Commission for a DEV. 3 - MEDICAL CLEARANCES--A medical clearance issued by the Department of State Office of Medical Clearances (MED) is required for everyone (besides Active Duty Military and dependents) before arriving at Post for a tour of duty. Active duty military and their dependents are given a medical clearance by DOD. Other civilians from all agencies who will serve a tour at post or will be TDY at post for more than 30 days need to contact MED at medclearances@state.gov. If you or your family members have not had a clearance before, please allow time for a full-physical exam that must be completed on the MED forms. Other forms or other physicals cannot be accepted. If you have had a prior clearance, it will probably need to be updated before coming to post and MED can give you guidance on how to do that. MED will assist with providing the proper forms and notifying you when you and all your family members are cleared medically to go to Post. If you have any questions that MED Clearances can’t answer, you can contact the RMO in Canberra, Australia, who covers New Zealand. 4 - WHEN TO SHIP--Because of very strict Bio-security requirements of New Zealand, shipments should not arrive prior to customer arrival at post. Shipping times vary but are normally a minimum of 6 weeks from ELSO for sea freight, for example, but can take up to 3 months. Losing posts are welcome to contact the Wellington GSO to inquire about transit times from their location. Wellington GSO organizes the
receipt of personal effects shipments for all of Mission New Zealand. (CH 23-Mar-2018 USTCJ4-HB-PAC RB)

2. CUSTOMS CLEARANCE PROCEDURES, REQUIREMENTS, AND RESTRICTIONS

--New Zealand Ministry of Agriculture and Fisheries enforces strict adherence to regulations regarding importation of prohibited items. It is imperative customers comply with these regulations; failure to do so could result in lengthy delays in the clearance of effects, possible confiscation of prohibited items and potential fines.--Shipments will be inspected upon entry into New Zealand so it is important to clearly and accurately identify items on packing lists. It is a good idea to carry a copy of packing lists from UB and HHG pack-outs when entering NZ. Grouping items together that are permitted, but will require inspection or fumigation, when packing will save time when inspectors need to pull certain items from shipments for secondary inspection or treatment. Items such as hiking boots, camping gear, lawn chairs, golf shoes, dried plants, holiday ornaments made from natural materials, wreaths, baskets, and anything made from bone or feathers are often inspected for soil matter and contaminants. These items should be clearly labeled. If after inspection it is determined that these items require treatment they will be removed. Make sure outdoor items are free of dirt and dried plants. Plant-based objects such as dried flowers, leaves and pine cones will most likely be considered a biosecurity risk and destroyed. Recommend customers do not bring these items. Some things are better left in storage because they will be burned, fumigated or returned to the USA at customer expense. For a complete up-to-date list of prohibited items, visit website www.mpi.govt.nz. (CH 23-Mar-2018 USTCJ4-HB-PAC RB)

3. CONSUMABLES

-OTHER PROHIBITED AND/OR RESTRICTED ITEMS: PROHIBITED ITEMS include: straw packaging, straw handicrafts may be allowed after examination and treatment. Coral, clam, turtle shells, tortoise shells, and ivory in any form including curios, jewelry, souvenirs and handicrafts. RESTRICTED ITEMS include: unprocessed wool and animal hair; including yarns, rugs and apparel. Riding equipment including clothing, footwear and grooming equipment. Camping gear. Animal
remedies, foots, and vaccines. NOTE: Restricted items must be declared and may require inspection and/or treatment. They may be prohibited depending on origin and packaging. --Please note certain food items such as honey and popcorn or anything that can be planted and grown, such as dried beans, cannot be brought into New Zealand or sent through the DPO. A full list of precluded items is available on request or through the website http://www.mpi.govt.nz/travel-and-recreation/arriving-in-new-zealand/goods-clearance/. Go to Travel and Recreation and carefully read the Moving to New Zealand: what you need to know pamphlet. Further questions can be answered by contacting: CLOWellington@state.gov or info@mpi.govt.nz.(CH 23-Mar-2018 USTCJ4-HB-PAC RB)

a. ALCOHOLIC BEVERAGES

Importation in personal property shipments is not permitted.(CH 23-Mar-2018 USTCJ4-HB-PAC RB)

b. CIGARETTES/TOBACCO PRODUCTS

Shipments of cigarettes/tobacco products between CONUS and overseas or within overseas countries may be shipped subject to host country requirements/restrictions identified. When undefined or in doubt, the TMO will request clarification by message from the responsible transportation authority at destination.(CH 23-Mar-2018 USTCJ4-HB-PAC RB)

c. COSMETICS

No restrictions identified.

d. FOOD STUFFS AND MEATS

The following items are prohibited: All fresh fruits and vegetables; egg cartons. Honey; including pollen, honeycombs and other bee products including propils and medications. Meat and meat products; fresh, cooked and small goods. Fresh water fish species including salmon and trout (canned products subject to examination). --FINES-The Government of New Zealand instituted fines for non-declared bio-security hazards for anyone found entering New Zealand with undeclared plant, animal or food material. Travelers found carrying these undeclared items can be issued an instant fine of NZ$400 (approximately US$300) at the point of entry. Bio-security is a serious issue to New Zealand and fines will be administered immediately and without warnings. Diplomatic status will not exempt customers from fines. For a complete up-to-date list of prohibited items, visit website www.mpi.govt.nz.(CH 23-Mar-2018 USTCJ4-HB-PAC RB)

e. MEDICAL (NARCOTICS)/PHARMACEUTICAL PRODUCTS

Please take note that certain prescription medications containing controlled substances may not enter New Zealand. There are also restrictions on the importation of some herbal medicines/products. All medicines must be in clearly marked containers with corresponding dosage
information and a letter from a doctor. If customers require further information on restricted medications, contact should be made with Post. Post will provide contact details for our local Embassy Medical Advisor and with the RMO based in Canberra. Most pharmaceutical products are available in country; some may cost more than in the US. New Zealand has a national health system which includes a subsidy on many pharmaceutical drugs if prescribed by a general practitioner. This subsidy is not available to foreigners. Some prescription drugs are not available locally. Instead, there may only be one or two options of prescription drugs available for a particular condition. If you have specific needs, we suggest you bring an initial quantity with you and arrange in advance for future shipments to be made by mail from the US. Again, customers will need to consult with the Embassy Medical Advisor and the RMO on any restrictions at the time. (CH 23-Mar-2018 USTCJ4-HB-PAC RB)

4. ELECTRICAL EQUIPMENT

No restrictions identified.

a. HOME COMPUTERS

No restrictions.

b. TVs/VCRs

New Zealand uses the PAL broadcast television system, and is going digital, so a TV designed for use in the US (NTSC) will not work in New Zealand. Post suggests bringing a multi-system (PAL and NTSC) unit, which will allows customers to watch NZ TV and take maximum advantage of local TV stations and DVD rentals. US DVD players generally only work with Zone 1 disc (USA). NZ players are Zone 4 and sometimes, Zone-Free, which will play both US and NZ discs. (CH 23-Mar-2018 USTCJ4-HB-PAC RB)

c. OTHER (i.e. COMPATIBILITY, ETC)

New Zealand voltage is 230 volts at 50 cycles. Transformers are required for American appliances of 110 volts. NOTE: Electronic digital clocks or washer/dryers which are designed to function at 60 cycles will not keep time properly in New Zealand. (CH 23-Mar-2018 USTCJ4-HB-PAC RB)

5. FURNITURE, OVERSIZED

Housing in Wellington is government-owned or leased and furnished. In most cases, residences have very limited space (storage and otherwise), so please keep this in mind when packing out. Post has no storage facilities available, so customers should plan on government-provided furniture staying in the residence. Commercial storage is available, at the personal expense of the customer, but it is very expensive. (CH 23-Mar-2018 USTCJ4-HB-PAC RB)

6. PETS/QUARANTINE
Importation regulations change often. Members considering importing their cat or dog must contact the Ministry of Agriculture and Fisheries (MAF) Import Management and Quarantine office AT LEAST SIX MONTHS prior to intended importation date. The commercial number for the Ministry of Agriculture and Fisheries (MAF) is 011-64-4-498-9624. Current standards are as follows: a. The animal must have a microchip inserted or a tattoo implanted by a veterinarian for identification purposes (the chip that is currently preferable is the Trovan Destron Fearing chip and MAF can provide names and phone/fax numbers of suppliers. This must be done at least six months prior to export. b. Primary rabies vaccination must have taken place not less than six months and not more than one year prior to shipment. NOTE: The microchip/tattoo identification number should be on the rabies certificate. OR: Booster vaccination must have taken place not more than one year prior to shipment. c. Rabies Neutralizing Antibody Titration test results, showing antibodies of greater than 0.5IU/ml must be performed at least six months prior to the first day of quarantine in New Zealand. Time limits may vary depending on rabies vaccination history. Additional information is available at www.maf.govt.nz. d. A second Rabies Neutralizing Antibody Titration Test is also required to be performed within the 30 days preceding the first day of quarantine in New Zealand. To be permitted entry into New Zealand, animals must be issued with an Import Health Permit (application forms available from the MAF point of contact). You must already have CONFIRMED space arranged at a MAF approved quarantine facility, there are currently two in the Auckland area. Rates range from NZ$35.00 - $45.00 per day for a dog and the required period of confinement is 30 days. These facilities currently have a six month waiting list. There is only one quarantine facility in the Christchurch area. Also accompanying your completed application must be: (1) A check or money order for NZ$135.00. (2) Letter from the operator of the quarantine facility, co-signed by the supervising MAF Veterinarian confirming availability of space for the animal at the time of importation. (3) Rabies antibody titration test results. This needs to be greater than 0.5IU/ml, taken at least six months prior to the first day of quarantine in New Zealand. (4) Letter from the animal's veterinarian stating the date blood was taken from the animal for the laboratory testing above. The pet owner must also contact the airlines they are traveling on, domestically within CONUS and international. This should be done well in advance of the planned travel dates. The cost is high and is based on excess baggage costs which go by size and/or weight of the animal, this varies from domestic to international flights. Once an animal has been in quarantine in Auckland for the required 30 days, further transportation costs are involved to get the animal to its final destination, again at the members expense. --IMPORTANT--Costs associated with transporting pets out of the US to New Zealand along with meeting all requirements are approximately US$3,000. Post is experiencing increased difficulty in finding leased housing that will allow tenants to have pets – post cannot guarantee success. If a customer plans to import a pet, please notify Post promptly. (CH 23-Mar-2018 USTCJ4-HB-PAC RB)

7. PRIVATELY OWNED FIREARMS (POF)

Owners of guns must acquire a firearms license from a New Zealand Police Arms Office at a cost of NZ$123.75. The owner must then apply to the same office for a permit to import their gun. The New Zealand Police hold a list of approved makes and models of guns, so members should apply before shipment to see if their gun is approved and to obtain a copy of the Firearms Code. The commercial phone for the New Zealand Police Arms Office for Christchurch is 011-64-3-379-3999.

a. HAND GUNS
Strict requirements exist for ownership of handguns in New Zealand. Contact the New Zealand Police Arms Office for specific information. (CH 23-Mar-2018 USTCJ4-HB-PAC RB)

b. RIFLES/SHOT GUNS

Sporting rifles and shotguns may be imported but must be inventoried as a separate item on the household goods inventory. Member must have their original U.S. firearms license/permit for registration in New Zealand. Contact the New Zealand Police Arms Office for specific information.

(CH 23-Mar-2018 USTCJ4-HB-PAC RB)

c. TOY RELATED GUNS

No restrictions identified.

d. OTHER (i.e. AMMO, EXPLOSIVES, ETC)

Importation PROHIBITED. (CH 23-Mar-2018 USTCJ4-HB-PAC RB)

8. PRIVATELY OWNED VEHICLES (POVs)

Effective 1 March 2005, the 337th Air Support Flight, Canberra, Australia assumes this management responsibility. --IMPORTANT-Automobiles in New Zealand are right-hand drive. Left-hand drive vehicles may be imported, but they must be exported at the end of tour. ---Post discourages importation of left-hand drive vehicles---due to strict Ministry of Transport testing for compliance with New Zealand regulations. POV storage in the US for one left-hand drive vehicle is allowed if you choose not to bring your vehicle to post. It can cost up to US$2,500 and take several weeks to replace headlights required to meet the New Zealand right-hand drive standards to pass the vehicle compliance inspection. Please note not all models of headlights are available in country. These costs can be itemized and reimbursed within the limitations of the Foreign Transfer Allowance. -- Importing a vehicle to NZ and if it left hand drive can be a very long and expensive process once the vehicle has arrived in NZ, first it will be inspected by NZ Customs and the Ministry of Primary Industries( MPI ) this is the Biosecurity Team that will also inspect items in your UAB / HHE shipments, if MPI find any bugs, spiders, etc. in the Vehicle, it will be flagged for Fumigation, which will delay the process longer, after it is cleared by Customs and MPI it will then go to a Vehicle Testing Station ( Compliance ) where they will check everything on the vehicle to make sure it passes and it is good to drive on NZ roads.---Left Hand Drive Vehicles : Most if not all left hand drive vehicles will need to have the heads lights adjusted or replaced to comply with NZ standards, the Compliance center can’t tell by looking at the model of the vehicle on the system, the vehicle has to be physically here, as the head lights are hooked up to a beam light to check the direction they are pointing at. An estimated cost for compliance is$450 NZD, plus GST, if it needs headlights, etc. extra cost on top and first time Registration in NZ for the vehicle is around$100 - $250 NZD, it depends on the make / model of the vehicle as every vehicle is different. (CH 23-Mar-2018 USTCJ4-HB-PAC RB)
All POVs must be cleared through New Zealand Customs. Members ordered PCS to New Zealand may import two POVs duty free, however, the cost of shipping the second vehicle is borne by the member. Origin must submit by facsimile the advance documents to the 337th Air Support Flight at commercial phone number 011-612-6273-5231 to expedite the Custom clearance. DSN is not available. Required documents are: a. Copy of official orders b. Copy of drivers license c. Copy of vehicle certificate of title or registration d. Shipping notices; CBL/GBL e. Copy of DD Form 788 f. Value of vehicle determined by using the Kelly Blue Book g. Global POV Contractor submits the completed New Zealand Quarantine Declaration. (1) Active duty military and civilians assigned to tenant activities. Member should hand carry to New Zealand (not place in HHGs) title and bill of sale as proof of ownership, purchase price, purchase date, POV identification number, etc. Member should also know cubic inch measurement of engine. Consignment of vehicle should be to Port Lyttelton, NZ, water port code (VE5). Importation is duty-free, with the provision the vehicle cannot be sold before 2 years in country and it would be converted to right hand drive before sale. Member also must declare POV will be reshipped if they are posted before a 2 year tour is fulfilled. (2) Active duty military and civilians assigned duty with the American Embassy, Wellington, New Zealand. Shipment of POV should be coordinated through the American Embassy, Wellington, NZ. Consignment of vehicle should be to Wellington, NZ (VE2). Importation is duty-free, with the provision the vehicle cannot be sold before 3 years in country and it would be converted to right-hand drive before sale. If thinking of selling the imported vehicle upon departure, please note that selling a vehicle that has been in the country for less than 3 years will require payment of Good and Services Tax (GST), currently 15%. Also, left-hand drive vehicles cannot be sold in-country.h. Post recommends reviewing the following websites for more information: --- http://www.aa.co.nz/cars/licensing-safety-fees/export-import-car/ --- https://www.nzta.govt.nz/vehicles/importing-a-vehicle/ (CH 23-Mar-2018 USTCJ4-HB-PAC RB)

b. MOTOR CYCLES/MOPEDS

Motorcycles/mopeds are considered POVs and may be shipped in personal property. Motorcycles should also be steam cleaned prior to shipment and member hand carry steam cleaning certificate to facilitate agriculture clearance. (CH 23-Mar-2018 USTCJ4-HB-PAC RB)

c. GASOLINE/CATALYTIC CONVERTERS

New Zealand has recently converted to unleaded fuel only. Catalytic converters need not be removed. (CH 23-Mar-2018 USTCJ4-HB-PAC RB)

d. INSURANCE AND SAFETY REQUIREMENTS

Any member under the age of 25 importing an American vehicle with engine power over 2 liter should know insurance companies in New Zealand will only insure them for third party cover at very high premiums. Member will have great difficulty getting an insurance company to insure them.
Cost of insurance on a left hand drive vehicle ranges from NZ$250.00 a year, with a NZ$1000.00 deductible, to NZ$1000.00 a year, with a lower deductible (NZ$500.00). A statement of record from a previous insurer shows an accident free and no claim history will greatly assist in obtaining insurance at a more reasonable price. SA\n\nSAFETY REQUIREMENTS: Part of the clearance process is the requirement to apply to the Land Transport Safety Authority (LTSA) for a permit to Import a left hand drive vehicle. Once this is obtained a physical safety and road worthiness check is performed by the same authority at a minimum cost of NZ$120.00, costs go up if modifications are required. After the safety inspection, a Warrant of Fitness (WOF) is issued. Generally, any vehicle meeting local state vehicle inspection criteria will pass a Warrant of Fitness inspection in New Zealand. Regulations covering seat belts require lap and shoulder restraints for the two front seats, i.e., the driver and passenger nearest to the door. Shoulder restraints must be the dual sensitive emergency locking retractor (Inertia reel) type. To replace these could cost NZ$485.00 to NZ$585.00. Also required are the same belts including shoulder restraints for back seat passengers nearest either door. All other seats require approved lap belts. Another requirement is at least one high-mounted stop light at driving eye level at the rear of the vehicle. On a convertible, this is to be no lower than 152 millimeters below the lower edge of the rear window. On other cars, no lower than 77 millimeters below the lower edge of the rear window. Once satisfying all of these requirements the member must register their POV. Fees are based on horsepower rating or cubic inch engine size and for the first time registration in country can cost from NZ$190.10 to NZ$368.60 for six months or NZ$265.20 to NZ$444.45 for one year (approx. US$129.27 - $250.65 and $180.33 - $302.25) Subsequent registrations cost NZ$82.65 for six months or $157.75 for a year (approx. US$56.20 or $107.27). The member should now have their Left Hand Drive (LHD) Import Consent, WOF, and Registration certificate. They must now apply to the LTSA for a Permit to Operate a LHD vehicle on the road. There is no cost for this permit. New Zealand Ministry of Agriculture and Fisheries may also require the vehicle be steam cleaned at port of entry if found to have excess dirt or bugs in wheel wells or about the engine. The cost is NZ$106.87 and is payable by the member. Recommend POVs be steam cleaned prior to shipment and receipt or certificate to verify cleaning be placed in the window of the car. There are many safety restriction, therefore, before shipping your POV, recommend a visit to www.ltsa.govt.nz. Second hand vehicles are affordable and may be cheaper than shipping your own in the long term. (CH 23-Mar-2018 USTCJ4-HB-PAC RB)

2. CUSTOMS CLEARANCE PROCEDURES, REQUIREMENTS, AND RESTRICTIONS

a. All airway bills for HHG shipments to Lagos must be consigned American Consulate, Lagos, Nigeria (first name, last name). It will be impossible for the ministry to approve in future any consignment that may be addressed to carriers inclusive or its local agents, who to the best knowledge of this ministry do not have any diplomatic status. The consignee of any consignment is the legal owner of the goods being imported. If the consignee, nature of commodity, and handling information are not completed in this exact manner, long delays in clearing shipments in Lagos are likely.

b. Advance copy of airway bill, PPGBL, and packing list must arrive in Lagos 3 weeks before flight. PPGBL alone is not acceptable. The 3-week time lag between receipt of advance documents and arrival of goods provides Embassy time to get necessary approvals for the Nigerian Government and to begin customs processing. Also, send message to American Consulate providing shipping data, airway bill, and PPGBL number. In the case of ocean shipments, two originals of the carriers ocean bill of lading must arrive in the post 3 weeks before the vessel. Delay vessel booking to ensure this 3-week customs processing time to avoid demurrage charges pending customs clearance and member arrival.

c. Member should arrive in country 1 week before the goods, as Foreign Ministry will not accept document until member is at post. Goods should not be shipped prior to member arriving in country and arrival message sent. Temporary storage of goods may be required to ensure member is in country and registered with the Nigerian Ministry of Foreign Affairs prior to shipment.

d. Send documents via DHL or equivalent commercial air carrier service, not air mail. Address documents to American Consulate General, ATTN: GSO Shipping, Lagos, Nigeria.

(1) The reciprocity issue with the Government of Pakistan has been cleared and the restriction on shipping vehicles to Pakistan has been lifted. However, prior to shipping any vehicles, make note that tinted windows in vehicles are illegal in Pakistan. If your vehicle currently has tinted windows and you plan to ship it; you must -- repeat must -- have the tinted windows replaced prior to shipment -- repeat -- prior to shipment. Due to the threat of terrorism and the use of vehicles with tinted windows in terrorist attacks, this issue is not negotiable with the Government of Pakistan. We also recommend that you ship a supply of spare parts that will require replacement due to normal wear and tear. POVs can be purchased locally but at very high prices.  

(2)
Shipping/Transportation Costs: The U.S. Government will pay the shipping costs for your vehicle from the port of Karachi to Islamabad.

(FYI: Midas charges approximately 125 USD for removal of these parts and will re-install it on your vehicle when you return as long as you have your receipt.)

Shipment should be consigned as: Moving Company C/O Employee Name TEL. NO. Panama, Rep. Of Panama (1) The two moving companies in Panama which have experience hardlift shipments are: Kora Transportation (Government contractor) Warehouse 6, Curundu Tel No. (507) 232-6639/6715 Fax No. (507) 232-6943 E-mail: kora@pty.com POC: Mrs. Delcia Belgrave - Int'l Traffic Dept. And Balboa International, S.A. Milla 8, Via Transistmica Tel No. (507) 231-7136/7244 FAX No. (507) 231-7385 E-mail: bisamov2@sinfo.net POC: Mr. George O'Masta - General Manager (2) It is extremely important that employee be in country prior to arrival of POV. Also extremely important that moving company receives complete address and telephone of owner, so that contact can be made as soon as shipment arrives to avoid demurrage charges. (3) Moving company will need a passport, retiree carnet, identification, and emissions test of vehicle. Moving company will process a special permit from customs to deliver the car to avoid demurrage charges. Afterwards, a customs liquidation is prepared which will take approximately one month to complete. (4) Government contract moving company will unstuff POV using service members orders, but retiree/dependent or anyone not assigned to Embassy must clear customs and pay import taxes. 

(5) If employee is not in Panama at the time POV arrives, no documentation can be processed and expensive demurrage costs will be incurred. (6) For additional details, contact the above moving companies.

a. POVs (includes data on prohibited vehicles, colors, etc.)

(1) No limitation on type of POV. The Government of Panama requires a safety inspection of all vehicles at time of registration and annually thereafter. Post will provide a list of authorized inspection facilities upon arrival. Cost of this inspection is generally $10. (2) If possible, vehicles should have license plates. Employees can sell or replace vehicles duty free 24 months after vehicle registration date in Panama or at the end of tour, whichever is first. (3) Original Certificate of Title and a commercial invoice showing the current value (if available) will be required to exonerate and register a car in Panama. If the car is new, the original Bill of Sale will be required. Also, if the employee has a Certificate of Emissions Inspection, that should be brought as well to cover the possibility that, at some future time, the Government of Panama will not accept the Embassy certificate that all US cars shipped will have catalytic converters. This would prevent having to do the inspection here after arrival. (4) Bill of Lading (B/L) mark and consign to:
b. MOTOR CYCLES/MOPEDS

No restrictions identified.

c. GASOLINE/CATALYTIC CONVERTERS

(1) An emissions inspection certification is required to inspect vehicles in Panama. At present the Government of Panama has accepted the assurance of the Embassy that cars shipped from the United States will have a catalytic converter and is not requiring this certification. Catalytic converter should not be removed from vehicles. Should an emissions inspection certification be required, it can be obtained in Panama. Current cost is $15.00 for gasoline engines and $20.00 for diesel engines.  (2) Both Unleaded and leaded gasoline are readily available in Panama. Post has an agreement for the purchased of duty-free gas coupons with Shell and Delta Gas of Panama. Check with the Administrative Section after arrival about the coupon program.

d. INSURANCE AND SAFETY REQUIREMENTS

Post requires all personnel to have adequate insurance coverage for their POV. Insurance must be with a company licensed to underwrite insurance in Panama. Not all US insurance companies will underwrite in Panama. Arriving personnel will be advised of required coverage upon arrival at post.

Normally, only right-hand drive vehicles can be imported. All left-hand drive vehicles MUST be re-exported at the end of the tour in Papua New Guinea if the vehicle cannot be sold to another American diplomat. Vehicles cannot be sold to members of other diplomatic missions or the general public. New vehicles and used vehicles can be imported or bought locally duty-free. All common Japanese models and Australian Fords are sold and serviced in Port Moresby. Cars purchased duty-free may be sold after 24 months without penalty. However, prorated duty must be paid for vehicles sold before the 24-month period expires. At present, the duty on new cars is 70-125 per cent of the FOB price. Employees can drive on foreign licenses for the first six months after arrival at post. A Papua New Guinea driver’s license is obtained through the Department of Foreign Affairs through the normal diplomatic channel. It takes up to two months to obtain an official free license. There is a paid Papua New Guinea Driving License which only takes an hour to be issued by paying a fee of US$31.00 (PGK60.00) by showing your foreign driver’s license and Passport copy. There is no fee, eye examination, or driving test. For official free Licenses regulatory fees are also waived for Mission personnel. The Embassy will provide a vehicle for the first and last 30 days of the customer’s tour if necessary. Since most of the Mission staff reside on the compound, carpooling may be required at times. POV IMPORT RESTRICTIONS: The Government of Paraguay does not allow vehicles older than ten years to be imported into the country. This law applies to everyone regardless of diplomatic status. In order to avoid potential importation, registration, suitability, or security problems, Embassy employees are prohibited from importing into Paraguay for personal use any vehicle which may be considered "flashy," a luxury vehicle, or which otherwise draws unwarranted attention to oneself or the United States Government. Examples of ostentatious vehicles are large and expensive SUVs, luxury sports cars, and similar high-end vehicles. Employees should expect close scrutiny of any vehicle whose value when new is greater than $45,000.

a. POVs (includes data on prohibited vehicles, colors, etc.)

(1) POVs should be shipped in a container covered by a through-bill-of-lading to Asuncion. If both HHG and POV must be shipped by surface, please DO NOT ship HHG and POV in the same container. The Embassy recommends shipment through Buenos Aires to Asuncion. Lopez Ave., Asuncion, Paraguay. Original B/L should show name of the owner, make of the vehicle, year, color, and VIN number or engine number. Most of the time, the POV arrives in Asuncion before the Embassy receives the shipping documents causing extra storage fee charges as the POV cannot be picked up from customs. Embassy cannot start the clearance of the paperwork through the GOP in advance if Embassy does not receive the original shipping documents (B/L and bill of sale). (3) Driver License: The GOP requires each driver to have Paraguayan drivers license. Twelve US dollars is charged for the license. The employee should bring his/her US or international driver license and proof of his/her blood type in order to obtain the Paraguayan license. US driver license or international driver permits are accepted for 60 days from the date of arrival in country. (4) Selling a POV at Post: An employee shipping a POV must provide the original bill of sale to Post, if she/he plans to sell it in-country during the tour. When selling a personal vehicle, a married employee's spouse must also sign the transfer of title. If the spouse has
to leave the country earlier for some reason, she/he should leave a power of attorney for his/her spouse. (5) Consular invoice is not required any longer. It requires the original B/Ls, a copy of the POV bill of sale, and a copy of the HHG packing list. REMARKS: If it is possible, provide all the shipping information and a copy of the B/L by FAX to the Shipping Office. The FAX number in GSO/Shipping Office is 011-595-21-213878. b. MOTOR CYCLES/MOPEDS

Motorcycles/mopeds are not considered POVs and can be imported duty free. The Ministry of Foreign Affairs is imposing restrictions on diplomats who would like to import a motorcycle. In order to import a motorcycle, special authorization is required by the MFA and there is no guarantee that this would be granted. In the event that you would get approval to import a motorcycle, you would then not be able to sell it at the end of your tour unless you were to pay the duties.

c. GASOLINE/CATALYTIC CONVERTERS

d. INSURANCE AND SAFETY REQUIREMENTS

   (2) Due to the use of commercial narrow-body aircraft, external shipping containers for Code T shipments moving to/from South and Central America in accordance with PPP-B-601, style A or B, are required, not to exceed 60 inches in height. In accordance with Item 508, Personal Property International Rate Solicitation, special packing arrangements will be authorized by the PPSO for oversize items which will not fit into the restricted height container.

   c. HARD LIFT AREA

   Hard lift area for all military services. Air clearance, when required, will be obtained from the appropriate Air Clearance Authority (ACA).

   d. UNACCOMPANIED BAGGAGE

   No restrictions identified.
2. CUSTOMS CLEARANCE PROCEDURES, REQUIREMENTS, AND RESTRICTIONS

a. UNACCOMPANIED BAGGAGE (UAB), HHG/HHE, and POV shipments must be planned so as to arrive in Peru AFTER the employee’s arrival. HHG and POV shipments must be sent under two separate bills of lading. Paperwork for tax exemption on import duties of UAB, HHG/HHE, and POV cannot be processed until the employee is accredited to the U.S. Mission. If a shipment arrives at Post before the arrival of the employee, and it is not cleared from customs within 30 days, the Government of Peru (GOP) considers the shipment abandoned and will auction it. The process to clear shipments out of customs is time-consuming. The following are general timeframes for clearance of various types of shipments:
- UAB: 3–4 weeks after shipment’s arrival in Lima and the employee’s accreditation is submitted to the GOP
- HHG/HHE: 4–5 weeks after shipment’s arrival in Lima and the employee’s accreditation is submitted to the GOP
- POV: 6–7 weeks after shipment’s arrival in Lima and employee’s accreditation is submitted to the GOP
b. Essential documents, medicines, and clothing should be brought with you on your person.
c. The Peruvian Minister of Foreign Affairs (MFA) allows duty free entry for a maximum of three shipments: One UAB and two HHG/HHE, or two UAB (up to total allowable weight) and one HHG/HHE. Additional personal effects shipments will be subject to each employee’s limited annual quota of duty free importations (the quota varies depending on the diplomatic title). Employee’s specific quota can be obtained from the Customs and Shipping Unit, and 80 percent of this quota is normally assigned for an employee’s commissary importations. In any event, the quota is very limited, and therefore, should not be used for UAB and HHG shipments. It is critical that employees know what they are shipping to Post and provide the exact information regarding HHG/HHE and UAB shipments and copies of inventory lists to the Customs and Shipping Unit upon their arrival.
d. Additionally, employees should be aware that the Peruvian MFA only grants duty free importation for the first six months from the date of arrival of employee. All shipments arriving after that time are subject to the yearly quota.
e. Post Lima is a fully furnished Post. Use of government provided storage in the U.S., or in Antwerp, for non-essential HHG/HHE is strongly recommended.
f. Supplemental Shipments. The tax-free importation of supplemental and layette shipments are subject to the availability of the diplomatic quota granted by the GOP on a yearly basis. A packing list with the itemized value of the shipment is required. Please contact the Customs and Shipping Unit before planning all supplemental and layette shipments.
g. Send questions as well as copies of all shipping documents to LimaGSOShipping@state.gov, telephone: +51-1-618-2193 or +51-1-618-2194, well in advance of your arrival at Post.

c. OTHER (i.e. COMPATIBILITY, ETC)

a. Post suggests that employees not ship antiques, replicas, artifacts, paintings, textiles or handicrafts to Peru, as they will need to be verified and registered by the Ministry of Culture after arrival at Post. This registration costs approximately $100.00 per item if handled through a moving company or $10.00 per item if the employee does it on his/her own.

b. During the course of an assignment in Peru, employees are advised that the purchase of any antiquity, regardless of the country of origin, is strictly controlled by the Government of Peru. Upon departure from Post, employees may encounter difficulties with customs clearances if they have not made themselves aware of and followed the laws regarding the exportation of such items.

5. FURNITURE, Oversized
No restrictions identified.

6. PETS/QUARANTINE

a. At least two months before bringing a pet to Post, pet owners should contact the Customs and Shipping (C&S) Unit via email at LimaGSOShipping@state.gov to obtain importation guidance. The C&S Unit will promptly make an initial review to determine if the listed animal may be imported and inform the employee. The GOP considers only dogs and cats to be household pets; although the requirements may be lengthy and bureaucratic, importation of dogs and cats is possible. Other animals such as rabbits, snakes, and birds are not considered household pets, and it may not be possible to import such animals. The embassy advises employees not to consider bringing animals other than a dog or cat to Post. The laws and regulations for importation of animals into Peru may change from day to day, due to viruses or diseases that might develop in other countries. SENASA, equivalent to the U.S. Department of Agriculture (USDA), maintains a database on each type of animal and the importation requirements.

b. An employee must initiate all required pet importation paperwork prior to coming to Post and follow up with all required paperwork after arrival. Please note that once a pet has been imported to Lima, it must be registered in accordance with the municipal regulations in your district. Please see Embassy Management Notice 036-14: Municipal Pet Dog Registration Requirements (http://wha.p.state.sbu/sites/Lima/MGT/Notices%20Procedures/MN14-036.pdf), or contact the C&S Unit for a copy of this notice.

c. In order to import a pet into Peru, SENASA requires that the owner provide a valid export certificate issued by the USDA. The link below will provide additional information required to bring pets to Peru: https://www.aphis.usda.gov/aphis/pet-travel.

d. Employees bringing pets to Post from countries other than the United States should contact the C&S Unit via email at LimaGSOShipping@state.gov as soon as possible for an explanation of the importation requirements.

e. Pets can arrive as accompanied baggage, checked luggage, or as cargo. If the pet is scheduled to arrive as accompanied baggage or checked luggage, the health certificate and vaccination certificate (issued by an authorized veterinarian) will be required by SENASA authorities to inspect and approve the pet’s entrance into Peru. On the day of the trip, the owner must hand carry the above-mentioned documents plus $35.00 USD in cash to cover SENASA’s inspection fees. Arrival can be any day of the week for pets travelling as accompanied baggage or checked luggage. C&S recommends that employees importing pets request an expediter through their sponsor to meet and assist them at the airport.

f. Post does not recommend shipping pets as cargo, if at all avoidable. If the pet must arrive as cargo, please contact a pet relocation company at your point of origin to handle the shipment, customs clearance, and delivery of the pet to your residence in Peru. If not, you will have to contract a Peruvian company in advance for the clearance and delivery of the pet. Customs clearance of pets entering Peru as cargo takes approximately seven hours. Post recommends that pets shipped as cargo arrive Monday through Thursday to avoid weekend stays in the airport warehouse while the Peruvian Customs office is closed.

g. All pet owners are reminded that the overall cost of relocating a pet to Peru is high—often more than $1,000 per pet, depending on the size and distance travelled. United Airlines’ PetSafe program allows U.S. Military and Department of State employees to ship pets weighing less than 100 lbs. as checked luggage on their flights. Additional details are available on United’s website at www.united.com and at https://www.aphis.usda.gov/aphis/pet-travel. Please note that air carriers flying from the United States may enforce a pet embargo due to the high temperature of air cargo holds during the summer months, usually from May 15 through September 15. Owners should check with their air carrier for specific details.
7. PRIVATELY OWNED FIREARMS (POF)

a. Any employee who wishes to import or acquire in-country any firearm must forward a written request to Post, attention RSO and GSO, prior to shipping or purchasing the weapon. Approval will be limited to one handgun and one shotgun or rifle or two shotguns/two rifles per household. Law enforcement officers may request exceptions. Peruvian law provides that law enforcement, security, and military personnel are authorized to import handguns in calibers up to .45 (pistol) and .357 (revolver). However, please note that the Government of Peru (GOP) is hesitant to issue permits for .40, .44, and .45 caliber handguns. The issuance process for these calibers requires special authorization from both civilian and military organizations and can be very lengthy. Permits are often issued for short periods of time (one year), which requires frequent renewals. Check with RSO for further information.

b. Automatic weapons or firearms of larger caliber than cited above are not permitted. Personally owned weapons must be shipped to or from Post within an employee’s HHG/HHE or declared and shipped within personal luggage. An exception is available for Federal Law Enforcement Officers who may follow individual agency guidelines for the transport of weapons utilized in official duties.

c. It is extremely important to note that NO firearm may be shipped or brought to Peru without first receiving written authorization, via the Regional Security Officer (RSO), from the Government of Peru. Merely submitting the required forms does not constitute authorization. Employees who transport firearms to Peru without first receiving government authorization risk seizure of the firearms by Peruvian authorities. For more information on weapons, contact RSO at RSOLIMA@state.gov.

a. HAND GUNS

Peruvian law provides that law enforcement, security, and military personnel are authorized to import handguns in calibers up to .45 (pistol) and .357 (revolver). However, please note that the Government of Peru (GOP) is hesitant to issue permits for .40, .44, and .45 caliber handguns.
b. RIFLES/SHOT GUNS

Shotguns up to 12-gauge and rifles of .44 caliber or less are permitted.

c. TOY RELATED GUNS

None

d. OTHER (i.e. AMMO, EXPLOSIVES, ETC)

None

8. PRIVATELY OWNED VEHICLES (POVs)

Peru has stringent restrictions on the importation of certain vehicles. Permanent tax-free importation of the following vehicles are not permitted:
- Gasoline-engine vehicles more than five years old
- Used diesel-engine vehicles of any age
- Vans with more than eight passenger capacity
- Pickup trucks
- Motorcycles

Vehicles not authorized to be imported under a permanent tax-free importation CAN be imported into Peru under a temporary importation permit with the owner’s signed agreement to re-export the vehicle at the end of his/her official tour of duty. Vehicles imported temporarily cannot be sold locally. An employee who accepts these conditions must provide a promissory letter along with a copy of the certificate of title of the vehicle before inbound shipping arrangements can be made. Please contact the Customs and Shipping Unit at LimaGSOShipping@state.gov for a copy of the required promissory letter.

c. Vehicle age is calculated based on the year the vehicle was manufactured and NOT on the model year. To determine the age of the car, the Peruvian customs counts the manufacture year as the first year, no matter which month the car was manufactured.

d. Motorcycles can be imported under a temporary importation permit with the owner’s signed agreement to re-export it at the end of his/her official tour of duty, as long as he/she will not also import a POV into Peru.

e. Diplomats with the following ranks may import duty free one vehicle every three years: Minister Counselor, Counselor, Consul General, Consul, Vice Consul, First Secretary, Second Secretary, Third Secretary, Attaché, Assistant Attaché, and Director of International Organizations.

f. Administrative and technical staff (to include military personnel) may import one vehicle only during his/her entire tour, which must be imported within six (6) months after the Ministry of Foreign Affairs (MFA) accredits the employee.

g. All personnel bringing a vehicle to Post must provide the Customs and Shipping Unit a copy of the vehicle’s commercial invoice or bill of sale and a copy of the certificate of title. These documents must be in the name of the employee. Failure to comply with this requirement will cause delays in the approval process to ship the vehicle to Post.

h. The following vehicle information is required by the Peruvian authorities:
- Make
- Model
- Manufacture year
- Model year
- VIN
- Engine number
- Number of cylinders
- Color
- Type of fuel
- Capacity of engine in liters or cubic centimeters

i. The engine number and the manufacture year of the car are required for customs clearance. In our experience, the manufacture year of a car is frequently listed on a vehicle’s door. The engine number of Japanese and other foreign-made vehicles is frequently stamped on one side of the engine or is listed in a plate located on the firewall. Vehicles manufactured in the United States often do not display engine number information. If a vehicle has no identifiable engine number, the VIN will be declared as the engine number in the customs clearance documents. The owner must obtain the engine number and the manufacture year from an authorized car dealer in writing, or alternatively, send a legible photo of the information from the car door and engine. IT IS ABSOLUTELY CRITICAL THAT ALL VEHICLE INFORMATION BE ERROR-FREE AND 100 PERCENT ACCURATE.

j. Please note that the vehicle must be shipped completely empty, and free of any spare parts, additional HHG/HHE, or other items. Remove all pilferable items before shipment to avoid theft of windshield wipers, floor mats, radios, and other items. Due to a continuing problem of “smash-and-grab” thefts of personal belongings from vehicles, the RSO recommends that vehicle owners arrange for the local installation of security window film on all vehicle window glass.
k. Vehicles imported duty free by accredited employees can be sold locally tax-free after the vehicle has been legally in Peru for three years (calculated from the date of the vehicle’s approval by Peru’s National Customs and Tax Administration (SUNAT in Spanish). If the employee is transferred or finishes his/her official tour before three years, the employee will need to pay the prorated import taxes for the remaining time to complete the three-year period to sell the vehicle locally. The MFA calculates the prorated amount by dividing the import taxes by thirty-six (36) then multiplying by the number of months remaining in the thirty-six month period.

l. If an employee arrives in Peru with a travel authorization for two years of duty and is accredited accordingly by the Peruvian MFA, he/she can sell the vehicle tax free at the end of his/her official tour. For this two-year exception to apply, the employee’s tour must end in exactly two years and the vehicle must have been imported within six months after the employee was accredited. If not, the three-year rule applies.

m. According to the GOP regulation, if the employee sells the car in Peru, the employee and his/her spouse are required to sign the official sales contract. For additional information regarding the importation of POVs, please contact the Customs and Shipping Unit via email at LimaGSOShipping@state.gov.

n. In Lima, parking spaces are small, and garage doors tend to be no higher than 68 inches. Personally owned vehicles greater than 68 inches in height must not be shipped to Post without prior Post approval. Please contact the Lima Housing Unit via email at LimaGSOHousing@state.gov to verify if the vehicle’s height that you plan to bring to Post is acceptable for the housing assigned to you.

a. POVs (includes data on prohibited vehicles, colors, etc.)

See above for specific details

Motorcycles/mopeds are not authorized to be imported under a permanent tax-free importation, but motorcycles may be imported to Peru under a temporary importation permit. Contact the Customs and Shipping Unit at LimaGSOShipping@state.gov for additional information.

2. CUSTOMS CLEARANCE PROCEDURES, REQUIREMENTS, AND RESTRICTIONS

a. US military personnel and DOD civilian employees on official assignment to the Philippines are authorized duty-free importation of personal effects and POV. DoD personnel must be present and accredited with the Department of Foreign Affairs (DFA) to clear UB, HHGS, and POV through the Philippine Bureau of Customs (BOC). DoD personnel must have the appropriate 9e(1) VISA (for diplomats) and 9e(2) (for administrative and technical staff not on the diplomatic list) to be accredited by the DFA. It is important to note that no action can be done by the Embassy unless the Philippine Department of Foreign Affairs (DFA) has accredited the customer. Incorrect Philippine VISAs must be amended at the DFA, will also cause delay in the submission of a request for tax exemption, and would further result in additional port and storage charges for the U.S. Government. Both diplomats and technical staff are granted the same privileges and exemptions by the Philippine Government. DFA requires legible copies of advance documents for the preparation of certificate of tax exemption. Please send e-mail to ManilaShipping@state.gov to receive shipment approval prior to commencing transport of shipments. No shipments should commence transport without approval from the Embassy's Transportation Unit. (CH 30-Mar-2016 SDDC-PAC RB) b. Origin PPPO/PPSO/TMO must ensure documentation mentioned in para a. above for UB, HHG and POV are e-mailed to ManilaShipping@state.gov or uploaded in T-Lite. Without the DoD customer being in-country and the appropriate shipping documents, shipments cannot be
cleared and released. Shipments may also be declared abandoned and eventually auctioned by BOC if not cleared and released within 30 days from the date of arrival at the port of Manila. The UB, HHG, and POV shipments must coincide on or after the DoD customer's arrival date to Manila, or ideally a week after the DoD customer's arrival date to the Philippines. (CH 30-Mar-2016 SDDC-PAC RB)

If a customer ships a motorcycle/moped/motorized bike above 49cc as a second POV, the customer is responsible to pay for a licensed Customs Brokerage Fee as the second POV would be processed separately from HHG items by Philippine Customs. Motorcycles/mopeds/motorized bikes 49cc and below are not considered a POV, can be cleared as HHG in the same container as HHG, do not need to have a separate GBL issued, do not need to be registered with Philippine LTO, but must only be driven within the US Embassy compound. Otherwise you will need a money order or cashier's check made out to "the Royal Kingdom of Saudi Arabia" or "the Embassy of Saudi Arabia." Be aware that the Saudi Embassy closes for extended periods of time for the Eid and Hajj religious holidays.f. After your USDA certificate is authenticated by the State Department and stamped by the Saudi Embassy, fax copies of all these documents to the GSO/customs & shipping section in Riyadh, 011-966-1-488-7939. The section will prepare a diplomatic note for the Ministry of Foreign Affairs. The MFA will endorse the diplomatic note, directed to the Director of Airport Customs. This can take up to four days.g. If you do not follow the process described above, airport authorities will not release your pet until checked by a Saudi veterinarian. You may want to avoid arriving on the Saudi weekend, which is Thursday and Friday, as the vet does not work on these days. If your pet is not accompanied, it will be held at the airport for up to four hours until a vet can check it. There is no charge for this service.h. Reminder: Your pet must have reservations with the airline and you must bring all their documents with you to the airport. Be prepared to pay for your pet's passage when you arrive at the airport. Currently, you may only pay for pet travel at the counter -- it cannot be prepaid. Most airlines require that your pet travel in a sturdy cage with strong bolts and air ventilation on three to four sides of the cage. All cages must have a water dish. A piece of old carpet fixed to the bottom of the cage allows your pet to dig in claws and hold on tight when transported.i. If you plan to book your pet inside the cabin, please check well in advance with the airline. The availability of this option is normally limited and the airline may have additional requirements concerning the date of the health certificate and other documentation.j. If the pet is sent by airfreight, the shipment should be consigned as follows: American Embassy Riyadh, Saudi Arabia Contact Tel: 488-3800, EXT 1512/1500. If you send a dog by airfreight, the description of the shipment in the airway bill should state that it is a "guard dog."l. If shipping a pet by airfreight, please notify GSO, as soon as transportation arrangements are made, of the following: airline, flight number, and airway bill number assigned to the shipment.

It is illegal to import or possess weapons.

a. HAND GUNS

b. RIFLES/SHOT GUNS

c. TOY RELATED GUNS

8. PRIVATELY OWNED VEHICLES (POVs)

do. OTHER (i.e. AMMO, EXPLOSIVES, ETC)

OTHER: (1) Pickup Trucks: Do not, repeat, not ship a pickup truck as a POV. Pickup trucks can not be registered to non-Saudies. (2) Motor Vehicle Color: Do not, repeat, not ship a yellow vehicle. Yellow is reserved for taxis. If you import a yellow vehicle, it will be repainted at your expense. (3) Vehicles With Tinted Glass: Do not, repeat, not ship a vehicle with a tinted windshield or with tinted front side windows. Motor vehicles that have tinted glass on either the windshield or the front side windows can not be registered with the Saudi police until the tint is removed. Rear windows and rear side windows may be lightly tinted, as long as the tinting does not interfere with the driver's ability to see objects behind him or with Saudi security concerns. To determine if your tinting is acceptable, stand 15 to 30 yards behind the vehicle. If you can see well inside the car, then your rear window tinting is okay. If you cannot see into the car, the vehicle will most likely fail the Saudi inspection. (4) Vehicle Titles: Saudi officials require proof of ownership before clearing vehicles through customs. Please send or bring a copy of your vehicle title to post. The title must be in English or Arabic. If your title is not in English or Arabic, please have it translated before coming to post. (5) Vehicle Registration and License: The process of licensing a vehicle with diplomatic (CD) tags normally takes two weeks. You must pay the registration fee, which is about $8.00.

a. POVs (includes data on prohibited vehicles, colors, etc.)

Personnel not assigned to a US Embassy or Consulate are not authorized a POV shipment.1. Active duty personnel, other than Defense Attache Office personnel and the US Embassy Marine Security Guard Detachment Commander, are prohibited from importing privately-owned vehicles. Open bed pickup trucks cannot be registered to non-Saudi and should not be shipped. Do not ship a pickup truck as a POV. If a yellow sedan is shipped, Embassy guidance should be sought prior to shipment as this color is reserved for taxis in Saudi Arabia, so it is discouraged. All types of vehicles can be shipped, but spare parts are still difficult to obtain for pre 1988 vehicles. There are no specific safety standards imposed by Saudi Arabian Government.2. Shipments of POV should not, repeat, not be scheduled to arrive at Post prior to employee's arrival. Post cannot obtain clearance until employee arrives and is granted an identification card by the Saudi Ministry of Foreign Affairs. Saudi Arabian Customs do not, repeat, do not release shipments as duty free shipments when shipments are misconsigned.3. Drivers License: Women may not repeat not legally drive in Saudi Arabia. Therefore, Saudi police will only issue diplomatic driver's licenses to men. Prior to applying for a drivers license, you must obtain your Saudi ID card (IGAMA). To qualify for a diplomatic driver's license, you must have a valid, repeat, valid driver's license, preferably one issued in the United States. When applying for your driver's license, you must submit four (4) nonglossy, non-Polaroid black/white or color photos (1 x 1 in). If you do not have a valid driver's license, but would like to obtain one in Saudi Arabia, you should be prepared to take driving courses and/or driving exams. While women are not permitted to drive in Saudi Arabia, they may import and register a vehicle. However, hiring a driver is expensive, so most female employees rely on the embassy's extensive motor pool operation for transportation. a. Surface shipments of POV should be sent directly to Riyadh dry port via Port of Dammam. Freight should be prepaid through to Riyadh dryport. b. For surface shipments please note the following: (1) Do not pack motor vehicles and HHG in the same containers. (2) Dammam Port and Riyadh dry port handle 20 foot
and 40 foot containers. c. Post request that all shipments destined for Riyadh are sent directly through to Riyadh. To do this, please follow these instructions precisely: (1) The consignee block of the OCB/L must be completed as shown in para 8.a.3(3) above. (2) The notify party block of the OCB/L must remain blank or show "same as consignee." (3) The port of discharge block of the OCB/L must show "Dammam." (4) The place of delivery block of the OCB/L must show "Riyadh dry port." 4. Embassy HHG and POV shipments should be marked and consigned as follows: American Ambassador c/o American Embassy Diplomatic Quarter Riyadh, Saudi Arabia ATTN: GSO; Tel: 488-3800, EXT 1512/1500 FOR ()

USMTM Personnel:

Personal property must be shipped to King Khalid International Airport-RUH, Riyadh, Kingdom of Saudi Arabia. HHG are not authorized via Surface Mode. POV's are prohibited. ATTN: OUTBOUND BOOKING, IF YOU ARE NOT SURE, PLEASE SEND US AN E-MAIL: tmo@usmtm.sppn.af.mil FOR PROPER ROUTING INSTRUCTIONS.

a. Important instructions for CONUS locations: Use DPM International Commercial Air Rates (DPM Code HF or BF).

b. Important instructions for Overseas locations: Use OTO Code 8 or Code 6 as an alternative mode of shipment.

c. Markings: See General Instructions pg 103-1, para 1d(2). The shipment should be routed through Port of Dammam to Riyadh dry port. Means of transportation from Dammam Seaport to Riyadh dry port must be stated on the OCB/L as "via railways customs terminal (RCT)."

7. Forward original OCB/L directly to: General Service Office U.S. Embassy, Unit 61307APO, AE 09803-1307 OR via registered international airmail to: General Service Office OfficeU. S. Embassy P.O. Box 94309 Saudi Arabia ATTN: Customs & Shipping 8. Neighboring posts: Posts in neighboring countries (Jordan and GCC countries) may send shipments of HHG and POVs overland. If a post decides to send shipments overland, it should submit the following information at least three workdays prior to release. Full description of the truck designated to carry the shipment. Truck license plate number. Driver's name and nationality. Driver's passport number. NOTE: This information will help post obtain customs clearance approvals and border crossing permits in a timely manner. Post suggests caution in sending shipments overland, as the shipments are more likely to be opened and inspected.

10. Customs clearance process: It normally takes two to four weeks for UAB shipments to arrive in country, while HHG shipments generally take two to four months, depending on the origin of the shipment, routing, and other factors. Post can not, repeat, not pre-clear UAB, HHG, or POV shipments before they arrive in country. Nor can post begin the clearance process until after the member has arrived and received their ID card. (ID cards, or IGAMA, are usually received about two weeks after arrival.) It normally takes two weeks to finalize customs formalities, following receipt of the IGAMA. GSO will contact you to schedule delivery once your shipments clear customs. For military and DOD members, a clear copy of the passport, visa, and a Mission Relations Letter is required prior to clearing customs for HHG's and UAB thru King Khalid International Airport.

11. Vehicles: No age or manufacturer restrictions apply to mission vehicles. Motor vehicles manufactured by American motors, previously on the boycott list, can now be imported. Also, Ford motor vehicles can be imported and are locally available, but spare parts are as yet difficult to obtain. General motors vehicles and services are available, as are Chrysler products, but the latter are in less plentiful supply. Also, do not/not import a POV with tinted glass windows. Vehicles with tinted glass windows cannot be registered unless the tint-is removed. The Saudi Arabian Customs may require proof of ownership upon clearance. Copies of vehicle titles translated into Arabic or English should be sent to Post.

b. MOTOR CYCLES/MOPEDS
EMBASSY ONLY: If you wish to send a motorcycle, include it in your HHG (HHE) shipment as a separate motorcycle crate with nothing else in the crate and describe it on the airway bill or bill of lading. Particulars required are: year/type/make, engine number, and chassis number.

c. GASOLINE/CATALYTIC CONVERTERS

Unleaded gas is now available in the Kingdom of Saudi Arabia. There is no longer, repeat, no longer any need to remove the catalytic converter.

d. INSURANCE AND SAFETY REQUIREMENTS

(1) Motor Vehicle Insurance: Motor vehicle insurance coverage is not mandatory in Saudi Arabia. However, post strongly recommends that you carry insurance on your motor vehicle. Motor vehicle insurance may be purchased locally at reasonable rates.  (2) Motor Vehicle Service and Spare Parts: Service and spare parts are available for most popular vehicle brands. However, spare parts for vehicles more than fifteen (15) years old may be difficult to find.  (3) Motor Vehicle Inspection: There are two types of vehicle inspections. (a) Standard Conformity Inspection: Imported motor vehicles should be inspected soon after clearing Customs. The Saudi Arabian Standards Organization (SASO) inspects vehicles to ensure that they meet Saudi specifications. The inspection is simple and almost all vehicles pass. Technicians check safety belts, lights, exhaust pipes, and other areas of the vehicle. When a vehicle passes inspection, SASO issues a certificate of inspection for use in registering the car. SASO does not charge a fee for inspecting mission vehicles.  (b) Road Safety Inspection: Annual motor vehicle safety inspections are mandatory in Saudi Arabia. The inspection fee is about $20.00. (New vehicles, in the current year of manufacture, are exempt.) When a vehicle passes inspection, a circular sticker is placed on the windshield and a computer-generated, one-year certificate is issued. Saudi police require vehicle owners to have a valid copy of the inspection certificate when applying for issuance/renewal of vehicle registration, ownership transfer, or export permit.

9. SEXUALLY EXPLICIT/PORNOGRAPHIC MATERIAL

a. Religious or sexually related material. Video cassettes sent through the regular APO mail or shipped as HHG’s or UAB may be confiscated and viewed to ensure they are morally acceptable. If unacceptable, they will be erased entirely or in part and then are usually returned to the addressee. If mailing tapes to post, either send via registered APO or (US Embassy or Consulate only) send a maximum of two tapes per package via state department pouch clearly marked "video tapes" to avoid confiscation. Books and magazines are also checked for "pornographic" pictures or politically sensitive material and pages may be destroyed or removed if determined to be unacceptable. Record jackets, cassette labels, and compact discs are also subject to confiscation.  b. Public Behavior: Anyone entering Saudi Arabia should be aware that Islamic Law in the foundation of the Kingdom's conservative customs and practices. Pork products, alcohol and items deemed pornographic are strictly forbidden. The norms for public behavior and dress are extremely conservative. For example, Saudi women are veiled and must wear a full-length black covering known as an Abayya. Guidance issued by the Saudi Embassy in Washington states that non-Muslim women are not required to wear an Abayya, but should dress conservatively (loose-fitting dresses that cover well below the knee, with long sleeves and a high neckline). The embassy echoes this guidance and embassy women do not, repeat, not wear Abayyas when out on official business. However, many western women, particularly those living in the Riyadh area and the more
conservative central region, choose to wear an Abayya and carry a head scarf in order to avoid harassment by the religious police (known as the mutawwa’in). Even with the Abayya and scarf, harassment may still occur. When in public, personnel and dependents should dress conservatively. Men should wear long pants and avoid shorts or sleeveless shirts. 5. FURNTURE, OVERSIZED

a. All DoD personnel MUST be counseled that Commercial Storage in Singapore is almost non-existent. Most condominiums or apartments cannot accommodate large furniture items. Items may not fit through doorways, staircases, elevators or windows. Customers may incur excess cost to dispose of or relocate excess or oversized furniture. To avoid unnecessary and expensive commercial storage, large furniture items and major appliances such as a washer, dryer, gas range, freezer,
refrigerator, large couches, large sofas and king-size bed sets should be placed in NTS at origin for the duration of the overseas tour. (CH 08-JAN-2018 TCJ4-HB-PAC RB)b. Major appliances are furnished in both Government Quarters and Off-Base Housing (local economy) upon request from the command-sponsored DoD customer. Individuals should contact their sponsors or their gaining command to inquire about housing and the availability or non-availability of government furnishings. (CH 08-JAN-2018 TCJ4-HB-PAC RB)

6. PETS/QUARANTINE

(a) For USDAO and ODC, Republic of Singapore (RIDK): Personnel planning to bring a cat or dog to Singapore should contact GSO Shipping at email --GSO_Singapore@state.gov-- for information. More detailed and the latest step-by-step guidelines on pet importation can be found on the Agri-Food and Veterinary Authority of Singapore's (AVA) website at: http://www.ava.gov.sg/explore-by-sections/pets-and-animals/bringing-animals-into-singapore-exporting/animal-quarantine

(b) For US Navy Region Contracting Center: Personnel planning to bring a cat or dog to Singapore must contact the gaining sponsor at least 6 weeks prior to their departure to obtain an import license and making arrangement for booking quarantine space at Jurong Animal Quarantine Station. Provide your gaining sponsor with the sex, age, breed, color and name of pet.

(c) Dogs and cats coming from a few countries and the USA (except Guam and Hawaii) can be eligible for 10-day quarantine. Most animals from other countries are subject to 30-day quarantine. Clearance and quarantine costs are quite expensive. The Government of Singapore in 2011 implemented further rules regarding the importation of certain types of domesticated animals, and as a result, certain breeds of dogs are not allowed to be imported into Singapore. Other breeds, while permitted, require the owner to purchase an insurance policy for a minimum sum of S$100,000 coverage against injury to persons and damage to property, with a S$2,000 banker’s guarantee. A pet owner of one of these breeds may also need to undergo basic obedience training by an AVA-accredited dog trainer. The owner will have one year from the issue date of their dog license to complete the training. The import requirements are strict and in some cases require steps that need to be taken 4-6 months prior to arrival. All pets imported must comply with Singapore AVA's veterinary condition which includes requirements such as health certification, quarantine and inspection by AVA. Starting 1 January 2010, AVA has implemented a new set of import and quarantine requirements as part of their rabies risk management approach to the importation of dogs and cats into Singapore. The new import requirements involve re-categorizing countries according to the rabies risk posed by different countries. As there is only one quarantine station and is always heavily booked, you are advised to submit your reservation early. It is always advisable to use the services of a pet company, who will coordinate the whole importation process. Recommend you plan your pet's arrival on a weekday. Pets arriving on Sundays or public holidays will be kept at the airport airfreight center and will only be transferred to the Changi quarantine station on the next working day. (CH 18-Feb-2016 SDDC-PAC RB)

7. PRIVATELY OWNED FIREARMS (POF)

No firearms may be shipped into Singapore without prior approval from the appropriate agency the member is assigned to. Based upon an individual's official duty requirements, approval may be obtained to ship a maximum of one shotgun or rifle. Further requirements imposed by the Government of Singapore include advance approval and an import permit which can be obtained from Arms and Explosives Branch, where all firearms are held without license or until license is granted. Applicants for a firearm license must be members of either the Singapore Gun Club or the
Singapore Rifle Association and, at time of application, must indicate where and under what control the weapon will be stored. If the firearm is not required for official duty, members are prohibited from shipping POF.

On-base government quarters have 110V, 60 hertz cycles. Off-base residences have 220V, 50 hertz cycles. American refrigerators and washers may be operated in off-base quarters by using transformers. American electric dryers and clock radios operated off-base will be affected by the 50 hertz cycle. Only 50 hertz cycle capable microwaves can be used off-base. NOTE: Individuals are encouraged to place non-compatible appliances and electronic items in origin NTS. An Appliance Loaner Program is provided by the Housing Office at NAVSTA Rota and Moron Air Base for on-base or off-base residents. Appliances can be used during the entire tour in Spain. NATO Command personnel are eligible to use the Appliance Loaner Program at NAVSTA Rota, if supplies are available. Appliances that depend on a heating element, such as toasters, frying pans, boilers, etc., will not be affected by the 50 Hertz Cycle electricity but will require a transformer to operate off-base. American televisions, with NTSC system can only be used off-base with AFN Satellite Reception Dish and Decoder. Only PAL frequency television or multi-system televisions will operate off-base for Spanish services and other European transmissions.

### 5. FURNITURE, OVERSIZED

#### a. Furniture: Extremely bulky items should not be shipped unless advised by sponsor. Government assigned quarters have moderate square footage. Apartments and houses off-base varies from small, medium and large, depending on location and your monthly housing allowance.

#### b. Appliances: PPSO Counselors should emphasize to all members that washers, dryers, refrigerators, and stoves are furnished under the loaner furniture program by Housing Office, both on-base and off-base quarters for the entire length tour while assigned at NAVSTA Rota, Moron Air Base and NATO Commands. These appliances should be placed in origin NTS. Government NTS is not available at NAVSTA Rota Spain. Commercial storage for the entire tour could prove cost prohibitive as well as transportation cost to ship items back to NTS in CONUS.

### 6. PETS/QUARANTINE

Standards in the following paragraphs address requirements for shipping dogs, cats, and ferrets from the United States to Spain. Ferrets are NOT accepted as pets for movement on AMC military or commercially contracted aircrafts. For information on shipments for ferrets or other exotic pets, please contact your local U.S. Department of Agriculture Field Office. NOTE: Throughout this document, the term pet or pets refers ONLY to cats and dogs. ATTENTION: An examination fee of
55 Euros per pet was implemented effective February 1, 2013, for all Non-European Union citizens, who import a pet into Spain. A. Quarantine Period: There is no quarantine period for pets entering Spain. B. Pet Identification (Standard electronic identification system with a read-only passive radio frequency identification device commonly known as a transponder Microchip): (1) Microchip should be compliant with ISO standards 11784 or 11785. (2) For non-compliant ISO standard 11784 or 11785 microchips, the owner or the designated guardian responsible for the pet must provide the required equipment (Microchip Reader/Wand) for reading non-compliant ISO microchips at the time of examination. (3) The microchip must be implanted before, primary rabies vaccination or valid rabies booster is given to the pet, prior to travel. (a) Primary Rabies Vaccine - This is the first rabies vaccination a pet receives. For EU countries, this also applies to the first rabies vaccine given after the microchip was implanted. Rabies vaccinations received prior to the pet being microchipped are NOT recognized in the EU. (b) Valid Rabies Booster - A rabies booster that is given to the pet before the previous (Either after the primary rabies vaccine or another rabies booster) rabies vaccination expires. C. Pet Rabies Immunization: Cats or Dogs under three (3) months of age that are not vaccinated for rabies are not allowed entry into Spain. (1) Please refer to website and http://www.aphis.usda.gov/ regulations/vs/iregs/animals/ and (Enter the destination country (Spain) you will be residing in under Search Animal and Plant Health Inspection Services (APHIS)). (2) Pets less than three months of age coming from the United States may not always require the rabies vaccination IF: (a) These pets have pre-authorization from the EU member state BEFORE entering the country. (3) Any one year dose or three year dose rabies vaccine is valid as long as it is a U.S. approved vaccine, and was administered according to the manufacturers specifications (for instance, a vaccine labeled for 1 year use cannot be utilized as a 3 year vaccine). (4) A valid rabies vaccine must occur after the animal has been microchipped to be valid for entry into an EU member state. (5) At least 21 days must have elapsed between completion of the primary rabies vaccination (as specified above) and before the pet enters the EU member state. (a) However, if the animal received a valid rabies booster, 21 days does not have to elapse before travel. (b) If a pet received a non-ISO compliant microchip and then received a valid rabies vaccination with 21 days having elapsed since that vaccination and entering the EU member state; they: (a) Do not require implantation of another ISO compatible microchip, but are required to carry with them a microchip reader/wand capable of reading the non-ISO compatible microchip implanted in their pet. (b) Do not require administration of another rabies vaccination before traveling as long as the rabies vaccination received is still valid. (c) Can have an ISO compatible microchip implanted in their pet so they do not have to carry the reader/wand with them. 1. Pets with ISO compatible implanted microchip do not have to receive another rabies vaccination following the second microchip implantation. They are only required to document both chips on the required forms with the microchip implantation dates. D. Documentation (Verify the correct required documentation with your local U.S. Department of Agriculture Office): (1) APHIS Form 7001 (Nov 2010) Acquired from any Army veterinarian, local veterinarian or U.S. DA office. (a) Valid for only 30 days after issuance. (b) Duration of the Form 7001 validity can be shortened per the requirements of the airline the service member's traveling. (c) Requires certification by a U.S. DA Accredited Veterinarian, Army Veterinarian, or GS-0701 Veterinarian before travel. (d) Form 7001 is not required to enter the European Union (EU). However, its highly recommended that servicemembers acquire this form before travel from their on-base Army veterinarian to preclude the following: (1) If a member flies on a commercial carrier they may be required to have this form. (2) If a member is scheduled to fly AMC Contracted flight (Patriot Express) and diverts to a commercial carrier, having this form in advance alleviates last minute costs ($200 or more) or delays. (3) This form is not required to travel on Patriot Express. (4) EU Non-Commercial Pet Form (Bilingual Health Certificate) (5) For Pet Dog, Cats, and Ferrets; destined to Spain, see link
Under Pets heading Pets Dog, Cats, and Ferrets) please refer to http://www.aphis.usda.gov/regulations/vs/iregs/animals/ (Enter the destination country you will be residing in under Search APHISandquot;). E. Helpful Hints:(1) As soon as travel date is determined, but no later than 22 days prior, have the pet micro-chipped first and vaccinated for rabies, if not already completed. Remember: A VALID RABIES VACCINE MUST OCCUR AFTER THEMICROCHIP IS IMPLANTED. (2) When completing required documentation (before mailing the forms or traveling to your local USDA office, get documents notarized, if not using your on base Army veterinarian), fax or over-night ship to ensure they are filled out correctly before traveling to veterinary office. (a) This will ensure you do not waste travel time or postage only to have to redo the paperwork. (3) Many overseas bases have a full-time veterinarian on staff as well as commercial veterinarians available on the local economy. (a) Most bases require pets to be registered with the base veterinarian after arrival. Check with base veterinarian for details. (4) The pet cage or carrier (See carrier shipping rules for correct cage dimensions based on pet size) used for shipping the pet must be labeled with the owners name, pets name, owners (or appointed persons) address, contact number and contact number at the final destination. (5) Spain has laws in place prohibiting importation of certain dog breeds regarded as dangerous. For more info you may contact the base veterinarian at your destination. NAVSTA Rota Veterinary Clinic  DSN: 727-3149, or go to APHIS website http://www.aphis.usda.gov/regulations/vs/iregs/animals and click on the country of Spain tab for information on laws or requirements for owning dangerous dogs. (See paragraph G. below) F. Pet Fees: (1) The USDA form certification fee (approximately $70+, plus any shipping and handling if by mail) (2) Transporting pets to and from the PCS destination is at the members expense and cost is based on the weight of the pet being transported. Connecting flights may have fees in addition to AMC fees from Norfolk Naval Station. (3) EFFECTIVE 1 February 2013, the fee for the pet import examination is 55 Euros. G. DANGEROUS DOGS: Royal Decree 287/2002 of March 22 regulates the requirements to own canine animals deemed to be potentially dangerous, developing the legislation established under Law 50/1999. The imported vehicle must be for the exclusive use of the military member, civilian employee, or eligible family member. The tax and duty free POV must arrive in Spain within SIX (6) months, from the initial date of arrival of the military member or civilian employee. Members of the Forces and civilian component are prohibited from importing or registering a second non-Spanish manufactured tax and duty free POV regardless of vehicle’s origin. If a second UNAUTHORIZED POV is shipped commercially, it will be impounded at the port of entry and all storage and related handling fees, including reshipment out of the country, will be at members expense. c. Military members or civilian employee may own and register a second POV but ONLY if the vehicle is manufactured and purchased in Spain in accordance with local laws and free of the Spanish value added tax. Family members over the age of 18 may also own and maintain another Spanish manufactured vehicle, if licensed to operate a vehicle in Spain. Caution: Under the SOFA and Spanish Law, motorcycles are considered POVs. DO NOT SHIP MOTORCYCLES IN OR WITH HHGs! When the only vehicle to be shipped duty free is a MOTORCYCLE, it MUST be shipped through the servicing VPC and NEVER within household goods shipment. If a duty-free motorcycle is shipped at government expense, no other POV is authorized (motor vehicle or motorcycle) at government expense. Additional POVs should be sold at origin or placed in commercial storage at member’s personal expense. Government storage is NOT authorized for excess vehicles. Carefully read the Motorcycles/Mopeds paragraph (2) below, if shipping motorcycles/mopeds. d. POVs are picked up directly from VPC in the city of Rota after registration with Spanish Traffic Department through NAVSTA Rota Vehicle Registration Office. POVs with current U.S. or overseas registration and metal license plates will normally take 2 to 4 days to complete the Spanish registration process. For vehicles with expired registration or no metal license plates, the vehicle may be registered, however, it could take 10 to 12 days to complete the Spanish vehicle registration process and obtain metal license plates. U.S. Forces members should ensure current registration is valid for at least 90 days from the date the vehicle is turned in for shipment at the CONUS or overseas VPC shipment point. Members must have a POV/motorcycle registration, even if it is an expired registration, in order to register the vehicle with Spanish traffic authorities. e. Members planning on operating a motor vehicle while in Spain must possess a valid U.S. or foreign driver’s license to apply for a Spanish driver’s license. Members arriving to Spain must successfully complete a Spanish driver’s test during their intercultural relations indoctrination seminar at Fleet and Family Support Center. Spanish license processing takes approximately 10 working days after initial check-in. Members can drive, while awaiting their Spanish driver’s license, provided they have an international license, or a Spanish translation of their U.S. or foreign drivers license obtained from NAVSTA Security Department Rota Spain. f. Under the SOFA rules governing members of U.S. Forces in Spain, members who are not ordered to Spain for duty are not eligible for customs clearance of their POV by installation personnel or NAVSTA Rota PPSO Spain. Important Note: If current state or foreign drivers license has a motorcycle endorsement, but is less than two years old due to renewal, member must provide documented proof that experience level is more than two (2) years, by providing documentation from prior motor vehicle departments. If proof of holding the motorcycle endorsement for more than two (2) years, cannot be verified, the over 500 cc Spanish driver’s license will not be issued. Failure to obtain Spanish motorcycle drivers license will result in termination of the motorcycle registration process and arrangements will be made for the exportation of the motorcycle at the member’s expense. Note: All transportation and exportation costs must be paid by the member.

MOPEDS Under 50 Cubic Centimeters: PROHIBITED! The Spanish Ministry of Industry prohibits registration and operation of non-Spanish manufactured Mopeds with less than 50 cc engine capacity, therefore they cannot be imported to Spain, either as HHGs or through the VPC. DO NOT SHIP!!! Members will be responsible for disposition and all associated transportation and exportation costs.

MOPEDS Over 50 Cubic Centimeters: These types of Mopeds, usually starting around the 125 cc engine capacity range, are considered POVs by the Spanish government and permitted to be imported and registered in Spain. As a POV, due to the only one (1) duty free importation allowance policy, the shipper will not be permitted to import or register any other vehicles in Spain, if a Moped over 50 cc is shipped. When a Moped over 50 cc is shipped to Spain they must be shipped through the VPC and not in the HHG's shipment. NOTE: No other POV entitlement is allowed, if a Moped over 50 cc is shipped at government expense. Members will be responsible for disposition and all associated transportation and exportation expenses for failure to adhere to the policy. ATVs: All Terrain Vehicles (ATVs) and MOTOCROSS (Quads) vehicles provided they remain on-base and off-road, are not considered POVs and may be imported into Spain as HHGs. e. Trailer hitches are only authorized on the chassis (body) of the POV and not on the bumper. If the trailer hitch obscures the rear license plate, the owner of the vehicle must remove it. Additionally, the Spanish Traffic Code stipulates all vehicles registered in Spain must meet the following standards:
(1) Seat belts must be installed in front and back seats.
(2) Anti-theft device (on steering column or secure lock through steering wheel so vehicle cannot change directions when moved).

NOTE: Always contact GSO before shipping animals.

8. PRIVATELY OWNED VEHICLES (POVs)

No restrictions identified.

   a. POVs (includes data on prohibited vehicles, colors, etc.)

   (1) They may be shipped unboxed. Difficulties and high costs are often encountered in modifying POV to meet stringent Swedish safety requirements. Therefore, we suggest you contact the Embassy General Services Officer (GSO) before initiating shipment of POV. Customs entry of HHG and POV of non-diplomatic staff members must be made within 4 months from date of member's initial arrival. Ensure airway bill(AWB) number is shown on GBL and advance shipping documents. A married member with accompanying spouse may import two privately owned vehicles (POVs) duty free.   

   (2) Shipping/Transaction Costs: Each individual that PCS to Sweden is authorized to ship one vehicle at US Government expense. Private shipment of a vehicle to Sweden averages
$1,200-$1,400; a 17-foot boat averages $1,200. These costs are recoverable if the vehicle is sold in Sweden. A US-manufactured vehicle does not meet Swedish specifications and can only be converted under the provisions outlined. If the vehicle is imported under diplomatic privileges, waivers can be obtained. However, such waivers are valid only for the individual importing the vehicle. This means the vehicle must be taken out of Sweden upon completion of tour of duty or alternatively sold to a person with diplomatic privileges. In addition to taking advantage of the possibility of importing a vehicle under diplomatic privileges, it is also possible to import a vehicle duty-free for personal use under the following provisions. The vehicle must have been owned and used by the imported at least 1 year prior to date of importation. If the vehicle is imported under these provisions, only minor modifications are required in order to meet Swedish specifications (outside rear view mirrors are required on both sides, speedometer scale must show kilometers only, stamping vehicle identification number into the trunk, and other minor modifications may be required). It is not possible to give an exact figure for these modifications as this can vary considerably to make and model of vehicle. However, the estimated cost is $500. If you intend to import a new or used vehicle, please contact the General Services Officer (GSO) for further details. NOTE: Always contact GSO before shipping POV.

6. PETS/QUARANTINE

---Importing a pet to Taiwan is a lengthy and complex process that requires your early attention.--- AIT can only provide limited assistance when importing your pet – typically restricted only to assistance in obtaining the Import License. Although Taiwan is no longer a rabies-free island, local authorities remain extremely strict in regard to pet importation, documentation, and quarantine requirements. ---If you wish to import a pet, please contact the AIT GSO/Shipping Office via email: Taipei_Shipment@state.gov, ATTN: Edward Lin, to begin planning the travel of your pet. Pet owners should allow at least 8 months preparation. Please be aware, upfront, that all required shots and documentation must be completed before your pet is shipped.---For the purpose of importing a pet into Taiwan the pet will need to be implanted with a 9-, 10-, or 15-digit ISO microchip. If your pet is not yet implanted, the OBC office recommends choosing the newer ISO 15-digit microchip.---Pets MAY NOT be imported prior to customer arrival, since the Ministry of Foreign Affairs will not process such requests.---Lastly, please note: PETS SHIPPED OR TRANSITED THROUGH CHINA MAY NOT ENTER TAIWAN.(CH 28-Dec-2017 TCJ4-HB-PAC RB)

If you wish to sell the car locally to a non-foreign office privileged individual, there are more restrictions. First, import duties may be applied. Second, you must complete local vehicle tests which can cost over 5,000 USD, including possible alterations, and may take 1-2 months to complete. b. MOTOR CYCLES/MOPEDS

---New and used motorcycles can be purchased locally. However, the purchase will not be duty-free and taxes will normally be included in the purchase price. ---Due to local registration restrictions on Taiwan, shipping a motorcycle to Taiwan is STRONGLY DISCOURAGED. In addition, GSO/Shipping will not -greenlight- (approve) your shipment until the member confirms in writing that he will be responsible for paying import duty, registration fees, possible modification fees and understands there is no guarantee that AIT will be able to register the motorcycle for use on Taiwan. ---Post has not been successful in registering an imported motorcycle in the last five years, thus the employee assumes ALL financial liability for this decision and post recommends that you DO NOT ship a

See paragraph 7 above.(CH 21-Dec-2017 TCJ4-HB-PAC RB)

8. PRIVATELY OWNED VEHICLES (POVs)

--NOTE--For POVs of Retirees, Separatees, and DLDs, refer to Paragraph 12 below.--DRIVER LICENSES--The Thai Government does not recognize U.S. driver licenses. Consequently, anyone planning on driving within the first five months of his her tour should have an international driver
license. The process for obtaining a Thai driver license is facilitated by post, but takes two months after GSO receives your Diplomatic I.D. card. The following documents are required: a copy of a valid U.S. license, a copy of your passport, a copy of your Diplomatic I.D. card and a health certificate (GSO will notify you when to obtain a health certificate since it is only valid for one month). Employee also has to sign up with GSO for a trip to the Land Transport to have photo taken and receives a Smart Card license on the same day. The initial Thai Driver License is valid for two years and the one-time renewal license is valid for five years. (CH 22-Dec-2017 TCJ4-HB-PAC RB)

a. POVs (includes data on prohibited vehicles, colors, etc.)

The Ministry of Foreign Affairs (MFA), Kingdom of Thailand, requires the following POV information to clear Customs: make, model, year, engine number, serial number (VIN), color, CC cylinders. The GSO can only submit paperwork to MFA after receiving a copy of your Assignment Note from RHR AND your shipment has arrived at the Port in Thailand. It usually takes 5-7 weeks to get MFA approval and receive your POV. Once your POV is received, you must bring the POV to the Department of Land Transport for inspection, then the GSO will process your POV registration, which will take 3 more months to complete. There are no restrictions on age, color, lighting, or other requirements necessary for registration. However, vehicle makes and models not sold or manufactured in the Kingdom of Thailand and any vehicles over 10 years old are not eligible for first class (comprehensive) insurance in Thailand. Locally-purchased third-party liability plus compulsory insurance is mandatory for all motor vehicles in Thailand in order to register the vehicle. Sales or transfers of vehicles can be authorized by the MFA only after the vehicle has been registered under the owners name for at least two years. The MFA must be informed of all transfer or sale requests before they can take place. Due to established protocol guidelines, the Embassy cannot process a vehicle transfer from a diplomat who departs before you arrive; both the buyer and seller must be in Thailand at the time of transfer. (CH 22-Dec-2017 TCJ4-HB-PAC RB)

b. MOTOR CYCLES/MOPEDS

Motorcycles or mopeds may be imported and are considered POVs. Only one POV can be imported duty free. Unlike POVs, a motorcycle or moped cannot be sold duty or tax free even after 5 years. Under no circumstances should motorcycles or mopeds be included as part of a HHG shipment. Thailand does not allow registration for a motorcycle that is 50CC or below OR has front/back wheels less than 10 inches in diameter; therefore, it cannot be operated on the main streets. Employee can only operate the vehicle in private area or keep it at the residence. Therefore, post does not recommend shipping the above mentioned motorcycle as a POV shipment. Please contact BKKTravelTransport@state.gov should you have question or need more information. (CH 22-Dec-2017 TCJ4-HB-PAC RB)

c. GASOLINE/CATALYTIC CONVERTERS

Catalytic converters and seatbelts are required.

d. INSURANCE AND SAFETY REQUIREMENTS
POV must be inspected by The Department of Land Transport prior to licensing. Vehicles should be in top mechanical condition. Spare parts for most American-made cars are either unobtainable or expensive. The following are suggested for inclusion in HHG: extra spark plugs, oil/air filter, fan belt, extra points, condenser and heavy duty shock absorbers. The Royal Thai government requires all vehicles to be covered by third party liability insurance plus a compulsory insurance which MUST be purchased locally from a Thai company. As this policy provides minimum benefits and no property damage coverage, the Embassy strongly recommends additional insurance which may be purchased locally or through a US company licensed to provide coverage in Thailand. USAA no longer insures POVs in Thailand. Avoid insurance that may invoke a diplomatic defense. Vehicle makes and models not sold or manufactured in the Kingdom of Thailand and any vehicles over 7 years old may not be eligible for first class (comprehensive) insurance in Thailand. (CH SDDC-PAC 02-Nov-2016 RB)

9. SEXUALLY EXPLICIT/PORNOGRAPHIC MATERIAL

Importation of any Pornographic materials are STRICLY PROHIBITED. (CH 22-Dec-2017 TCJ4-HB-PAC RB)

10. STUFF WILD LIFE/ANIMALS AND PLANT RESTRICTIONS

Items are inspected upon arrival. Plants requires a health certificate and import license. Several plants from many countries are prohibited. Inquire in advance at the nearest Thai Embassy or Consulate.

11. TRANSMITTING EQUIPMENT

Importation is restricted (not prohibited). Potential importation requires a permit from the National Broadcasting and Telecommunication Commission (NBTC). Post requires specifications of the item, and will submit the request through the Ministry of Foreign Affairs. Approval will take between 6-12 months, and importation approval is not guaranteed. Permission for import must be obtained prior to the date the shipment arrives in Thailand. Please contact BKKTravelTransport@state.gov prior to including these items in your shipments. Post recommends customers not import these type of items. (CH SDDC-PAC 07-Nov-2016 RB)

a. CBS

The Thai Government requires advance description of items as follows: wave, size, weight and cube, what items are to be used for, and reason for importation to Thailand. American Embassy and JUSMAGTHAI require the above information in advance in order to request import approval from the Post and telegraph department prior to arrival of shipment in country.

b. AMATEUR/HAM RADIOS

Permission is required prior to import. Recommend notifying the GSO/Customs and Shipping Unit, American Embassy Bangkok, APO AP 96546-0001, (facsimile number 011-66-2-255-2913) prior to shipment. Certain restrictions apply.
c. MARS EQUIPMENT

The Thai Government requires advance description of items as follows: wave, size, weight and cube, what items are to be used for, and reason for importation to Thailand. American Embassy and JUSMAGTHAI require the above information in advance in order to request import approval from the Post and telegraph department prior to arrival of shipment in country.

d. DISH ANTENNAS

The Thai Government requires a permit for antennas over 10 milli-watts.

e. CORDLESS PHONES

The Thai Government requires a permit for telephones over 10 milli-watts. Items must be shipped in UAB, not in hand-carried or checked luggage.

12. SEPARATEES/RETIREES ENTITLEMENTS/LIMITATIONS

a. Personnel contemplating retirement/separation in Thailand should be counseled all customs entry requirements remain a personal matter between the member and the Thai Government. The member should contact the nearest Consulate or Embassy for information regarding customs and quarantine entry requirements prior to shipment. Computation methods to determine import taxes are complex and variable. It may be advantageous for the member to hire a local customs brokerage agent to process shipments. HHG for retired personnel must be cleared using member's passport and it must contain a current resident visa issued by Thai immigration department. Member must contact Customs and Shipping Unit at the American Embassy, Bangkok, as soon as possible for importation documents.

b. Consign personal property directly to the member at their address in Thailand.

c. POVs: Importing a used POV (motorcycles and mopeds are considered POVs) into Thailand, there are 2 things a customer needs to consider. Import permit- Importer (owner of the used POV) requirements are:-----The importer needs to stay in Thailand not less than 1 year after importation with the permission from the Thai Immigration Office.-----The POV needs to be registered under the importer's name for not less than 18 months in the Country of export from the ownership date to the day the customer departed for Thailand-----The importer needs to show the POV/motorcycle driver's license from the Country of export to validate the importer drove the POV/motorcycle in the Country of export.-----The importer needs to show an Affidavit Of Residence in Thailand. For more information regarding Import Duties and Taxes, the destination shipping agent in Thailand should be able to provide more information. Please be advised Import Duties and Taxes could be subject to Duties and Taxes of up to 200percent of the used POVs value.(CH 07-OCT-2015 SDDC-PAC RB)

13. OTHER
--Buddha images and other religious art objects can be shipped into Thailand as part of an HHG shipment. However, you will need an export permit from the Department of Fine Arts in order to depart with these items, regardless where they were purchased, and any fees incurred to obtain the export permit will be at your own expense. Export of Buddha Images are limited to 5 full-form images only, and the height from the base to the top must not exceed 100 centimeters. (CH SDDC-PAC 07-Nov-2016 RB)

--TELEPHONES

Most Embassy buildings have touch-tone telephones capable of international direct dialing (IDD). Some are equipped with RJ-11 telephone receptacles identical to those used for phones and modems in the U.S. If you are planning to bring a phone or fax machine, you may want to bring several RJ-11 receptacles in case your residence is not so equipped. Phone calls are easily made to and from Thailand. Although the cost of calling internationally from Thailand is decreasing, many employees use an internet based system like Skype, to reduce long distance call costs. On a limited basis, the Embassy switchboard may also connect your calls to the U.S. via the Embassy's Vonage phone service. (CH SDDC-PAC 07-Nov-2016 RB)

2. CUSTOMS CLEARANCE PROCEDURES, REQUIREMENTS, AND RESTRICTIONS

a. TDY Personnel: Turkish customs law does not allow customs clearance for members not permanently assigned to Turkey. Do not ship via ITGBL or DPM. TDY personnel are allowed to receive personal property only via mail. Use this paragraph as authorization for reimbursement of postage fees if member mails property to Turkey. Personnel must ensure the following items with serial numbers as appropriate, are listed on carrier inventory at origin. Color Television (Screen size 26 inches and over) (CH) Stereos (as sets or pieces - receiver, cassette deck, CD player, amplifier and speakers) Video Cassette Recorder Unit DVD Unit <br>Computer Set (as sets and pieces - CPU, monitor, printer) Air Conditioner >Washers and Dryers Dishwasher Refrigerator Deep Freezer Microwave Oven These items are customs-controlled and require recording on the USAFE Form 554 official NATO Beyanname. Recommend member obtain a current list of Beyanname items from their
sponsor or gaining unit. Personal property must be accurately identified and complete
documentation provided including transshipment manifests furnished by processing activities.
Insufficient or erroneous documentation will delay customs clearance. (CH) Property must arrive in
Turkey not earlier than 2 months prior or 6 months after the arrival of the DoD member. Personal
property arriving after 6 months requires permission from the Turkish Ministry of Customs.
Obtaining this permission may take an additional 6 to 8 weeks after the property arrives. Turkish
Ministry of Customs will not accept any request for permission to allow delivery of personal
property that arrives after the 6-month period until after the property has physically arrived in
country. In accordance with Turkish Customs regulations, individuals will be authorized to import
their HHGs if such shipments arrive within 6 months of the special occurrences (like marriage or
divorce) after arrival to Turkey. (CH) It is very important that TMOs use extreme prudence when
determining shipment RDD. Any shipment that will arrive based on constructive RDDs either more
than 2 months prior or later than 6 months after the member arrives should be afforded the
opportunity to be placed in SIT at origin. Household goods or unaccompanied baggage are stored in
customs bonded warehouses. Turkish Customs laws allow unchallenged storage for the first 90 days.
If any shipment needs to be extended, TMO will submit an Extenuation Request letter to the
Customs Office to obtain permission from HQ Customs (for another 90 days) which can take a few
months to receive approval. Therefore, shipments must be placed into SIT at origin if members
reporting dates will be delayed because of TDY enroute or other extenuating circumstances, in order
to avoid excessive waiting time for permission from Customs and even possible seizure of the
property. (CH) Joint Spouse Assignments: Combine household goods as one shipment and combine
baggage shipments also as the same shipment under the ranking members name due to Beyannname
problems with Turkish Laws. (f. Turkish customs law states shipment must arrive not later than 6
months after the arrival of the DoD member. If dependents do not travel concurrently with the
member, any personal property shipments transported, whether under dependent travel orders or
member PCS orders, must be shipped in the DoD members name. Strict compliance will prevent
customs clearance problems, avoid possible shipment seizure, and eliminate unnecessary delays and
hardship on the family. Also, all documentation must be in the name of the sponsor. All members
inbound to Turkey must have a copy of the inventory of each shipment and be aware that all
Beyannname items being shipped into Turkey must either be shipped out when PCSing outbound
regardless of its condition, transferred to another DoD member that is authorized duty-free import,
or turned-in to the Turkish Customs. Because of recent changes in Turkish laws, it is strongly
advised that members be thoroughly briefed to not ship the following items to Turkey. Turkish
Customs does not recognize these items as household articles nor privately owned vehicles; as such,
they have not been allowing them duty-free entry into the country. To avoid additional handling and
cost of returning these items to the states for storage, it is advised that these items be identified to
go into NTS: Jet Skis, Snowmobiles, Golf Carts, Hang Gliders, Para Gliders, Ultra Light Vehicles, Boats
and Associated Trailers.

6. PETS/QUARANTINE

Standards laid out in the following document address requirements for shipping dogs, cats, and ferrets from the United States. PLEASE NOTE: Ferrets are not accepted as pets for movement on AMC military or commercially contracted aircraft. If you require information on shipments for ferrets or other exotic pets please contact your local USDA field office. NOTE: For the remainder of this document the term pet or pets refers to dogs and cats only. ATTENTION: An examination fee of 55 Euro per pet will be implemented February 1, 2013, for all non-EU citizens who import a pet into the country. A. Quarantine Period - There is no quarantine period for pets entering Germany. B. Identification (Via standard electronic identification system with a read-only passive radio frequency identification device known commonly as a transponder Microchip): (1) Complies with ISO standard 11784 and 11785 (2) Where the microchip does not comply with ISO standard 11784 or 11785, the owner or the natural person responsible for the pet on behalf of the owner must provide the means necessary (Microchip Reader Wand) for reading the non-ISO compliant microchip at the time of inspection (3) The microchip must be implanted before the primary rabies vaccination or valid rabies booster is given to the pet before traveling: a) Primary Rabies Vaccine - This is the first rabies vaccination a pet ever receives; for EU countries this also applies to the first rabies vaccine given after the microchip was implanted; that is, rabies vaccinations received prior to the pet being microchipped are NOT recognized by the EU. b) Valid Rabies Booster - This is a rabies booster that was given to the pet before the previous (Either the primary rabies vaccine or another rabies booster) rabies vaccination expired C. Rabies Immunization: (1) Please refer to www.aphis.usda.gov regulations vs iregs animals (Enter the destination country you will be residing in under Search APHIS (2) Pets less than three months of age coming from the United States may not always require the rabies vaccination IF: (a) These pets have pre-authorization from the EU member state BEFORE entering the country (3) Any one year dose or three year dose rabies vaccine is valid as long as it is a U.S. approved vaccine, and was administered according to the manufacturer specifications (for instance, a vaccine labeled for 1 year use cannot be utilized as a 3 year vaccine) (4) A valid rabies vaccine must occur after the animal has been microchipped to be valid for entry into an EU member state (5) At least 21 days must have elapsed between the completion of the primary rabies vaccination (as specified above) and before the pet enters the EU member state. (a) However, if the animal received a valid rabies booster - - 21 days does not have to elapse before travel. (6) If a pet has received a non-ISO compliant microchip and then received a valid rabies vaccination with 21 days having elapsed since that vaccination and entering the EU member state; they: (a) Do not require implantation of another ISO compatible microchip, but are required to carry with them a microchip reader wand capable of reading the non-ISO compatible microchip implanted in their pet (b) Do not require administration of another rabies vaccination before traveling as long
as the rabies vaccination received is still valid (c) Can have an ISO compatible microchip implanted in their pet so they do not have to carry the reader wand with them. If they get this ISO compatible microchip implanted, they do not have to receive another rabies vaccination following this second microchip implantation. They are only required to document both chips on the required forms with their implantation dates D. Documentation (Verify the correct required documentation with your local USDA office): (1) APHIS Form 7001 (Nov 2010) Acquired from any Army veterinarian, local veterinarian or USDA office (a) Valid for only 30 days after issuance. Timeframe the form is valid can be shortened per the requirements of the Airline the service member is traveling on (b) Requires certification by a USDA Accredited Veterinarian, Army Veterinarian, or GS 0701 Veterinarian before travel. (c) This form is not required to enter the European Union (EU) 1. However, it's highly recommended that service members acquire this form before travel from their on-base Army veterinarian to preclude the following: a. If a member flies on a commercial carrier they may be required to have this form b. If a member is scheduled to fly Patriot Express and somehow has to divert to a commercial carrier, having this form in advance alleviates last minute costs ($200) or delays. 2. This form is not required to travel on Patriot Express (2) EU Non-Commercial Pet Form (Bilingual Health Certificate) (a) For “Pets Dog, Cats, and Ferrets” destined to Germany, see link Under Pets heading Pets Dog, Cats, and Ferrets Please refer to www.aphis.usda.gov regulations vs iregs animals (Enter the destination country you will be residing in under Search ) (b) Valid for 10 days to enter European Union and 4 months once inside the European Union. 1. Timeframe the form is valid can be shortened per the requirements of the Airline the service member is traveling on (c) Requires certification by a USDA Accredited Veterinarian, Army Veterinarian, or GS 0701 Veterinarian before travel E. Helpful Hints: (1) As soon as you know you are going to travel and no later than 22 days prior to travel, get your pet microchipped first and then vaccinated for rabies if you have not already done so. Remember: A VALID RABIES VACCINE MUST OCCUR AFTER THE MICROCHIP IS IMPLANTED (a) This will ensure the required 21 days has elapsed post vaccination prior to travel (2) When completing your required documentation (before you mail the forms or travel to your local USDA office to get them certified, if not using your on base Army veterinarian), fax or over-night ship them to your local USDA office to ensure they are filled out correctly before traveling to their office (a) This will ensure you do not waste travel time or postage only to have to redo the paperwork (3) Many overseas bases have a full-time veterinarian on staff as well as commercial veterinarians available on the economy (a) Most bases require pets to be registered with the base veterinarian after arrival. Check with base veterinarian for details (4) The pet cage or carrier (See carrier shipping rules for correct cage dimensions based on pet size) used for shipping the pet must be labeled with the owner and apos name, pet name, owners (or nominated persons) address, contact number and contact number at the final destination. (5) Since 21 Apr 2001, Germany has had a law in place prohibiting importation of certain dog breeds regarded as dangerous. For more information consult http:www1.zoll.de english_version a0_passenger_traffic e0_vub h0_dangerous_dogs index.html. You may also contact the base veterinarian at your destination. F. Unauthorized Pets: The import of Pit bull Terriers, American Staffordshire Terriers, Staffordshire Bull Terriers and their crossbreeding is prohibited. G. Fees: The USDA form certification fee (approximately $70+, plus any shipping and handling if by mail) (2) Transporting pets to and from the PCS destination is at the members expense and cost is based on the size of the pet being transported. Accordingly, they ARE NOT authorized POV storage during their tour. Personnel assigned to Eskisehir, Turkey ARE NOT authorized shipment of a POV.

a. POVs (includes data on prohibited vehicles, colors, etc.)

(1) Single unaccompanied members assigned to Turkey under NATO-SOFA (Status of Forces Agreement) are only authorized to have one POV on their Turkish Customs records (USAFE Form 554-NATO Beyanname) for the duration of their tours in Turkey. Motorcycles and mopeds are considered as a vehicle for Turkish Customs, but those can be shipped as HHG. Accompanied members assigned to Turkey under NATO-SOFA are allowed to have a second POV on active duty member. Turkish Customs records (USAFE Form 554-NATO Beyanname) for use by spouses or dependents during the active members tour length in Turkey. Dependents must be over 18 years old to benefit from this privilege. According to Turkish Customs rules of the unity of family, joint spouse assignments to Turkey are considered one family unit and each family unit is only allowed a maximum two vehicles on their Turkish Customs records (USAFE Form 554-NATO Beyanname). Joint spouses may have the vehicles put on their separate Turkish Customs records (USAFE Form 554-NATO Beyanname) and use their separate entitlements to ship their vehicles in and out of Turkey at government expense. Except motorcycles mopeds shipped as HHG, second POV shipments of all other accompanied members are not entitled at government expense. Individuals who ship second vehicles to from Turkey are required to comply with all Turkish Customs requirements concerning shipment of a POV at their own expense (such as hiring a commercial customs representative, paying transit, storage and port fees, etc). Any additional POVs including motorcycles and 4-wheelers will have to be reshipped to the place of origin at the members expense. (2) Selling POVs in
Turkey: Turkish Customs Beyanname laws state the Turkish Government retains the right to approve or disapprove the sale and or transfer of POV. Members anticipating doing so while assigned to Turkey are required to submit a request to the Turkish Ministry of Customs. The decision process takes approximately 6-8 weeks at a minimum. For this reason, members must start the process a minimum of 3 months prior to their departure, otherwise, the member can anticipate delays when clearing Beyanname. Members shipping a vehicle that does not meet US Environmental Protection Agency (EPA) and the Department of Transportation (DOT) standards in addition to the above requirements are informed of the following options to consider when members are unable to sell and or transfer their vehicles: dispose of their vehicle by obtaining a Customs Broker who fees can be very expensive or ship the vehicle back to CONUS, and pay the cost of conforming the vehicle back to US EPA DOT standards which is also very expensive.

2. CUSTOMS CLEARANCE PROCEDURES, REQUIREMENTS, AND RESTRICTIONS

a. PERSONAL PROPERTY: **Please ensure this document is completely reviewed (sections 2- 13) for UK prohibited, restricted and revenue items** Effective 15 May 2015, the updated version of the DD Form 1434 will be available for download on the DoD Form Management Program website http:
The updated DD Form 1434 (May 2015) must be utilized for all personal property shipments destined to the United Kingdom (UK). This form has been extensively modified to include updated UK legislation concerning the importation of knives, weapons, goods subject to import duties taxes, and to address the increase in the import of prohibited restricted items by Service personnel. These changes are designed to protect members of the U.S. Forces by ensuring the declaration is understood, complete and accurate. The 2015 version of DD Form 1434 has 3 signature blocks; all must be signed.

The updated DD Form 1434 has been identified for update within the Defense Personal Property System (DPS) under System Change Request (SCR) 6642 and a projected implementation date has not been determined. As a result, request all JPPSO PPSO PPO ensure that Service members employees are counseled to utilize the updated DD Form 1434, and to discontinue using the June 2002 version currently in DPS. US Military Forces and civilian personnel on official duty in the UK are permitted duty free importation privileges for goods for personal use. The May 2015 version of the DD Form 1434 (United Kingdom Customs Declaration for the Importation of Personal Effects of the US Forces Civilian Personnel on duty in the UK) must be utilized only for those active duty and civilian personnel meeting the criteria, and a copy of the inventory must accompany each shipment for Customs purposes; shipments cannot be released for delivery until Customs procedures are complete. Be specific in item description within inventories; avoid generic entries such as knick-knacks, miscellaneous, stuff, souvenir, sports goods, plaque and pro-gear. Full Country Instructions should be reviewed for limits that may be applied, for example duty free vehicle limits shown in 8. Privately Owned Vehicles (POVs). Shipments for dependents (designated location moves, including British Nationals), retirees, separatees, and bluebark shipments are not permitted duty free importation privileges. These members must review guidance on Transfer of Residence (ToR) Relief at https://www.gov.uk/guidance/customs-clearance-for-transfers-of-residence-to-the-uk-and-eu, and complete Transfer of Residence (ToR) Relief (ToR01) process if eligible. All personnel who are eligible should read Notice 3: bringing your belongings, pets and private motor vehicles to UK from outside the EU https://www.gov.uk/government/publications/notice-3-bringing-your-belongings-pets-and-private-motor-vehicles-to-uk-from-outside-the-eu. The application is required to be made PRIOR to shipping goods. The form can be found at: https://www.gov.uk/government/publications/application-for-transfer-of-residence-to-r-01. Member must retain a copy of the printed ToR01 and subsequent HMRC acceptance. UK destination agent will need a scanned copy of the HMRC acceptance sent to them in order to release shipment based on the unique reference number HMRC issue. For those not eligible a customs broker will be needed who can make an entry on property owner’s behalf; this process will usually apply where movement is from another EU member state where goods were previously imported using Visiting Forces Relief (this means they are not in free circulation and need a customs entry to cross member state borders). Member must be able to pay any duty that may be assessed. Shipments cannot be released for delivery until Customs procedures are complete. All additional costs for storage while the shipment is on hold is at the expense of the property owner. Shipments in this category should be consigned to a civilian delivery address and not to a military installation in the UK. Recommend storage at origin until the member can provide delivery address.

INTRATHEATER SHIPMENTS: United Kingdom customs clearance procedures for personal property moving under European Tenders of Service-Direct Deliveries. HMRC reserves the right to inspect all US forces shipments arriving in the UK and requires notification and appropriate documentation (DD Form 1434 and inventory). Where EC SAD (HMRC Form C-88) is required by HMRC, this can only be completed by a customs clearance officer assigned in the UK. NCTS documentation used in lieu of Form 302 can be closed by receiving personal property agents in the UK; where Form 302 is used, see 2.below. 2. To meet host nation customs entry requirements for Form 302, the following actions
must be taken: a. Provide destination PPPO advance movement information to include copy of orders, DD Form 1434, inventory, UK delivery address, and ETA. b. Instruct the carrier that if any shipment is accompanied by Form 302 this must be surrendered to the destination PPPO; only US Forces Customs Clearance Officers based in the UK may lodge Customs forms when Form 302 is used. c. As soon as possible, mail copy GBL, DD Form 1299, inventory, DD Form 1434 (with member signature in ink on all copies) to destination PPPO. Destination PPPO: a. Accompanied members with spouse are allowed to import or purchase two (2) duty free vehicles. Only one vehicle may be shipped per active duty service member or DOD employee at Government expense. (4) All motor vehicles (including mopeds and motorcycles) will not be customs cleared until the member arrives on station and completes HMRC Form 941. This form is only available in the UK and is issued by the Security Police Pass and Registration Section (or similar agency) at each installation. To operate a motorcycle moped in the UK, all personnel (military, DOD civilian, and dependents) must have an endorsement on their stateside drivers license reflecting they can operate a motorcycle (this statement covers mopeds). They must also attend course seven and satisfactorily complete a hands on driving test conducted by a certified ground safety instructor in the UK. Each installation commander may establish other requirements and testing. Personnel without a stateside motorcycle license or an endorsement may operate a motorcycle moped after satisfactorily completing a safety course in the UK. Dependents without a stateside license will have to obtain a United Kingdom provisional and then a United Kingdom operator’s license.&nbsp;&nbsp;&nbsp;&nbsp;&nbsp;&nbsp;&nbsp;&nbsp;&nbsp;&nbsp;&nbsp;&nbsp;&nbsp;&nbsp;&nbsp;&nbsp;&nbsp;&nbsp;&nbsp;&nbsp;&nbsp;&nbsp;&nbsp;&nbsp;&nbsp;&nbsp;&nbsp;&nbsp;&nbsp;&nbsp;&nbsp;&nbsp;&nbsp;&nbsp;&nbsp;&nbsp;&nbsp;&nbsp;&nbsp;&nbsp;&nbsp;&nbsp;&nbsp;&nbsp;&nbsp;&nbsp;&nbsp;&nbsp;&nbsp;&nbsp;&nbsp;&nbsp;&nbsp;&nbsp;&nbsp;&nbsp;&nbsp;&nbsp;&nbsp;&nbsp;&nbsp;&nbsp;&nbsp;&nbsp;&nbsp;&nbsp;&nbsp;&nbsp;&nbsp;&nbsp;&nbsp;&nbsp;&nbsp;&nbsp;&nbsp;&nbsp;&nbsp;&nbsp;&nbsp;&nbsp;&nbsp;&nbsp;&nbsp;&nbsp;&nbsp;&nbsp;&nbsp;&nbsp;&nbsp;&nbsp;&nbsp;&nbsp;&nbsp;&nbsp;&nbsp;&nbsp;&nbsp;&nbsp;&nbsp;&nbsp;&nbsp;&nbsp;&nbsp;&nbsp;&nbsp;&nbsp;&nbsp;&nbsp;&nbsp;&nbsp;&nbsp;&nbsp;&nbsp;&nbsp;&nbsp;&nbsp;&nbsp;&nbsp;&nbsp;&nbsp;&nbsp;&nbsp;&nbsp;&nbsp;&nbsp;&nbsp;&nbsp;&nbsp;&nbsp;&nbsp;&nbsp;&nbsp;&nbsp;&nbsp;&nbsp;&nbsp;&nbsp;&nbsp;&nbsp;&nbsp;&nbsp;&nbsp;&nbsp;&nbsp;&nbsp;&nbsp;&nbsp;&nbsp;&nbsp;&nbsp;&nbsp;&nbsp;&nbsp;&nbsp;&nbsp;&nbsp;&nbsp;&nbsp;&nbsp;&nbsp;&nbsp;&nbsp;&nbsp;&nbsp;&nbsp;&nbsp;&nbsp;&nbsp;&nbsp;&nbsp;&nbsp;&nbsp;&nbsp;&nbsp;&nbsp;&nbsp;&nbsp;&nbsp;&nbsp;&nbsp;&nbsp;&nbsp;&nbsp;&nbsp;&nbsp;&nbsp;&nbsp;&nbsp;&nbsp;&nbsp;&nbsp;&nbsp;&nbsp;&nbsp;&nbsp;&nbsp;&nbsp;&nbsp;&nbsp;&nbsp;&nbsp;&nbsp;&nbsp;&nbsp;&nbsp;&nbsp;&nbsp;&nbsp;&nbsp;&nbsp;&nbsp;&nbsp;&nbsp;&nbsp;&nbsp;&nbsp;&nbsp;&nbsp;&nbsp;&nbsp;&nbsp;&nbsp;&nbsp;&nbsp;&nbsp;&nbsp;&nbsp;&nbsp;&nbsp;&nbsp;&nbsp;&nbsp;&nbsp;&nbsp;&nbsp;&nbsp;&nbsp;&nbsp;&nbsp;&nbsp;&nbsp;&nbsp;&nbsp;&nbsp;&nbsp;&nbsp;&nbsp;&nbsp;&nbsp;&nbsp;&nbsp;&nbsp;&nbsp;&nbsp;&nbsp;&nbsp;&nbsp;&nbsp;&nbsp;&nbsp;&nbsp;&nbsp;&nbsp;&nbsp;&nbsp;&nbsp;&nbsp;&nbsp;&nbsp;&nbsp;&nbsp;&nbsp;&nbsp;&nbsp;&nbsp;&nbsp;&nbsp;&nbsp;&nbsp;&nbsp;&nbsp;&nbsp;&nbsp;&nbsp;&nbsp;&nbsp;&nbsp;&nbsp;&nbsp;&nbsp;&nbsp;&nbsp;&nbsp;&nbsp;&nbsp;&nbsp;&nbsp;&nbsp;&nbsp;&nbsp;&nbsp;&nbsp;&nbsp;&nbsp;&nbsp;&nbsp;&nbsp;&nbsp;&nbsp;&nbsp;&nbsp;&nbsp;&nbsp;&nbsp;&nbsp;&nbsp;&nbsp;&nbsp;&nbsp;&nbsp;&nbsp;&nbsp;&nbsp;&nbsp;&nbsp;&nbsp;&nbsp;&nbsp;&nbsp;&nbsp;&nbsp;&nbsp;&nbsp;&nbsp;&nbsp;&nbsp;&nbsp;&nbsp;&nbsp;&nbsp;&nbsp;&nbsp;&nbsp;&nbsp;&nbsp;&nbsp;&nbsp;&nbsp;&nbsp;&nbsp;&nbsp;&nbsp;&nbsp;&nbsp;&nbsp;&nbsp;&nbsp;&nbsp;&nbsp;&nbsp;&nbsp;&nbsp;&nbsp;&nbsp;&nbsp;&nbsp;&nbsp;&nbsp;&nbsp;&nbsp;&nbsp;&nbsp;&nbsp;&nbsp;&nbsp;&nbsp;&nbsp;&nbsp;&nbsp;&nbsp;&nbsp;&nbsp;&nbsp;&nbsp;&nbsp;&nbsp;&nbsp;&nbsp;&nbsp;&nbsp;&nbsp;&nbsp;&nbsp;&nbsp;&nbsp;&nbsp;&nbsp;&nbsp;&nbsp;&nbsp;&nbsp;&nbsp;&nbsp;&nbsp;&nbsp;&nbsp;&nbsp;&nbsp;&nbsp;&nbsp;&nbsp;&nbsp;&nbsp;&nbsp;&nbsp;&nbsp;&nbsp;&nbsp;&nbsp;&nbsp;&nbsp;&nbsp;&nbsp;&nbsp;&nbsp;&nbsp;&nbsp;&nbsp;&nbsp;&nbsp;&nbsp;&nbsp;&nbsp;&nbsp;&nbsp;&nbsp;&nbsp;&nbsp;&nbsp;&nbsp;&nbsp;&nbsp;&nbsp;&nbsp;&nbsp;&nbsp;&nbsp;&nbsp;&nbsp;&nbsp;&nbsp;&nbsp;&nbsp;&nbsp;&nbsp;&nbsp;&nbsp;&nbsp;&nbsp;&nbsp;&nbsp;&nbsp;&nbsp;&nbsp;&nbsp;&nbsp;&nbsp;&n...

2. CUSTOMS CLEARANCE PROCEDURES, REQUIREMENTS, AND RESTRICTIONS

a. Venezuelan Government grants clearance for duty-free importation of household goods, unaccompanied baggage, and personally-owned vehicles of personnel assigned to Venezuela. Shipments arriving before the member’s arrival are held at the port of entry in a bonded warehouse. Although the Government of Venezuela will not grant final clearance until member is in the country and has been accredited with Government, paperwork can be put in process before his/her arrival. The Foreign Ministry requires a copy of the packing list translated into Spanish. Therefore: (1) When possible, schedule all shipments to arrive on or shortly before the member’s expected date of arrival in Venezuela.(2) Provide GSO, American Embassy, a legible copy of the packing lists for all shipments well in advance of the member’s expected arrival date in order to permit time for translation. Address to American Embassy, General Services Office, APO AA 34037-0008.b. Allow approximately 6-8 weeks for HHG and 4 weeks for UB.c. Customs clearance cannot be effected until member has arrived in country. HHG should be scheduled to arrive on or shortly before the member’s arrival date. A legible copy of the packing list/inventory, orders, weight tickets and DD 1299 must be forwarded to the STO/TO USMILGP-VEN, Unit 4980, APO AA 34037-0008, immediately after pickup of shipment. 6. PETS/QUARANTINE

All pets entering Venezuela require a health certificate issued by a veterinarian within the last 12 months certifying that the animal is free from infectious or contagious diseases, including rabies. Certificate must be accompanied by a letter from the US Department of Agriculture certifying that the person signing the health certificate is a veterinarian. A Venezuelan Consul must stamp and sign the certificate and letter. There is a $50 fee per pet for this service. Documents must accompany the pet when shipped. Pet owners should also check with the airlines to ensure US health certificates are current and meet country and airline requirements. There are presently no quarantine requirements for pets arriving in Venezuela.

7. PRIVATELY OWNED FIREARMS (POF)
Firearms authorized shipment in UB/HHG must be packed separately from other personal property in the shipment, and positioned in the container such that they are readily accessible for examination by Customs when required. We do not recommend routine importation of firearms unless specific use is anticipated. To import firearms into Venezuela, the Embassy must be notified as far in advance as possible. Prior approval by American Embassy, Regional Security Office (RSO), and Chief of Mission is required. Give full details of weapons to include owner's certificate showing when and where firearm(s) was purchased and intended use. Based on this information, the Embassy will apply for an import permit. If the permit is approved, the Embassy will arrange customs clearance. The following firearms qualify for importation:

a. HAND GUNS

Automatic pistols 6.35, 7.65 and revolvers 32 and 38.

b. RIFLES/SHOT GUNS

Smooth-bore shotguns, limited to not more than two (2) shots, 12-16-20-28 and 410 gauge and 22 caliber rifles.

c. TOY RELATED GUNS

No restrictions identified.

d. OTHER (i.e. AMMO, EXPLOSIVES, ETC)

No restrictions identified.

8. PRIVATELY OWNED VEHICLES (POVs)

Venezuelan government has decided to disallow any eight cylinder vehicles into the country. NOT ALLOWED TO IMPORT ANY ARMORED VEHICLE. NEED AUTHORIZATION TO IMPORT ANY VEHICLE FROM THE MINISTRY OF FOREIGN AFFAIRES.

a. POVs (includes data on prohibited vehicles, colors, etc.)

1. Effective April 2006, POVs five or more model years old may not be imported. 2. Only one POV can be imported duty-free per three-year tour. The vehicle must arrive in country within the first six months of member's tour. 3. Upon receipt of permanent change of station (PCS) orders specifying assignment to Venezuela, military personnel and DOD civilians must establish immediate contact with their new units of assignment in order to obtain written approval for shipment of their POV to Venezuela. Personnel being assigned/attached to USMILGP Venezuela should contact the CDR, or Transportation Officer, USMILGPVEN, APO AA 34037-0008. Personnel being assigned/attached to the US Defense Attache Office should contact the US Defense Attache Office, American Embassy, APO AA 34037 -0008. Member's request for importation of POV (message or letter format) must contain, as a minimum, the following information: make/model, year, serial number, body color, number of doors, engine size, and number of cylinders. All eight (8) cylinder engine vehicles are prohibited for import to Venezuela. Obtain written approval from the Embassy Regional Security Officer (RSO) prior to shipping 4x4 vehicles. 4. Port authorities will not accept
a POV for shipment to Venezuela unless the service member or civilian involved presents, with the request for POV shipment, either a message or a letter from the GSO, American Embassy, Caracas, or (For military/DOD personnel) the USMILGP-VE CDR or Transportation Officer authorizing the shipment of the POV. This message or letter will be addressed to the member and should contain a precise list and complete description of the POV involved (to include all information in paragraph 8a(3) above). Address markings for all POVs are as follows: DO NOT CONSIGN TO ADDRESS ON ORDERS (CH) American Ambassador American Embassy ATTN: Embassy Customs & Shipping (Mariangelica Parma Customs and Shipping Inbound Assistant) Caracas, Venezuela, FOR: Name of Owner (i.e., SFC K. Bremer-USDOS). (CH) NOTE 1: It is very important that the FOR: line come at the end. Placing it at the beginning will ensure that the VE Authorities will treat as a personal and individual shipment and not an official one. NOTE 2: According to VE Law, the Embassy can clear all "DIRECT" shipments or in other words, all shipments consigned to the Embassy. It is important that the POV be shipped on/about the week of or week after the employee departs to Venezuela. Not before! The employee must be in country and become accredited through the Foreign Ministry before the POV can be cleared through Customs and the Port Authorities. Accreditation takes about two (2) weeks after the employee arrives at post. If the employee ships his/her vehicle and it arrives before the employee does or before he/she can become accredited, the POV will remain in port accumulating "fees" and storage charges. The Embassy recently had an instance where the "fees and charges" were in excess of $8,000. If the vehicle remains in port for more than 30 days it is considered abandoned and under VE law, the vehicle will be sold to recoup the "fees". 6. To alleviate considerable customs clearing difficulties, the American Embassy requires the original negotiable copy of the ocean bill of lading (OBL) prior to arrival of POV at destination port. Mail original OBL to GSO, American Embassy, Caracas, Venezuela, APO AA 34037 - 0008. We recommend use of courier service to ensure documents arrive in a timely manner. If possible have the carrier's agent in Venezuela issue the OBL locally. 7. The original bill of lading must be sent to Embassy, preferably via FED EX or DHL. The APO, although normally a reliable means, has proven to be extremely slow. The Embassy cannot use copies to clear the vehicle. It is not accepted by the VE Authorities. Another reason for delay could cause the vehicle to be abandoned. Please use the following address: Embajada de Los Estados Unidos de America ATTN: Customs and Shipping Office (GSO) Calle F con Calle Suapure Colinas de Valle Arriba Caracas Venezuela 1080 All communications or documents for POVs only can be forwarded via USPS and APO to: American Embassy-GSO ATTN: Customs and Shipping (POV) APO AA 34037

2. CUSTOMS CLEARANCE PROCEDURES, REQUIREMENTS, AND RESTRICTIONS

Importation of antiques or replicas, particularly of Asian Art are likely to present a problem upon
departure from Vietnam even if the items are declared upon arrival. Cultural items such as books,
tapes, CDs and videos will require special handling because of host government restrictions. They
will trigger extra scrutiny if labeled as such, rather than as miscellaneous household items.

3. CONSUMABLES

The JTR identifies Hanoi, and Ho Chi Minh City, Vietnam as having a consumable goods allowance
authorized. Recommend validating consumables allowance authorization within the JTR, Appendix F
during counseling. (CH PPP-POP 3-11-2010) A. Uniformed Service Member  
1. A member is authorized to ship up to 1,250 pounds of suitable consumable goods per tour-year (i.e.,
12-month tour-1,250 lbs: 18-month tour-1,875 lbs, etc.).  
2. Two consumable goods shipments (totaling 1,250 pounds) per year are allowed if the consumable allowance is authorized.  
B. Civilian Employee  
1. A civilian employee is authorized to ship up to 1,250 pounds of suitable consumable goods per tour-year (i.e., 12-month tour-1,250 lbs: 18-month tour-1,875 lbs, etc.).  
2. Two consumable goods shipments (totaling 1,250 pounds) per year are allowed if the consumable allowance is authorized.

a. ALCOHOLIC BEVERAGES

The Government of Vietnam restricts the importation of alcohol to 50 liters per quarter (e.g., Jan 1 -
March 31; April 1 - June 30, etc.) for those assigned to diplomatic duty and 200 liters of beer. Non-
diplomatic personnel are limited to 20 liters of alcohol and 200 liters of beer. "Note that
importation of alcohol and other controlled items may slow down the processing of your shipment
through Customs. There is a Duty Free Shop where these goods can be purchased at reasonable
prices after arrival at post."

b. CIGARETTES/TOBACCO PRODUCTS
The Government of Vietnam restricts the importation of 20 cartons of cigarettes for those assigned to diplomatic duty. Non-diplomatic personnel are limited to 10 cartons of cigarettes. "Note that importation of alcohol and other controlled items may slow down the processing of your shipment through Customs. There is a Duty Free Shop where these goods can be purchased at reasonable prices after arrival at post."

d. FOOD STUFFS AND MEATS

e. MEDICAL (NARCOTICS)/PHARMACEUTICAL PRODUCTS

4. ELECTRICAL EQUIPMENT

No restrictions identified.

a. HOME COMPUTERS

No restrictions. If you plan to utilize a Home Computer you may also want to procure a Uninterrupted Power Supply(UPS) to protect you equipment.

b. TVs/VCRs

The voltage in Vietnam is 220 volt, 50 cycles. Television uses Phase Alternate Lines(PAL). Star TV and CNN are available via satellite and antenna. An American TV or VCR with NTSC, 110 volt, 60 cycles will more than likely play, but will not receive local broadcasting. However, NTSC televisions can be modified locally to receive PAL. Most video cassettes available commercially are NTSC, however. Post therefore recommends multi-system televisions and VCRs.(CH 26-Feb-2016 SDDC-PAC RB)

c. OTHER (i.e. COMPATIBILITY, ETC)

No restrictions identified.

5. FURTNITURE, OVERSIZED

No restrictions identified.

6. PETS/QUARANTINE
In order to import/export pets, the owner must have an animal health certificate and a vaccination certificate for each pet. Upon arrival, the airport animal health station will arrange for an examining officer to check the pet at the arrival/departure lounge. We must set this up prior to your arrival, so a copy of your passport data page and your pet's health certificate and vaccination certificate should be faxed/sent to post GSO Customs/Shipping section at least two weeks before arrival/departure. If the examining officer agrees that the pet is healthy, a Vietnamese certificate of health for the pet will be issued and the pet will be released immediately to the owner. If the examining officer questions the health of the animal, it will be held pending further examination. The examination is $4.00 if the owner holds a diplomatic passport, but will cost about $20.00 for each pet if the owner hold a non-diplomatic (including official) passport. The owner can bring up to two pets without processing. If the owner brings in more than two pets, GSO at post needs to request a special permit from the Department of Agriculture. Please inform post in advance of the number and kind of pet(s) you intend to bring. Airlines are increasingly limiting the transportation of pets. Hotels DO NOT accept pets.

7. PRIVATELY OWNED FIREARMS (POF)
